

Space Partnership

Overview and how to be involved?

-

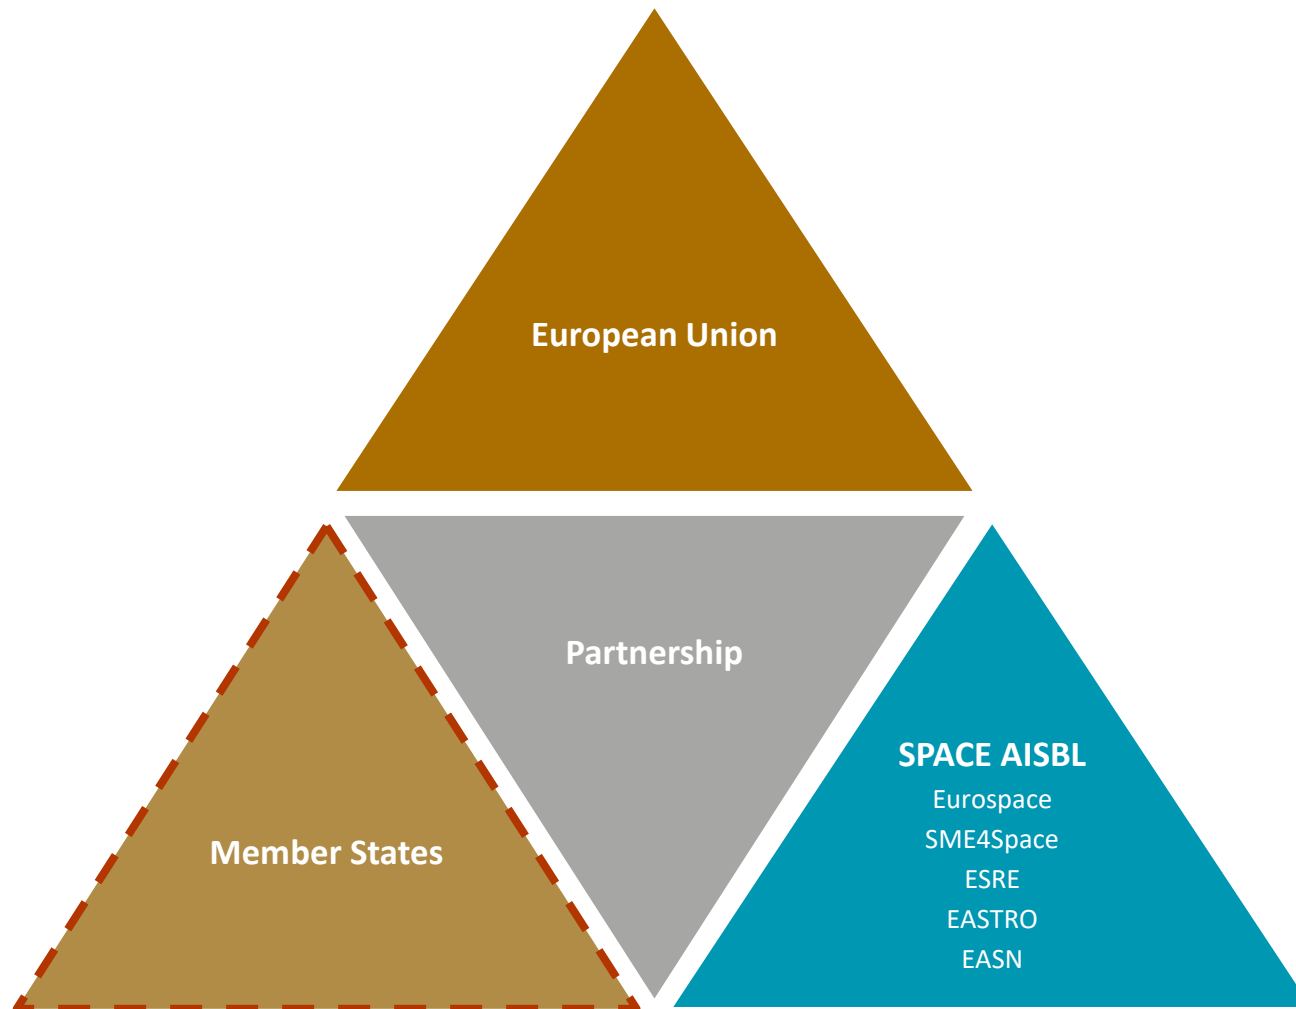

Jean-Charles Treuet, SPACE AISBL President

Project key outcomes

- Horizon Europe Work Programme
 - Support the development of competitiveness driven R&I topics for
 - Commercial SatCom and Earth Observation
 - New Space Transportation Solutions
- SRIA
 - Contribute to EU's R&I strategy for space
 - Monitor and update the SRIA for the partnership
 - Investigate areas of enlargement
- Additional activities and leverage
 - Create leverage on EU investment in R&I via the partnership with complementary R&I funded by partners
 - Leverage factor x1,2 – a strong commitment of SPACE AISBL members

Partnership - Governance scheme

SPACE AISBL

Prepares the inputs towards the EU for the Partnership calls implementation

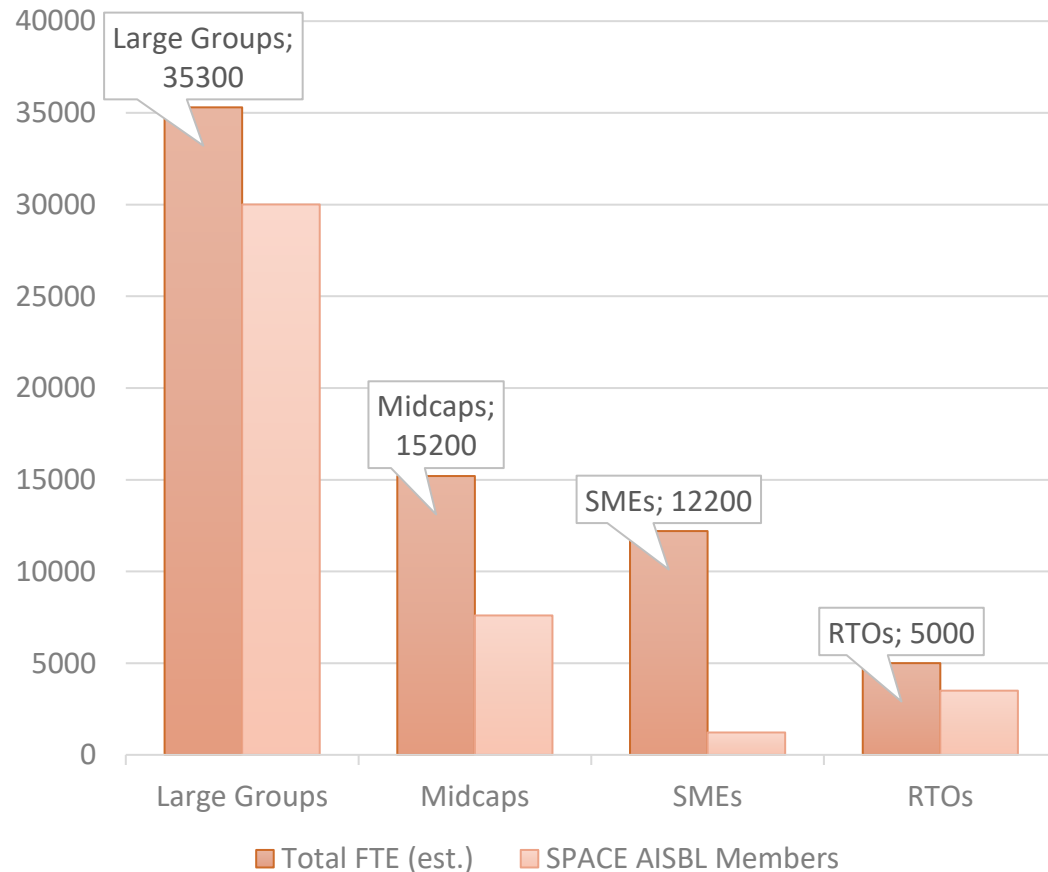

Member States

Provide feedback and recommendations to improve the calls inputs

European Union

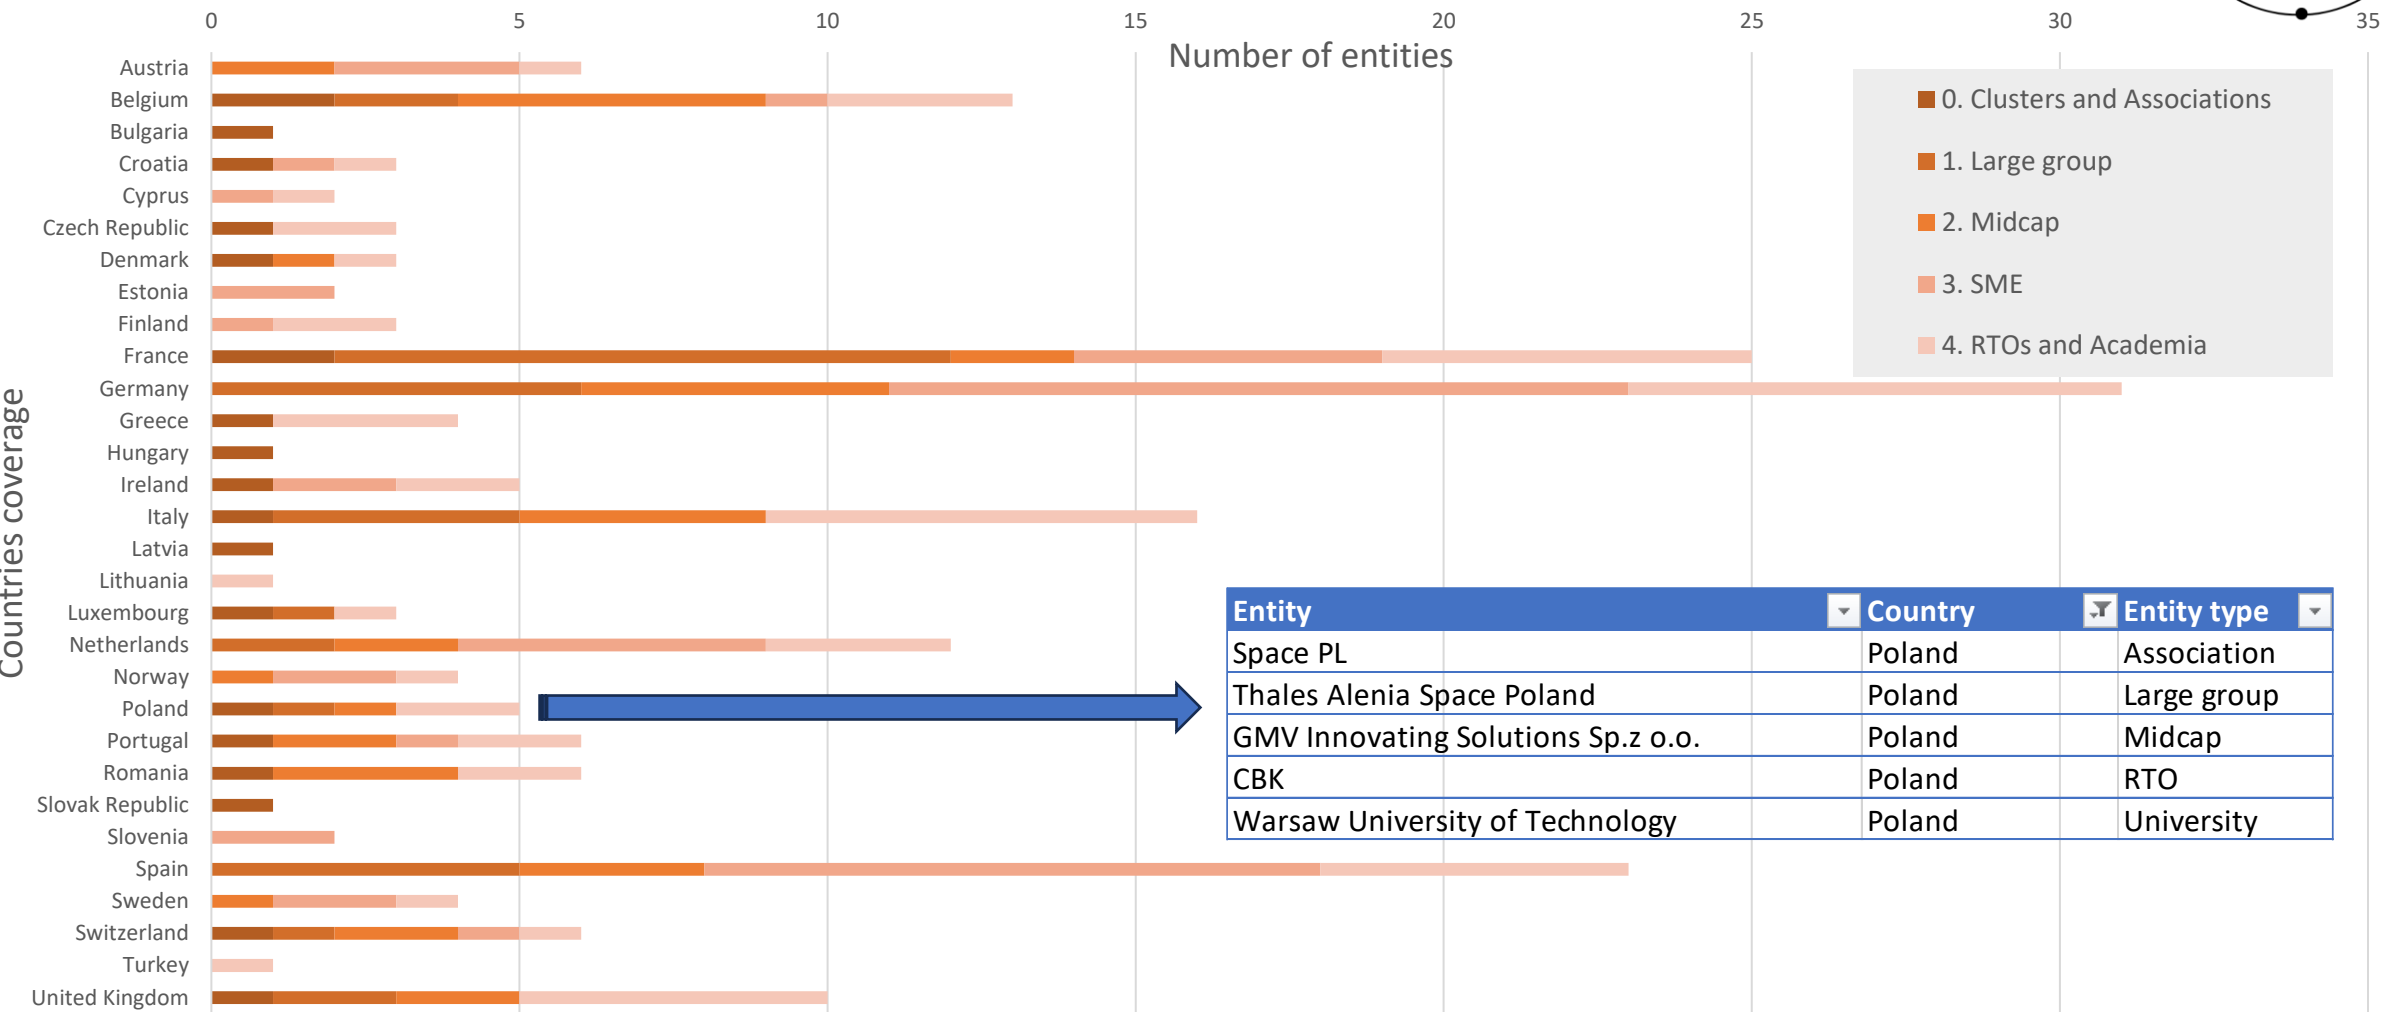

Ensures the consistency and implements the calls in the Workprogrammes once validated

The space systems RD&I supply chain – key figures

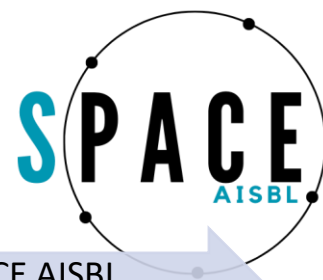

- The Space systems RD&I supply chain represents an estimate 67700 FTEs in Europe
 - Sources: [Eurospace facts & figures](#)
- SPACE AISBL Founding Members already represent >60% of the supply chain
 - Note that SME members only account for individual company members of SME4Space and Eurospace.
 - Many more SMEs are within reach through the SME4Space Working Members (aerospace clusters and regional associations e.g.)

Founding Associations members' overview

Current status and next steps
