

Realize your operational potential

- Digitize your factory
- Optimize your efficiency
- Empower your workforce

Leverage Real-Time Manufacturing Analytics to Increase Operational Efficiency by Over 20% Within Weeks

Matics real-time manufacturing analytics is a modern-day factory floor management solution that provides a smart way of digitally streamlining the production journey. Unlike the old generation BI platforms, which produce reports for post-mortem analysis, Matics allows you to focus on critical issues that demand your attention immediately.

By leveraging cutting-edge industry 4.0 technology, Matics becomes one source of truth for everyone in the organization, instantly providing KPIs for all departments and across all factories. With straightforward actionable insights, comprehensive dashboards, and real-time communication and notifications, Matics solution empowers employees and managers to make the right decisions and achieve 20-30% improvement in OEE and production effectiveness in a matter of weeks.

Matics is a secure cloud platform that easily integrates with information & peripheral systems and can be deployed within hours as a low-touch plug & play solution. It is designed as a suite of smart connected applications tailored to the needs of each stakeholder from management to line workers, planners, technicians, and quality control managers with an intuitive and user-friendly interface that facilitates collaboration across groups.

Plug & Play

Deploy within hours. Start delivering ROI Immediately.

Agile Solution

Flexible modular solution that allows you to grow and expand at your own pace.

Secure Cloud

InCloudFactory™ ensures secure, fast and stable data connectivity from your factory to the cloud.

Smart Connected Apps

Tailored to the needs of each group yet facilitates collaboration across groups.

Communication & Notifications

Get smart alerts on critical issues that demand your attention in real time.

Matics can turn any facility into a smart agile factory
