## SMB Underwriting is challenging

Commercial credit, particularly around SMBs, is expensive, complicated, inaccurate and time consuming for borrowers and lenders.

## Our Mission

Empowering Business owners and lenders to have open communication, transparency and access to growth through credit facilities.

## “Open Accounting”

CRiskCo pioneered the concept of Open Accounting, in which we provide a single API to integrate with accounting systems (Quickbooks, Xero, etc) and public data repositories (SAT, ATO, etc). Doing this, our technology standardizes and analyzes data, provides visibility into business books, and uses machine learning to identify financial risk.

## Single API

CRiskCo platform aids the Customer by providing automated financial insights, credit reports, and ongoing monitoring, measuring, and alerting on their clients' financial health. CRiskCo standardizes the data and runs predictive analytics (Machine Learning) to generate a real-time risk report and financial health alerts based on big-data collected daily.

## Recognized and leading solution

CRiskCo operates in four strategic markets: Mexico, USA, Australia and Israel, with leading customers. We are backed by leading investment firms Prytek, Plug and Play, ICBA, etc. Over 4 000 companies connected to our system until Today. We're growing, and in 2022, we expect to have over 25 000 new companies connected to our system.
