From public funding to project implementation

It is our mission to help you accelerate your research and innovation. To this end, you will find all the necessary knowledge and tools incorporated in our services. PNO Innovation's overall service offering consists of four categories designed to strengthen innovation processes, projects and investments from idea and development to public funding and realization.

Public funding

Public funding can advance your innovation, and we are here to help you access it. From R&D tax incentives to European funding and compliant grant management, our experts support you in realizing the full value of your project.

Innovation consultancy

We help you make smarter investment decisions with expert support at every stage of your innovation project. From market analysis and business planning to cost-benefit assessments, we offer the expertise you need.

Project implementation

Successfully managing EU-funded projects requires both precision and purpose—and that's where we come in. With deep expertise in project management, communication, and impact-driven exploitation, we help you deliver results that matter.

Digital innovation

We use AI and big data to speed up innovation, streamline RD&I processes, and deliver faster results. Whether you are refining your funding strategy or boosting project impact, our digital tools give you a clear advantage.
