

MEANINGFUL INTERACTIONS FOR HYBRID TEAMS

Zeppi is a video collaboration system enabling remote participants an on-site entity so they can experience meaningful interactions

- On-site presence, 3D feel with a spherical display
- Eye Level communication standing or sitting, for any setting
- Life size display face & shoulders allows natural comfortable distance
- Easy set up lightweight and simple to re-position
- All in one video communication device high end camera, projection, mic & speakers

The remote member simply uses your preferred video conferencing software!

Prototype

Zeppi enhances team's collaboration where the classic video-conferencing solutions do not provide an adequate experience, due to issues like:

- Lack of onsite entity that local participants can turn to and address.
- Low visibility and engagement while sharing a screen space with other remote attendees (e.g. over zoom like squares).
- Missing out on unformal engagement time that take place away from the meeting room table.
- Uncomfortable and awkward video calls in irregular settings between more than two people in a salon type setup or other special venues.

With Zeppi, onsite presence of the remote team member is easy and valuable for:
