

PRODUCT CATALOGUE 2025

Waste Management Bags

Sayre®

It gives me great pleasure to present our 2025 catalogue.

You can see all the innovations and improvements that have been added to the catalogue on these pages.

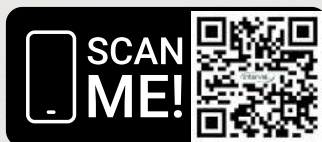

We highlight the Bio Compostable product lines and new references both in plastic bags for 30 and 100 litres buckets.

We continue with the possibility of customizing products with barcode and QR, the best way to give visibility to your own brand !!!

I'm fully confident that this catalogue will be very helpful and practical.

Eva Garcia

Business Management

WHO WE ARE

1982

YEAR
FOUNDED

2^a GENERATION

BUSINESS
FAMILY

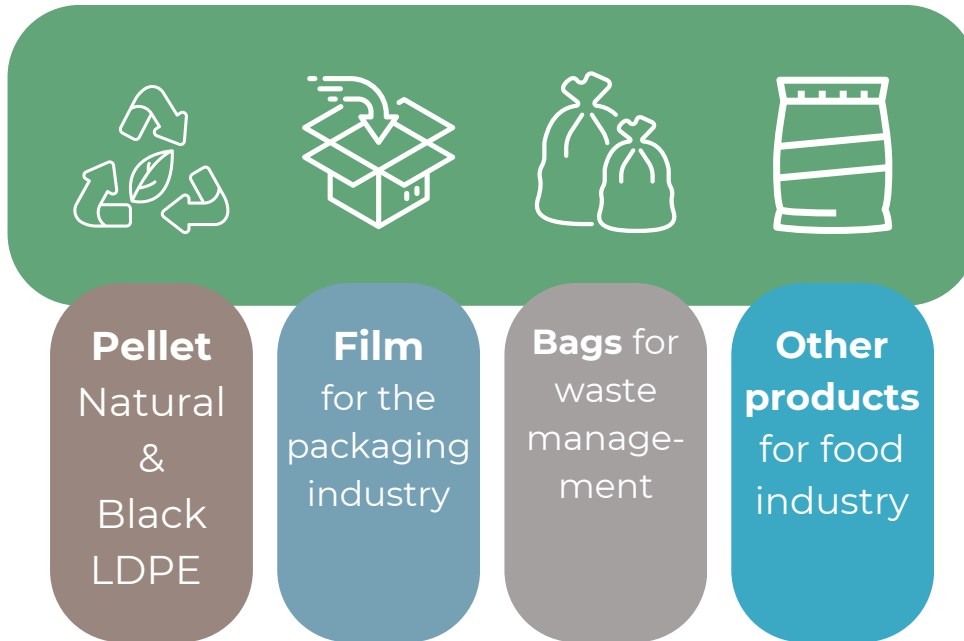

4000 + TN

ANNUAL
PRODUCTION

Since our origins, we have been involved in the plastics reuse and **processing**, being our main objective to **recycle** the plastic waste that our society offers us by transforming it into useful and practical stuff.

Our aim is to leave a **better and more liveable world** for future generations and that leads us to use materials and productive process with the least possible environmental impact. Working on this is a top priority

WHAT WE PRODUCE

Our main products are waste management bags, but there is a refuse sack for all requirements, we also manufacture bags for commerce, single-use aprons or plastic sheets and food sacks.

By carrying out the complete transformation in all its phases, our semi finished products are highly appreciated in the rest of the industry such as pellets or coils made with post consumer material.

HOW WE WORK

Our garbage bags are made with 100% recycled materials from our own production facility.

We ensure the optimum quality in all phases of production, controlling and doing continuous monitoring of the product throughout each phase at our facilities

We transform waste using renewable energies, achieving a product with an impact 90% lower than the production of conventional bags.

Made of LDPE Post Consumption material 100% recycled and 100% recyclable. Certified in Type I Eco-label: Blue Angel And Environmental Quality Guarantee Distinction

Produced according to UNE 13.592 which is a quality guarantee, with a resistance to controlled traction, anti-drip system and good opacity. We work under the ecological criteria set by the UNE 53.971 standard.

SAYRE waste management bags are indicated for street cleaning work, hospital waste, HORECA sector and gardening. Perfect for both domestic and community waste.

PRACTICAL ADVICE

PRACTICAL ADVICE

In this section we would like to help you identify which bag is the most suitable for each container.

It is a suggestion based on our experience. As you well know, each bin manufacturer has its own measurements and even if you tell us the litres, it is not enough information to know exactly which bag is the one that is fitted 100%.

Please contact us for further information.

LITERS	diameter of container	our bag
30	310	52 x 58
50	375	60 x 90
50	430	70 x 70
50	450	72 x 85
100	510	85 x 105
120	570	90 x 120
240	730	115 x 150
300	830	135 x 150

WISHING TO TRAIN WITH US ?

Get your sales team together and we will turn them into experts in bags for waste management

We will explain the difference between concepts such as virgin and recycled materials, which is the most suitable bag for each bucket, regulations and market trends..

Immerse yourself in our production plant and you will know how the process is carried out from the entry of the raw material, being a waste, until its transformation into a practical garbage bag..

Can't you come to Valencia? No worries, we can bring our knowledge to your facilities.

BIOAGRADABLES

INTERVAL collaborate with **BioAgradables** association whose activity falls within the protection and conservation of the natural environment through different environmental awareness and education activities.

The main activity is the organization of beach cleaning as a direct awareness tool related to the effects of human activity on the beaches of the Mediterranean Levant. At the same time, environmental education talks and workshops are held.
