Spinal decompression table

### TECHNICAL INFORMATION

Voltage.....230V (50/60 Hz)  
Maximum current.....3A  
Maximum power.....700 W  
Vibration frequency range.....15 à 60 Hz  
Amplitude.....0,75 mm

Computer provided.  
Internet connection required to use the application.

### USER RECOMMENDATION

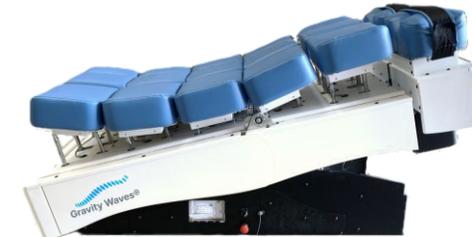

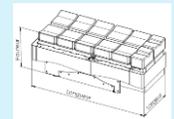

Maximum weight..... up to 190 kg  
Height range.....145 cm to 205 cm

### PRODUCT CLASSIFICATION

Annex VIII of MDR 2017/745.....Class I  
IEC 60601-1 (Electrical Safety).....Class I  
IEC 60601-1-2 (CEM).....Class B  
EN IEC 62304 (medical software).Class A  
IP Classification.....IP2X

### PRODUCT DIMENSIONS

Length.....216 cm  
Width.....87 cm  
Height.....87 cm  
Weight.....400 kg

### Who are we?

Experts in therapeutic solutions for the management of musculoskeletal disorders (MSDs), **bodyfeed®** is an Ardennes-based company that designs and manufactures non-invasive medical devices respecting human physiology, such as the **Gravity Waves®** medical device.

Guided by societal and environmental responsibility, we prioritize high-quality care, innovation, and inclusivity, ensuring excellence in every device we create.

- Made in France FR

Spinal decompression table

### COMPUTER-CONTROLLED

using intuitive software

### ERGONOMY

Comfortable and adjustable cushions

### Suitable for all your patients:

- Up to **190 kg** and **205 cm**
- Comfortable
- Adjustable

### 100% customizable programs::

- **Tailored** to patient **morphology** and **pain levels**.
- to patient **efficient** and **time-saving**
- With or without **comfort vibration**

### GRAVITY TRACTION

for gentle, non-invasive decompression

### Non-invasive decompression:

- Controlled declivity
- **Pain-free** care
- **Inflammation-free** results

### As a healthcare professional, you benefit from:

- A gentle and effective approach to treating **chronic pain** such as low back pain.
- A device that supports your **rehabilitation** protocols and promotes patient **autonomy and mobility**.
  - An enhancement to your care offerings that improves **patient satisfaction**.
  - **Significant time savings**, with efficient care.
