

Resistine

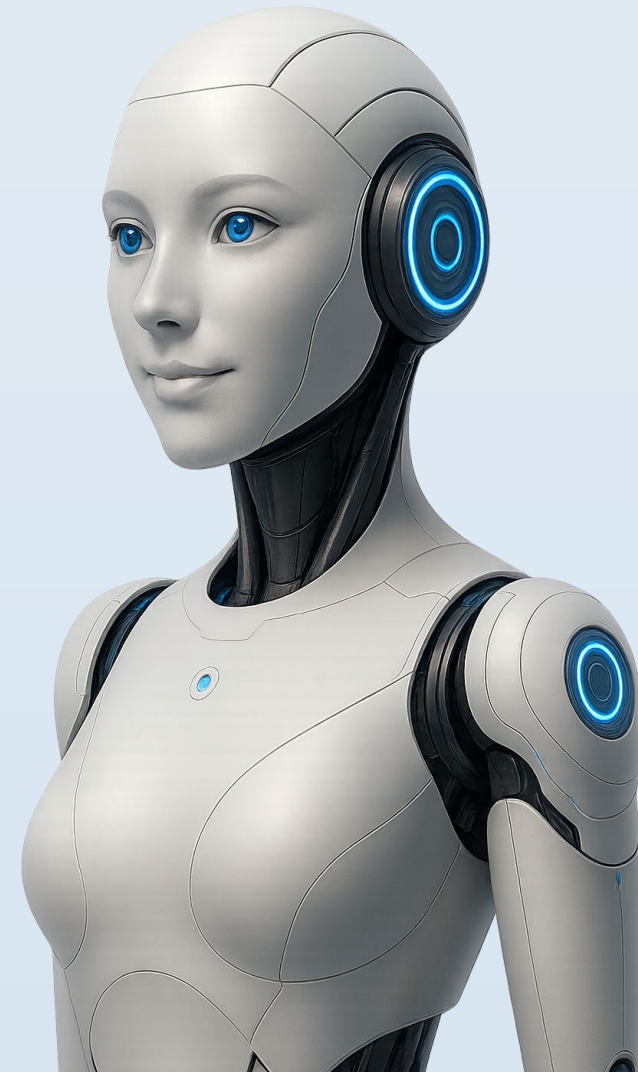

Resistine

Cybersecurity AI Assistant

The EU's first easy to use and affordable AI Prevent – Detect – Respond (XDR) solution that makes your endpoints, networks and clouds secure, compliant and manageable.

Complete visibility of IT & cybersecurity operations. Intuitive for any skill level, enables teams to do more without increasing IT costs and cybersecurity staff:

- ✓ PREVENT: secures and identifies all assets and risks to protect "the good"
- ✓ DETECT "the ugly" operational problems, misconfigurations, vulnerabilities and threats
- ✓ RESPOND "the bad," recover and, report incidents according to EU's Cyber Resilience Act, NIS-2, DORA, GDPR, NIST CSF 2.0, ISO 27000, ...
- ✓ COMMUNICATE with all employees for training and compliance using an easy to use AI chat!

Resistine

WHO we are?

Resistine is a European cybersecurity company creating an AI assistant that makes security practical, affordable, and easy to use for organizations of any size.

WHAT we do?

Resistine unifies prevention, detection and response (E/N/XDR) across IT, OT networks and cloud in one intuitive, agentic AI-driven platform that communicates with everyone.

WHY us?

Because cybersecurity and compliance is too complex and expensive.

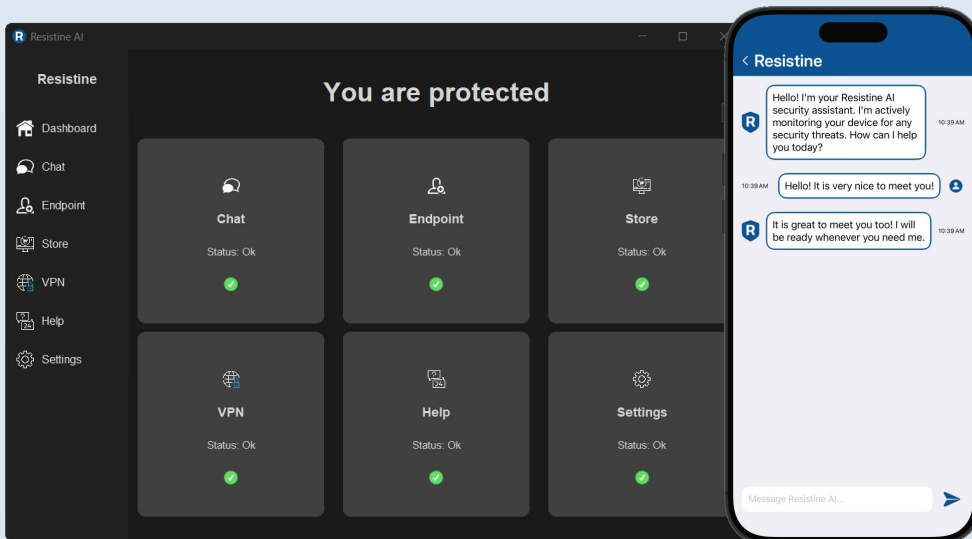

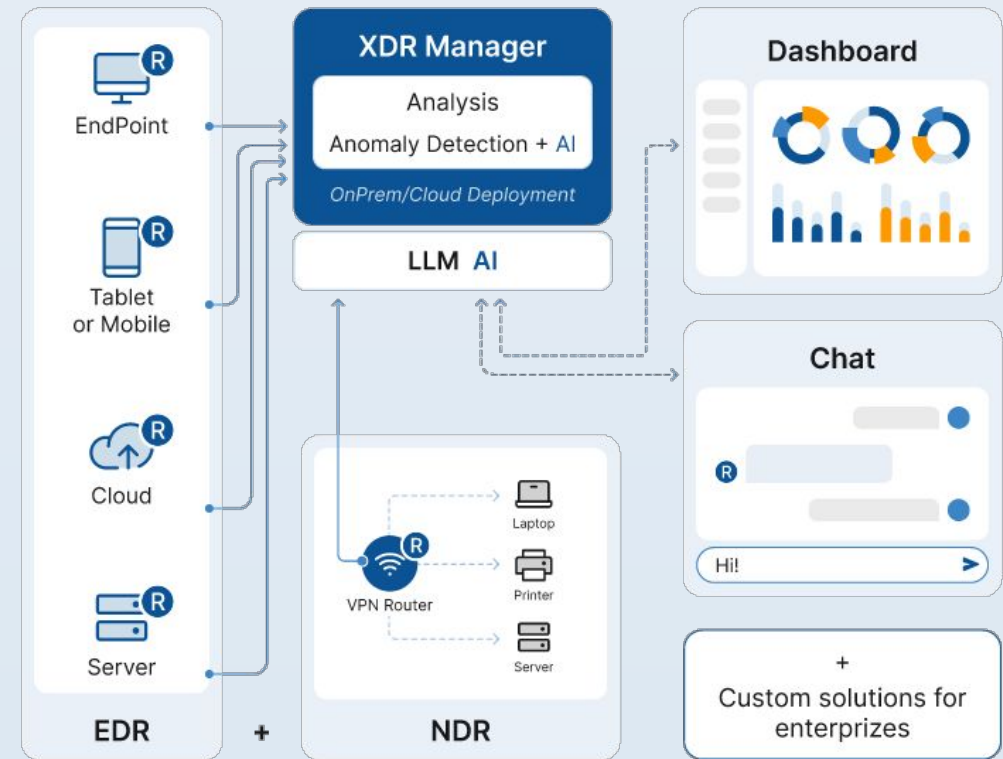

Resistine helps teams:

- gain complete visibility
- respond faster with less effort
- reduce costs without adding staff
- stay ready for regulations in clouds and on-prem
- involve employees instead of fighting them

Resistine turns it into something teams can actually manage.
