

PaveCor™

COMPANY PROFILE

Core of Every Infrastructure Works

Company Overview

PaveCor™ is a Turkey-based global supplier of geosynthetics, infrastructure chemicals, and civil engineering solutions, serving public works, transportation, and industrial construction projects worldwide. Operating from our Tuzla and Yalova logistics hubs, we combine reliable local production and sourcing with an extensive international trade network spanning 20+ countries across MENA, Central Asia, the Balkans, Europe, and Sub-Saharan Africa.

PaveCor™ headquartered at the TEKMER Tuzla Technology Development Center, Istanbul. As part of a multi-brand industrial platform with over 30 years of combined international trade experience, PaveCor™ delivers certified, sustainable, and technically robust products with a strong emphasis on on-time delivery and competitive pricing.

Business Units

Our activities are structured across six core business units, offering an integrated portfolio for infrastructure and civil works projects:

Geosynthetics	Geotextiles, geogrids, geomembranes, and related materials for soil reinforcement, drainage, filtration, and erosion control.
MSE Walls	Mechanically Stabilized Earth wall systems and reinforced soil solutions for retaining structures and embankments.
Bitumen & Asphalt Additives	Performance-enhancing additives, modifiers, and solutions for asphalt paving and road-surface durability.
Cement & Concrete Additives	Admixtures and additive systems that improve workability, strength, and durability of concrete and cement-based products.
Mining Solutions	Materials and technical solutions supporting mining infrastructure and ground-support applications.
Underground & Tunnel Works	Products and systems for tunnel lining, underground construction, and subsurface infrastructure projects.

Why Partner with PaveCor™

- Immediate supply availability from our Tuzla & Yalova warehouse hubs
- Certified, sustainable products aligned with international infrastructure standards
- A powerful and far-reaching global trade network built over 30+ years
- Competitive, on-time delivery for both ongoing and future project requirements
- Single-entity reliability backed by AzimuthLink's multi-brand industrial platform

Global Reach

With active commercial relationships across 20+ countries, PaveCor™ supports contractors, EPC firms, distributors, and public agencies undertaking road, bridge, airport, and industrial-flooring projects. Our team works directly with project owners and procurement teams to match technical specifications with the right product solutions, backed by responsive, round-the-clock communication.
