

BlueBinaries Engineering & Solution Pvt. Ltd.

Lighting System Development

Inspired by Future Mobility

TECHNOLOGY TRENDS: LIGHTING THE WAY

Drivers

- Digitalization** 
- Personalization** 
- Automation** 
- Intelligence** 

Challenges

- Technology Disruption** (DMD, OLED, Laser MOEMS etc..) 
- Resource paucity** (Optics, Software development, Cybersecurity & Functional safety) 
- Cost & Time to Market** 

Opportunities

- Modular Design** 
- Ready made Solutions** 
- Out Sourcing** 
- Global Partnership Ecosystem** 

WE ARE BLUEBINARIES

Enabling transition into Future of MOBILITY

30+ years of Global expertise in Vehicle E/E, Systems & Technology and Product Digitization

20+ Global Customers

250+ Engineers

Electrical Systems

Digital Cockpit

Chassis, Safety & Autonomous Systems

Electrification systems

Body & Convenience

Lighting

In close proximity to customers in USA, EUROPE, UK & INDIA

Ready to use Component designs, Software Algorithms & Test facilities

enabling your Transition
Into Future Mobility**

ONE STOP ENGINEERING PARTNER FOR LIGHTING SYSTEMS DEVELOPMENT

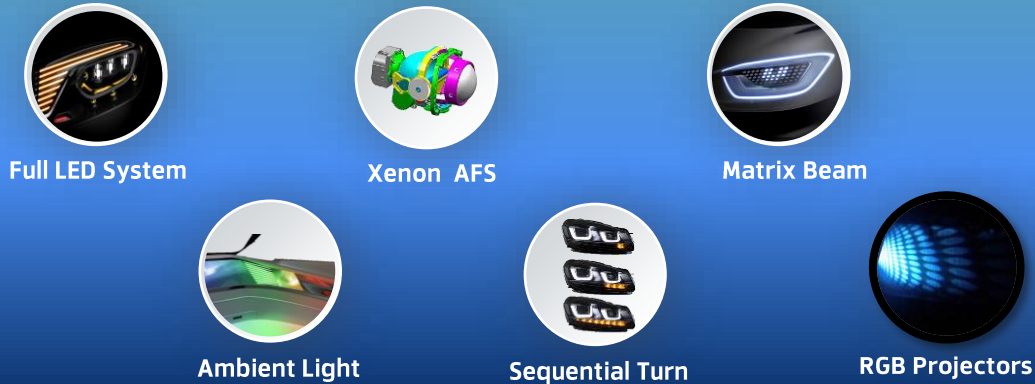

COMPONENTS / SYSTEMS EXPERIENCE

SERVICE OFFERINGS

- ✓ Benchmarking & Market Analysis
- ✓ Worldwide regulation study
- ✓ Concept Development
- ✓ Studio Engineering
- ✓ Design Engineering (CAD & DFX)
- ✓ FEA & CFD Simulation
- ✓ Optics Design & Simulation
- ✓ Electronics Development (SW & HW)
- ✓ Proto & Tooling Support
- ✓ Testing & Homologation
- ✓ VAVE

DIVERSE TECHNOLOGY EXPOSURE

WHAT YOU WILL GET!

CONCEPT DEVELOPMENT – INTELLIGENT INTERIOR LIGHTING MODULE

SOLUTION OVERVIEW

Intelligent Interior Lighting ECU is one of the Turn Key solution for any customer where it can be easily integrate the ECU to their vehicle architecture with minimal change in the SW. Major Feature of the ECU:

- All Interior Lights functions controlled in single ECU
- AUTOSAR based SW Architecture
- Model Based Application SW
- Functional Safety – ASIL B
- CAN, LIN & SPI Protocols
- Bootloader & Diagnostic
- More than 200 RGB LED'S can be Managed

FUNCTIONS REALIZED

- Welcome/Leaving scenario
- Charge status display
- Emergency Brake Assist
- Lane Change Assistant
- Navigation
- Blind Spot Warning
- Lock/ Unlock
- Drive Mode Change
- Ambient Light
- courtesy Lamp (Dome, Trunk, vanity, puddle)

KEY HIGHLIGHTS & ADVANTAGES

Scalability of function up to 25

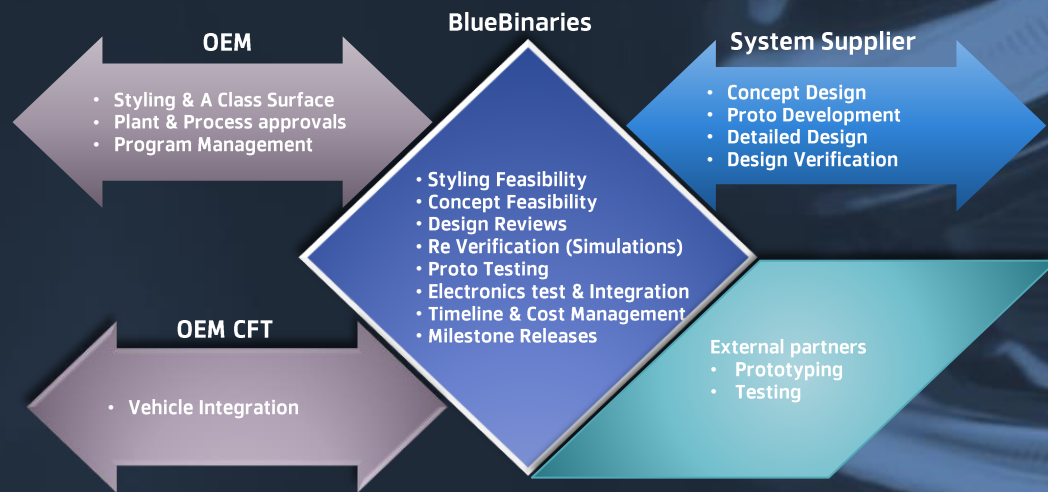

Adaptable to any type of vehicle architecture

Easy to manage variants and upgrades with out Hardware Change

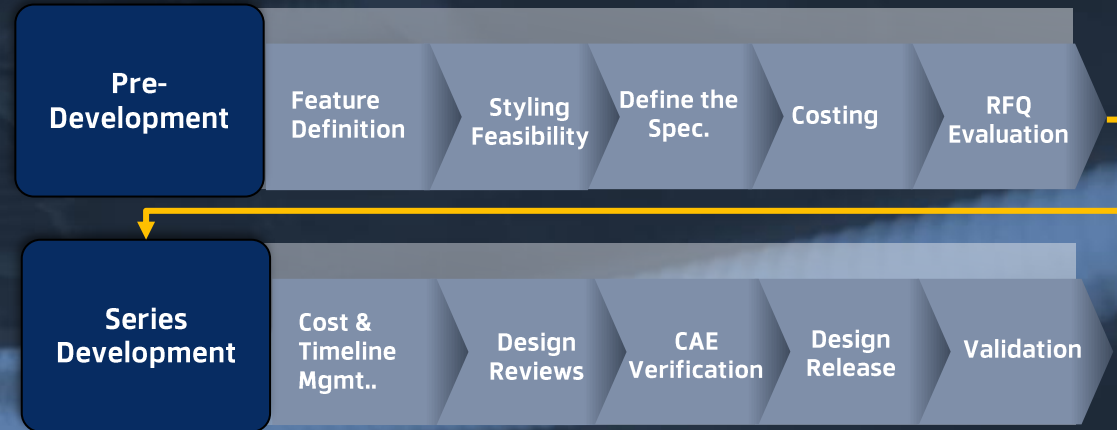

CASE STUDY – EXTERIOR LIGHTING DEVELOPMENT FROM PRE- DEVELOPMENT TO QUALIFICATION

PROJECT OVERVIEW

Product definition | Pre-development | Concept & Detailing | Build Support | Qualification | Production

SCOPE OF ACTIVITIES

PRODUCT TYPES AND TECHNOLOGY

- Full LED Headlamp – Main Function Reflector Type
- Full LED Headlamp – Main Function Projector Type
- Full LED Rear Lamp – Bulb & LED
- Bulb Version Head Lamp – H1 & H7
- Fog Lamps – H16, H8 & LED

VALUE DELIVERED

Provided a one stop solution to client supporting from requirement till qualification with expert resources and ready to use infrastructure in Opto – Mechanical design, Electronics (SW&HW) Development, CAE and Validation
