## Overview

Damage and **accidents happen**, but documenting them doesn't have to be **chaotic**.

**Crashwise** is a **digital guide** that walks drivers through the damage/accident report process in a simple, structured, and stress-free way.

Photos, information about the drivers and vehicles involved, details about the accident—everything is digitally recorded **in just a few minutes** and can be immediately transferred to fleet managers, leasing companies, insurance companies, or repair shops.

- Step-by-step instructions
- Complete documentation
- Immediate damage report to partners
- Relief for drivers and fleet managers
- Can be integrated into existing tools and apps
- Replaces the EU accident report in paper form
- Enables quick response, evaluation, and analysis
- GDPR compliant
- Applicable to **ALL languages** – we automatically overcome language barriers

### The app – Core

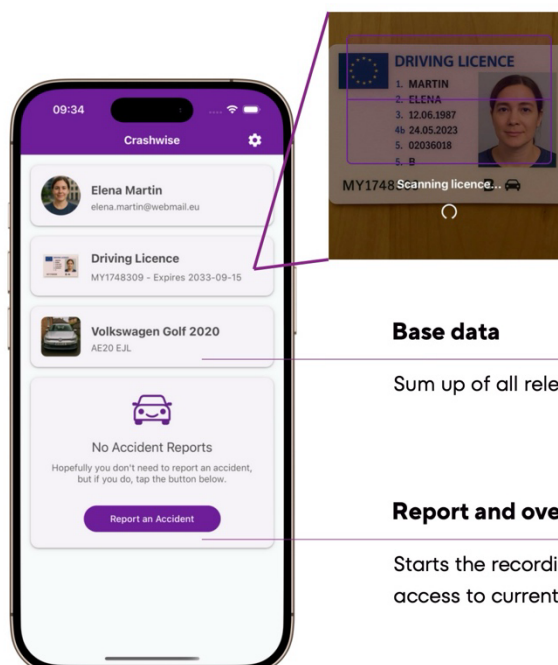

## Base data

#### Gathered data

- Personal data
- Vehicle data
- Legal information such as drivers license, insurance number and number plate

#### Used tools

- Automatic data detection from photos (such as drivers license and insurance sheets)
- Connection to API to pull data such as vehicle information (if an API is available)

#### Base data

Sum up of all relevant base information.

#### Report and overview

Starts the recording process and gives access to current cases

#### Tip:

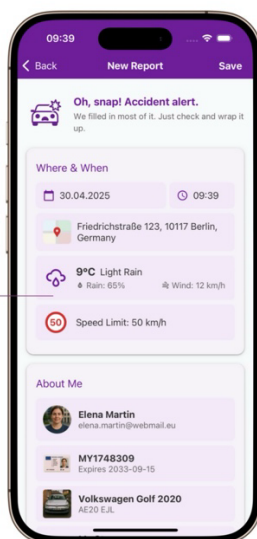

- Transfer the **vehicle data directly from your database**.

## The app – Core

### Accident recording Meta data

#### Meta data information

Location, date, time, weather and other information

#### Gathered data

- Date and time
- Location
- Weather
- Speed limit
- Traffic anomalies such as construction sites

#### Used tools

- API connections to providers such as weather apps or google maps
- Usage of phone data (for example GPS sensor)

#### Tip:

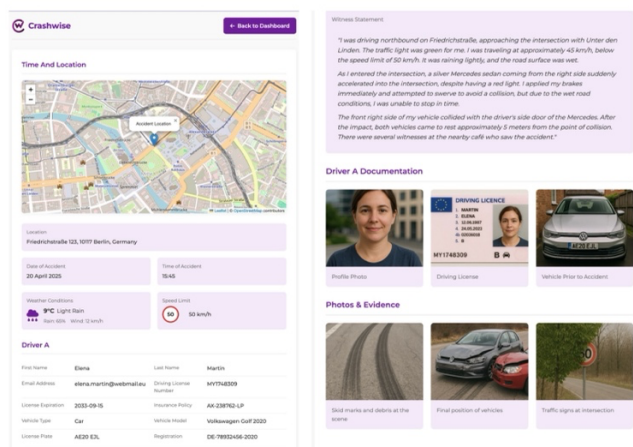

- Experience how **simple and intuitive** it is to use
- **AI verification** of photo quality
- Let witnesses have their say, create **voice and video recordings**
- Receive a **complete report in PDF** format that
- everyone involved can easily **sign digitally** on site
- Forward the complete report to fleet managers in real time

## The dashboard – Core

### The main dashboard The report

It's all about the bigger picture

- Directly read the structured accident report
- Get an instant overview
- Request more data if necessary

#### Tip:

- View accident reports and **damage reports in real time**
- Create **analyses and evaluations**
- Use additional functions directly in crashwise:
  - Routing to partner repair shops
  - Damage reports to insurance companies
  - Learn from accidents and **make your fleet safer**

## Our expertise:

We combine

- 10 years of accident research
- 15 years of software development
- 20 years of insurance expertise

Our mission: Simplify processes, increase safety.

Are you interested in a pilot project or test?

We look forward to hearing from you!
