Innovative Solutions in  
Biomedical Engineering

---

# Who are we?

GAS LATAM was formed more than 28 year ago by a group of people passionate about biomedical engineering and metrology, with a vision and focus on protecting lives through quality assurance and developing innovative and efficient solutions for healthcare challenges.

## What motivates us

In collaboration with biomedical engineers and health-care professional and the appropriate use of reliable medical technology provide patients with quality and accurate diagnosis and treatments schemes.

## Human Vision (H2H)

Traditional healthcare models and the evolution of medical technologies have distanced themselves from the main focus and purpose; to provide quality of life and effective patient care.

Nowadays it is necessary to change these models to a more collaborative and disruptive schemes. Where technology, medical professionals, biomedical engineers and health institutions develop processes focused on prevention and quality of life. That is why we commit our efforts to collaborate and promote this Human to Human (H2H) initiative.

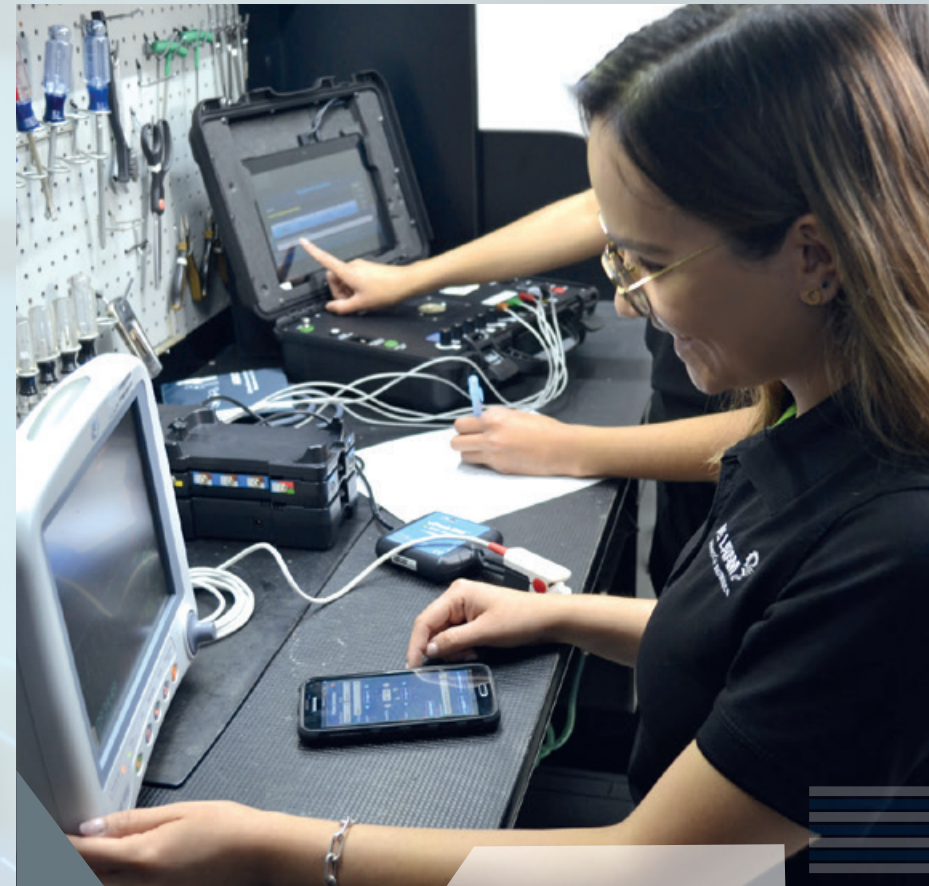

## Experience

Our staff members bring their knowledge, skills and abilities as key part of our value proposal. We have been trained and certified by different medical equipment manufacturers (OEM'S), biomedical testing devices manufacturers (BTD) and several educational institutions specialized on topics such as project management, quality systems (QMS), safety regulations and standards related to the health industry.

## Infrastructure

With main offices in the United States and our service and support center in Mexico , from where we can perform care, management, maintenance support, calibration, certification of medical equipment and metrology. With highly specialized equipment as well as updated metrology instrumentation, tools and information technologies; which allow us to support and guarantee the support of our portfolio of products and services throughout Latin America.

## Our Commitment

Develop and live a culture of quality in everything we do, focusing on providing the attention and response required by our clients in accordance with applicable regulations, standards and policies.

## Portfolio P&S

The management and operation model of healthcare has evolved and is currently a multidisciplinary scheme. Therefore, biomedical engineering and metrology have taken on a very important role in public and private health institutions, as well as in development and technical support companies. Motivating us to make strategic alliances with world-class companies that share our vision, commitment to quality and customer service.

These alliances go beyond the exchange of goods and services, they are focused on combining knowledge, business models, philosophies and efforts in order to provide our customers with a unique experience.

This is how our two main business units have been created, which together make up our portfolio of products and services.

### STRATEGIC PARTNERS

**IMT.Analytics**

### PRODUCTS AND SERVICES PORTFOLIO

- Biomedical Metrology Equipment.
- Biomedical Training 360.
- Calibration of metrology equipment.
- Service and support of Health Technologies (Anesthesia Vaporizers).

## CALIBRATION AND CERTIFICATION OF ANESTHESIA VAPORIZERS

"Confidence through quality"

### Importance

Surgical processes under general anesthesia depend on many critical factors. The concentrations administered by the vaporizer are extremely important in a surgical procedure. The anesthesiologist must be able to develop their clinical strategy throughout the process safely and without complications.

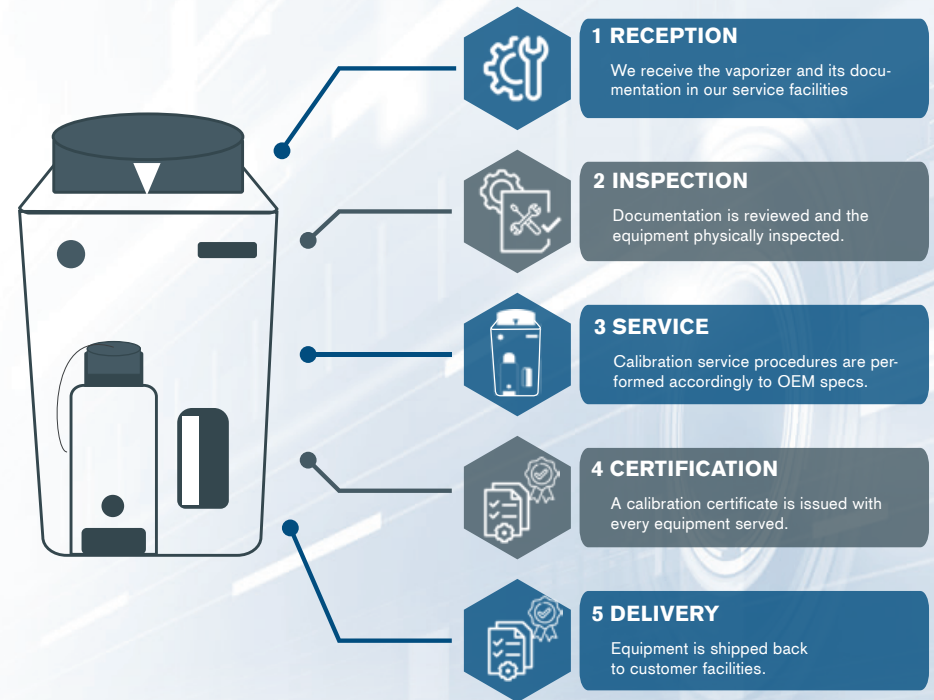

### Quality

Our calibration and service process has become a standard for the industry and healthcare sector, accepted in Latin America and around the world.

The development of specific processes and protocols for each service, the use of state-of-the-art technology, compliance and alignment to international regulations / quality standards, are guarantee of the quality level of our services.

- ISO-14971 MD Risk Management
- ISO-13485 MD Quality Management
- ISO - 17025 Testing and Calibration

### Calibration process

WE SERVICE ALL MAJOR BRANDS

# medical it

## BIOMEDICAL TEST EQUIPMENT

"Protecting lives through quality assurance"

■ Biomedical Metrology Equipment

■ Biomedical Training 360

■ Biomedical Instrumentation Calibration

Infusion Pump Analyzers

Defibrillator Analyzers

Analyzers for Electrical Safety Testing

Simulators and Analyzers for Mechanical Ventilation

Simulators for Hemodynamic Monitoring

Electrosurgery Unit Analyzer (UEC)

Neonatal/Maternal/Maternal-Fetal Analyzers and Simulators

Analyzers for Endoscopy Systems

MASTER DISTRIBUTOR IN LATIN AMERICA

IMT.Analytics

PRONK TECHNOLOGIES

GAS LATAM | HUB

## Presence

Our commercial and technical support coverage expands through all Latin America, starting in Mexico and culminating in Argentina. Where directly and/or through our strategic partners we provide immediate attention to the requirements of specialized products and services.

“**Quality** is never an accident, it's always the result of a **collective effort**”.
