

TAME™ Range

AN ADVANCED CYBER COMPETENCY CENTER

IAI's TAME™ Range is an advanced cyber competency center, which can be provided either as a turnkey solution or on a pay per use basis. It's an ideal dynamic, realistic and affordable cyber training environment. The TAME™ Range training curriculum challenges cyber security enthusiasts, intermediaries and security professionals with authentic, real-world cyber-attack scenarios.

CyConcerto

NEXT GENERATION NATIONAL LEVEL SOC

IAI's CyConcerto is an innovative core management platform for National-Grade Cyber-Security Operation Centers (NSOCs). Designed to strengthen national cyber resilience, CyConcerto integrates and manages an assortment of cybersecurity systems, fusing them into a single focal point for all NSOC services and activities. CyConcerto performs centralized threat analysis and management by integrating threat intelligence information from multiple sources with reported cyber incidents and attack surface mapping.

IAI-ELTA Cyber Division

IAI'S CENTER FOR CYBER SOLUTIONS

IAI's center of excellence for Cyber Solutions addressing national-grade cyber challenges faced by nation-states, critical infrastructures, defense forces and large enterprises.

IAI leads the Israeli Cyber Companies Consortium (IC3) and the Israeli Aviation Cyber Companies Consortium (IAC3) comprising of leading Israeli cyber companies, the best and finest of Israel's cyber eco-system & innovation.

Where Courage Meets Technology™

CyFo

MALWARE FORENSICS PLATFORM

CyFo is an all-inclusive Malware Forensics Platform that enables investigators to perform the complete malware forensic analysis cycle. The platform is easy to operate and requires very little training and operating knowledge. What once required experienced expertise can now be performed simply and automatically with no need for user interaction.

Cyber Academy

COMPETENCY CENTER

IAI establishes local live and online cyber academies. This is achieved by providing high-level expert training solutions and enabling our end users to gain independent cyber knowledge in order to run their own Cyber Academy through train-the-trainer programs. Services include on-the-job and hands-on training, testing, and operational support that will strengthen an organization's cyber-security proficiency level.

CyShare

COLLABORATION AND INFORMATION SHARING

IAI's CyShare platform provides a secure portal for sharing cyber threat information within an ecosystem. Designed for National Security Operations Centers (NSOC) and central SOC/CERT's, defense, government agencies and large enterprises, CyShare provides quick, easy, safe and systematic means for NSOC, CERTs and central SOCs to alert its member organizations of new and emerging security risks and provides tools and best-practice methodologies to prevent and mitigate cyber-attacks.

CyScan

NATIONAL VULNERABILITY SCANNING PLATFORM

IAI's CyScan is a platform for monitoring nationwide vulnerabilities and configuration discrepancies, facilitating a comprehensive cyber risk awareness. The platform performs nonintrusive, proactive and automatic national IP address range scanning and analysis for Attack Surface Monitoring and reports on potential risks. The solution simulates the attacker's view from all steps of the cyber kill chain and detects and exposes vulnerabilities on IT and OT networks. CyScan incorporates global vulnerability scanning engines (i.e. Nessus, SHODAN).

Trades

THREAT AND RISK ASSESSMENT

IAI's TRADES is a model-based design and analysis implementation of IAI's state of the art, field-proven methodology for Threat and Risk Assessment. TRADES enables management of security related repositories (threats and controls), on the fly documentation of system composition and security related findings, threat chain composition, scoring and model-based design paradigms.

IAI's TRADES is open source and can be downloaded at

<https://github.com/IAI-Cyber/TRADES>

CyInspect

SOFTWARE SECURITY AND AUDIT TOOL

CyInspect is a software security and audit tool that performs software scan for cyber vulnerabilities. CyInspect maps the entire software parts, including drivers and firmware, and associates each vulnerability to the relevant software part.

CyInspect incorporates global cyber vulnerabilities scanning engines based on Off-the-Shelf and open-source tools.

CyITS

ISRAEL CYBER CENTER FOR ITS

CyITS is a state-of-the-art research and testing facility, that certifies products in compliance with the regulations governing cyber resiliency of Intelligent Transportation Systems (ITS). CyITS was established by the Ministry of Transport, the National Cyber Directorate, and Ayalon Highways, in partnership with a consortium led by ELTA Systems, including IBI group, Alstom, Enigmatos, and Ben-Gurion University of the Negev. CyITS offers the industry's most advanced technologies to optimize a range of cyber defense capabilities for vehicles and transportation infrastructures.

Custodio Subsidiary

CVVESTIGO & ORBWEAVER

CyVestiGO, Next Generation Cyber Investigation Platform, is an advanced multi-layer cybersecurity investigation solution that automatically correlates & pivots events of interests from multiple data sources. It generates an intuitive threat visualizer for actionable insights.

Orbweaver is a patented early warning data leak detector. When the dreaded data leak occurs, Orbweaver enables you to get a head start on damage control by promptly and covertly alerting you when sensitive data is accessed outside of your organization.
