

SFC Tools:

The sustainable alternative to sticky notes

Have you ever taken part in a co-design session with dozens of sticky notes that end up in the bin at the end of the workshop?

SFC Tools is a reusable methodological kit that allows you to run countless co-design sessions, reusing the materials and without the need for worksheets.

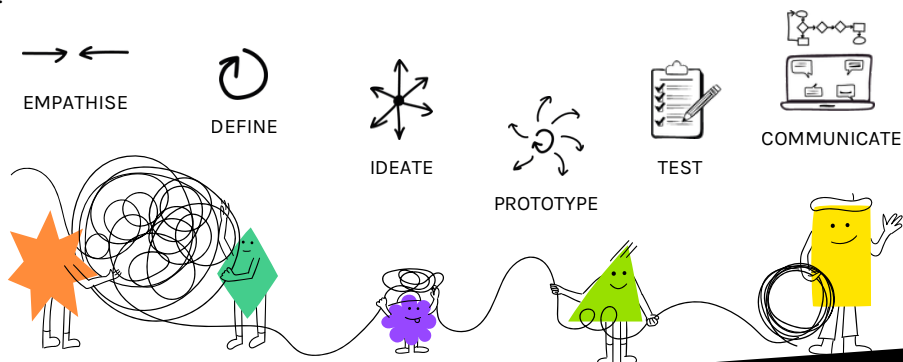

The reusable hexagons replace sticky notes and function as **small whiteboards** in **8 colours**: purple, blue, green, lime, yellow, orange, pink and red. If you choose more than one colour, you can **categorise ideas**, create **hierarchies** and structure **conclusions** in real time.

What's more, the hexagons are **inclusive** and **accessible** to people who have difficulty distinguishing colours! Thanks to the visual patterns printed on their edges, everyone will be able to identify the different types of hexagons and enjoy the full SFC Tools experience.

With SFC Tools, you can organise, run and facilitate your collaborative workshops, reduce the use of physical materials and, most importantly, minimise your environmental impact.

What are you waiting for to find out?

Please contact us to choose the **SFC Tools** package that best suits your needs.

What is included in SFC Tools?

Each pack contains everything you need to meet the requirements of any co-design session.

Inside each kit you will find:

- **320 hexagons:** 40 units of each colour, 8 colours in total (purple, blue, green, lime, yellow, orange, pink and red). Each hexagon is a small whiteboard where you can write and erase as many times as needed. Don't be afraid of the blank canvas!
- **8 small cotton bags,** to organise the hexagons by colour.
- **1 large cotton bag,** with handles and a closure, so you can carry your hexagons everywhere comfortably.
- **10 special markers** for writing inside the hexagons.
- **1 optional pack of detailed step-by-step methods,** with QR codes that take you to video tutorials so you can make the most of your kit from day one.

SFC Tools: Everything you need to run collaborative workshops

Collaboration is on the rise, and SFC Tools kits enable you to organise and facilitate co-design workshops in different contexts: research, public policy, innovation, education and business. All materials are reusable, reducing the use of consumable materials and helping us move towards sustainability.

We have **more than 70 SFC Tools methods associated with each stage of the co-creation process**, offering multiple possibilities for application in different fields.

What is included in SFC Tools?

Each pack contains everything you need to meet the requirements of any *co-design* session.

Inside each kit you will find:

- **320 hexagons:** 40 of each colour, across 8 colours (purple, blue, green, lime, yellow, orange, pink and red). Each hexagon is a small whiteboard that you can write on and erase as many times as you like. Don't be afraid of the blank canvas!
- **8 small cotton bags,** for organising the hexagons by colour.
- **1 large cotton bag,** with handles and a zip, so you can carry your hexagons around with you comfortably.
- **10 special markers** for writing inside the hexagons.
- 1 leaflet explaining how the SFC Tools system works.
- **1 optional pack of detailed step-by-step methods,** with QR codes that take you to video tutorials so you can make the most of your kit from day one.

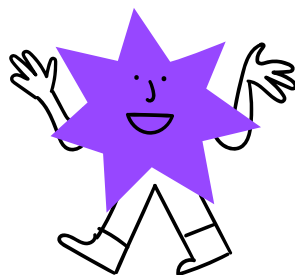

Request information about our co-design methods to accompany your kit and say goodbye to hundreds of sticky notes for good!

SFC Tools:

Everything you need to run collaborative workshops

Collaboration is on the rise, and the SFC Tools kits enable you to organise and facilitate co-design workshops in a range of contexts: research, public policy, innovation, education and business. All materials are reusable, so they significantly reduce the use of consumable materials in workshops. A major step towards sustainability!

We have over **70 SFC Tools methods associated with each stage of the co-creation process**, offering endless possibilities and fields of application.

We co-design solutions tailored to
your needs

How can we help you?

- **We help co-design** strategic plans, research projects, products, services and, ultimately, innovate, focusing on finding the best solution to a challenge from a practical perspective.
- **Facilitate** collaborative processes, designed by us or already designed by you. We recruit the necessary participants, organise the session and facilitate it to get the most out of it.
- **We provide training** in *design thinking* and collaborative dynamics so that you can design, organise and facilitate co-design sessions yourself. We provide the necessary tools and knowledge so that you can work independently.
- **SFC Tools**, the co-design methodological toolkit for carrying out co-creation sessions in different fields.

Ask for more information about our training plans and services to take that first step towards change.
