

ABOUT US

Contech is a leading global Construction-tech hub

With Israeli technologies, government support, and the spirit of Israeli entrepreneurship, Contech builds a unique ecosystem, making Israel a leading global Construction-Tech hub. The Contech ecosystem includes startups, companies from all sectors of the construction industry, contractors, software companies, regulatory bodies, policy makers and investors.

Contech activities are aimed to grow the construction-tech startup ecosystem, while facilitating business connections between startups and industry players in Israel and abroad.

THE OPPORTUNITY

Israel is a world leader in technology innovation, with a growing number of startups focusing on the construction industry.

Contech connects construction industry leaders and disruptive Israeli technologies, identifying startups that match our Partners' specific needs.

THE VALUE

Contech provides select industry leaders with a focused innovation arm at the heart of Israel's startup ecosystem, managed by a team of technology, venture and construction experts.

Our work methodology includes assessment of partner needs, presentation of a curated set of relevant solutions, and assistance in piloting and implementation of select technologies.

Benefits

- » Reliance on our extensive experience in Construction and Infrastructure core systems, business needs and identifying pain points.
- » First access to technologies and solutions.
- » Opportunity to invest in the participating startups.
- » Market positioning as an innovation leaders.

Targeting

- » Worldwide GCs and developers.
- » Software providers serving the construction industry.
- » Materials and building methods providers.
- » Machinery companies (heavy machinery, power tools and more).
- » Utilities (electricity, gas, oil, telco).

THE PARTNERS

ISRAELI BUILDERS ASSOCIATION

The Israeli Builders Association is the only representative organization dealing with construction, infrastructure, development, and other engineering works in the Israeli market. The Association works to promote the construction and infrastructure industry, to safeguard the interests and rights of all contractors and builders, and to solve problems in a variety of professional fields under the industry. The Association operates three professional divisions: the Entrepreneurship and Construction Division, the Infrastructure Division and the Contract Building Division.

MINISTRY OF CONSTRUCTION AND HOUSING

The Ministry is responsible for initiating and implementing government policy in the housing sector, extending to activity in the housing value chain, developing infrastructures, and providing public institutions and open public spaces. The Ministry leads the planning and implementation of residential neighborhoods throughout the country and is responsible for all the activities related to urban renewal.

MINISTRY OF ECONOMY AND INDUSTRY

For the past 10 years, The Ministry of Economy and Industry has built ecosystems and developed communities around specific sectors. The Ministry initiated and led the "Israel NewTech" program, which develops and promotes the water and renewable energy industries. In addition, the Ministry participates in the National Intelligent Transportation Program and operates business knowledge communities in the areas of education and health. These innovative models enable the Ministry to lead the way of changing perceptions and facilitate connections between different sectors.
