

QualityLine

## AI Diagnostics analytics to power your manufacturing quality and efficiency globally

### Manufacturing Analytics 360°

QualityLine is the only solution that automatically integrates with your worldwide manufacturing data and creates an advanced diagnostics analytics for you

#### Gain complete control

across your entire global manufacturing operations. Fully functional analytics implementation by AI technology that sets up the analytics for you to quickly improve quality and efficiency of your products.

#### Automatic Interpretation

of any of your data sources from any location worldwide by QualityLine technology to power your operations.

### Automated Data Integration

QualityLine is the only automated data integration solution that automatically maps unlimited data sources into one database. No API, no hardware installation.

#### Technology designed to simplify the complex integration

and harmonization of manufacturing data, allowing for consistent automated movement and delivery of data to manage industrial processes across a wide range of applications.

#### Automated integration system

will continuously and automatically collect and harmonizes all accumulated data to provide greater visibility and gain end-to-end global control over your entire manufacturing chain.

Any types of data > ANY saved manufacturing data sources > Manual data > Machines > testing stations > Sensors

Real time monitoring of Key Performance Indicators

First Pass Yield, Total Yield, PPM, Rolled Throughput Yield, failure rate

Six sigma process control

### Field Performance Analytics

Monitor and optimize products performance in the market to quickly and accurately correlate with manufacturing data to improve quality and reduce product returns.

QualityLine

QualityLine has more than 25 years of experience in the manufacturing industry. We put intelligence into your manufacturing data so you can quickly improve efficiency of the manufacturing process and keep the best quality of your products. Our solution was acknowledged by global companies, providing a significant value with quick Return On Investment.
