

Who we are

LUCIA unites 20 partners to understand new lung cancer risk factors and enable precision screening and prevention.

What we are working on

We developed AI-supported screening tools and non-invasive sensors to detect lung cancer risk signatures, and now move towards validation, sustainability and exploitation.

What's the one thing we need next

We seek research, clinical and implementation partners to support uptake of LUCIA's AI-based, non-invasive screening technologies and new lung cancer policies.
