

SOFTWARE ENGINEERS WANTED!

Since this was my first time job searching in Israel, the opportunity to complete mock technical interviews drew me to Gvahim Tech (GT). I saw this as a great space to practice my interview skills and fully understand how the hiring process works in Israel. I received complete support throughout my job search from GT's career consultant, placement team, and my mentors, who were olim like me. The meetings with them were impactful and made me feel more prepared and confident in my ability to get the job I wanted.

Olah Hadasha from the US & now working as a software engineer in Mobileye
