

ANGUZAL AGROSERVIS LLC

Horizon Europe Partner Capability Profile

Agricultural biotechnology SME from Uzbekistan

ANGUZAL AGROSERVIS LLC
Horizon Europe Partner Capability Profile
Agricultural biotechnology SME from Uzbekistan

WHO WE ARE
Anguzal Agroservis develops and manufactures microbial solutions for sustainable agriculture, soil health and biological plant protection.

WHAT WE OFFER

- Microbial formulation and fermentation
- Biological crop protection
- Soil-health and plant-resilience technologies
- Pilot production and process scale-up
- Agronomic field trials and treatment validation
- Validation under drought, heat, salinity and degraded-soil conditions
- Central Asian demonstration and replication sites

HORIZON EUROPE INTERESTS

- Cluster 6
- Mission Soil
- Climate-resilient agriculture
- Sustainable crop protection
- Soil microbiome
- Bioeconomy

ROLE IN CONSORTIA

- Industrial biotechnology partner
- Technology-development partner
- Manufacturing and scale-up partner
- Field-demonstration and validation partner

MICROBES, SOIL, PLANTS. TOGETHER FOR A RESILIENT FUTURE. | SCIENCE-DRIVEN NATURE-BASED SOLUTIONS | FROM UZBEKISTAN FOR GLOBAL COLLABORATION | SUSTAINABLE AGRICULTURE HEALTHY SOILS, STRONGER FUTURES

Anguzal Agroservis offers research, production and field-validation capabilities for Horizon Europe consortia in sustainable agriculture, soil health and biological crop protection.

Who we are

Anguzal Agroservis develops and manufactures microbial solutions for sustainable agriculture, soil health and biological plant protection.

What we offer

- Microbial formulation and fermentation
- Biological crop protection
- Soil-health and plant-resilience technologies
- Pilot production and process scale-up
- Agronomic field trials and treatment validation
- Validation under drought, heat, salinity and degraded-soil conditions
- Central Asian demonstration and replication sites

Horizon Europe interests

- Cluster 6
- Mission Soil
- Climate-resilient agriculture
- Sustainable crop protection
- Soil microbiome
- Bioeconomy

Role in consortia

- Industrial biotechnology partner
- Technology-development partner
- Manufacturing and scale-up partner
- Field-demonstration and validation partner

Why partner with Anguzal

Anguzal Agroservis provides a practical bridge between research and deployment. For Horizon Europe consortia, this means the ability to test, validate and scale biological solutions under challenging real-world agricultural conditions.

Key strengths	Indicative fit for Horizon Europe projects
• Hands-on expertise in microbial technologies for agriculture • Pilot production and process scale-up capabilities • Experience with field validation and agronomic treatment monitoring • Access to arid, saline and heat-stressed conditions in Central Asia • Potential contribution to exploitation, replication and market uptake	• Soil health and Mission Soil actions • Climate-resilient agriculture and sustainable crop protection • Soil microbiome and plant-resilience technologies • Bioeconomy and biological agricultural inputs • Multi-actor pilots, Living Labs and demonstration activities

Potential contribution to work packages

WP area	How Anguzal can contribute
Technology development	Microbial formulations, biological crop-protection solutions, soil-health interventions, prototype refinement.
Pilot production & scale-up	Fermentation, process optimisation, pilot manufacturing, readiness for scale-up and deployment.
Validation & demonstration	Agronomic field trials, treatment implementation, monitoring under drought, heat, salinity and degraded soils.
Replication & exploitation	Central Asian replication environments, practical deployment insights, contribution to market uptake pathways.

Collaboration interests

- Joining existing Horizon Europe consortia as an industrial biotechnology or field-validation partner
- Co-developing proposals with coordinators, universities, RTOs, SMEs and Living Labs
- Supporting biological and soil-health innovation with practical pilot environments in Uzbekistan and Central Asia
