

Surgical Scrub Sink

Single and Double-Stations

Equipment for the way *you* operate.

Stainless steel scrub sinks available in single and dual basin stations

► A Quick Look

- 0.750" (1.90cm) radius that bends on all sides offer a smooth, easy-to-clean interior surface
- Faucet and drains not included
- Heavy-gauge stainless steel is heli-arc welded into one piece for strength
- Continuous rim on three sides adds structural strength
- Knee-action or foot-pedal faucet valves for both sinks
- 0.750" (1.90cm) covered corners eliminate crevices where dirt and debris can accumulate
- Optional gooseneck faucet with on/off sensor valve is also available

A clean surgical scrub area is an essential part of sanitary, bacteria-free procedures. We make it easy for you to scrub up with these top-quality, all-stainless steel surgeon scrub sinks. These single and double-station sinks feature a 10.5" (26.67 cm) deep tub, a 12" (30.48 cm) high backsplash, and covered sides and corners to eliminate any cracks or crevices where dirt and debris could accumulate. Type 304 stainless steel is heli-arc welded for superior strength and features a uniform, non-glare finish. Optional knee-action or foot-pedal faucet valves allow you to turn water on and off without risking contaminating your hands. A faucet with an on/off sensor valve is also available for even greater contamination control. These sinks are wall mounted and constructed of stainless steel.

Your choice of single or dual basin scrub sinks

Single-Station Surgeon Scrub Sink

30" L x 19" W x 22.56" H
cm: 76.20 L x 48.26 W x 57.30 H
