OUR STORY

CREATING THE MOST EFFECTIVE ENTERPRISE SECURITY SOLUTION.

RedRok is a comprehensive security system created by four Cybersecurity experts with over 30 years of experience in consultation and research and development. The platform was created from discovering huge security gaps with common EDR , XDR and Network protection solutions to mitigate unseen vulnerabilities, and close critical security gaps.

OUR PHILOSOPHY

IF THEY CAN HACK IT, WE CAN BLOCK THEM FROM EVEN TRYING.

At RedRok, we understand the critical importance of data security in today's digital ecosystem. Our tailored cybersecurity solutions are designed to provide maximum protection for your sensitive data against unauthorized access, ensuring your operations remain unbreachable.

OUR EXPERTISE

We have decades of experience developing solutions and strategies.

INNOVATIVE SOLUTIONS

Our R&D is constantly evolving to counter the latest Cyber threats.

HOW IS REDROK DIFFERENT?

RedRok's four-tiered platform is agentless and covers all areas of cyber risk exposure. Our platform enables CISOs and IT teams to validate and optimize their current security measures without installing additional solutions from a single dashboard.
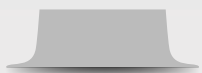

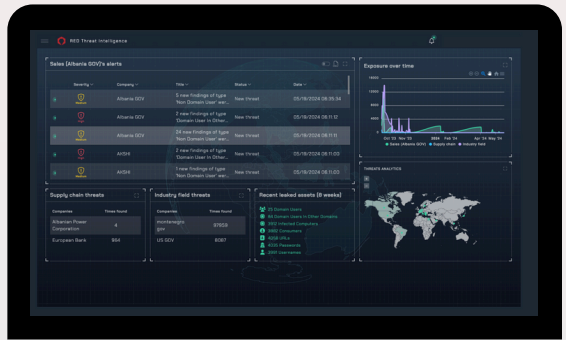

Cyber Intelligence
External Monitoring
Social Engineering
Internal Monitoring

FULL SPECTRUM SECURITY

## Cover All Four Areas of Vulnerabilities

CYBER INTELLIGENCE

✓ Dark Web Monitoring

✓ Deep Web Monitoring

✓ Attack Groups

✓ Credential Monitoring

✓ Real Time Alerts

✓ VIP Monitoring

✓ Supply Chain Monitoring

✓ Data Leaks

ATTACK SURFACE VISIBILITY

- ✓ 24/7 External Monitoring
- ✓ Keep Alive Monitoring
- ✓ Security Certificates
- ✓ Port Scanning

INTERNAL THREAT MANAGEMENT

- ✓ Internal Domain Vulnerabilities Management
- ✓ Regulatory Compliance Audit
- ✓ Workstations Vulnerabilities Audit
- ✓ Data Leakage Prevention
- ✓ Compromised Credentials Validation
- ✓ Internal Services & Processes Validation

CYBER AWARENESS AND SIMULATION

- ✓ Simulation of Cyber Attacks Phishing, Smishing, Vishing
- ✓ Advanced Analytics
- ✓ Interactive Education Modules
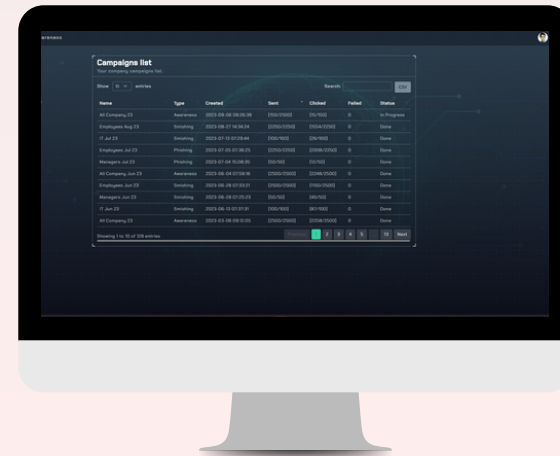

UNO
CTEM
(Continuous Threat Exposure Management)

UNO is a comprehensive dashboard designed for C-Suite executives, CISOs, and IT teams, providing a complete overview of your organization's cybersecurity posture. The platform integrates data from four powerful tools to offer a holistic view of potential threats and vulnerabilities. By combining insights from these four tools, **UNO** equips you with the critical information needed to make informed decisions about your cybersecurity strategy. With UNO, you'll have full control and maximum confidence in your organization's data security.
