

Provides mobile, customizable, and cost-effective simulation screen capabilities for nursing education facilities.

The SimScreen™ provides nursing education facilities with an easy way to incorporate space saving and distraction reducing In Situ simulation. It promotes effective observation, communication and instruction — all in a cost-effective, mobile package.

With a wheeled base and customizable configurations, the SimScreen™ easily integrates into any facility, even simulation labs where space is at a premium. Now available with an optional shelf for laptops and similar devices. Made and manufactured in the USA.

Features:

- SimScreen™ incorporates Mirrorpane™ two-way mirror technology with tempered glass for increased safety.
- Move the SimScreen™ around your facility with the unit's wheeled base.
- Each SimScreen™ is designed to abut another unit to create a temporary control wall or room section.
- Frame is constructed using durable aluminum with a powder coated finish for a lasting finish.
- SimScreen™ units can slide into each other when not in use.
- Optional — Foldable laptop shelf with heavy duty stainless steel hinge.
- Also available as a corner configuration and SimScreen™ SimDoor.
