

The World Bank estimated the cost of health damage caused by air pollution at US\$8.1 trillion per year, equivalent to 6.1% of global gross domestic product (GDP).

Poor air quality: A serious problem

 The Conversation 

Poor indoor air quality isn't just making us sick – it's also polluting our cities

Ventilation systems pump polluted air from our homes – which contains particulate matter and methane – into the environment.

EU: air pollution remains a major health risk

Air pollution in Europe has declined over the past two decades but remains one of the greatest environmental health threats.

Team

Mateo Cusí
Chief Strategy Manager

- ✓ Marketing y ventas ESIC
- ✓ Siete años en ventas
- ✓ MBA en Shanghai

Joaquín Cusí
Chief Executive Officer fundador

- ✓ Biólogo.
- ✓ PADE IESE
- ✓ 30 años dirigiendo empresas

Stephane Laforest
Chief Technology Officer

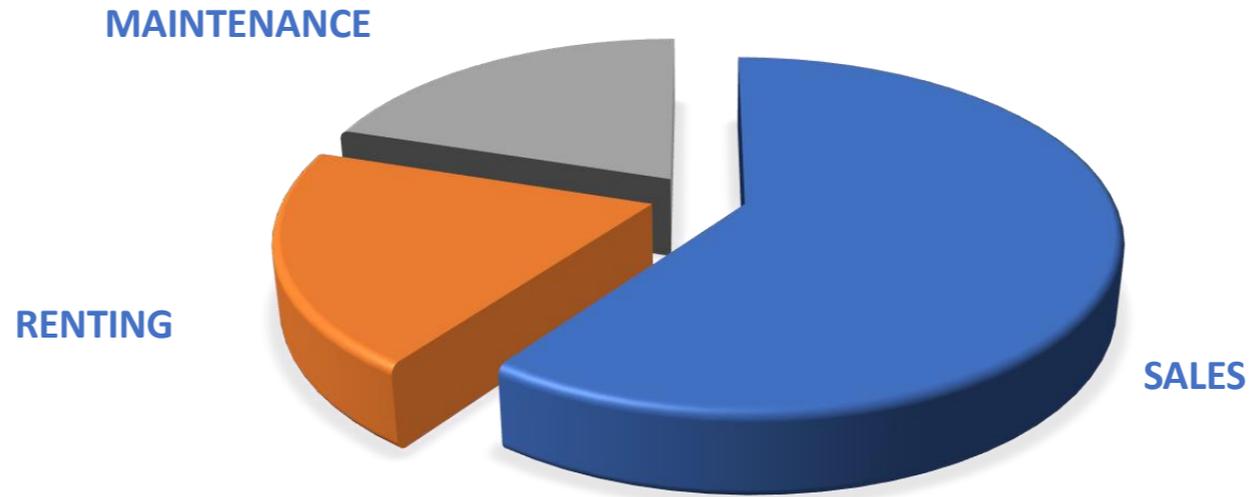

- ✓ Ingeniero industrial
- ✓ 15 años en el sector de la ventilación

Positive impact on the SDGs

Business Model

- Contracted manufacturing
- Direct sales B2B
- Sales through big contractors.
- Hardware as a Service : renting all included
- Two main verticals: industry and health
- Patented technology

Testimonials

"...We have relied on UAP technology based on its UVC light system and high efficiency HEPA H14 filter because they have proved very effective and have always been used in hospital clean rooms..."

Josep Maria Campistol
General Director of Hospital Clínic.

"... People who previously did not want to eat inside when they saw the purifier have decided to eat inside again. It is a big help for the restaurant owner to give more security to his customers and workers..."

Ignacio Furest
Red Fish Restaurant
