

INTERNATIONAL ARBITRATION

BRG Global Construction professionals have testified in international arbitration on areas such as schedule/program, productivity loss/disruption, quantum/cost, technical/defects, and project management/controls. They have provided these services in most industry sectors and internationally on projects located across the United States and in South and Latin America, Europe, the Middle East, Asia, and other regions.

**SCHEDULE /
DELAY ANALYSIS**

**PRODUCTIVITY LOSS
/ DISRUPTION**

**QUANTUM
/ COST**

**TECHNICAL /
STANDARD OF CARE
/ DEFECTS**

**PROJECT MANAGEMENT
/ CONTROLS**

Large construction projects are often designed and constructed by multinational firms and are contractually bound by terms and conditions that include local laws, customs, and regulations. When parties to the dispute, their counsel, or the tribunal decide to retain the services of experts, BRG professionals can provide objective, independent, and reasonable advice to claimants, respondents, or arbitration panels based on their extensive experience worldwide with all major international arbitration rules. Many of BRG's Global Construction professionals are international arbitration experts and possess a wide range of relevant skills and qualifications in areas including scheduling/programming, accounting, estimating, engineering, project controls, construction management, risk management, economics, finance, intellectual property, valuation, statistics, and strategic analysis.

Our experts and staff come from different backgrounds, industries, and geographies, which helps give our clients access to a diverse range of senior talent that approaches litigation and arbitration in the context of the industry, jurisdiction, or issue at hand.

Services
