ELECTRONICS

MISSION STATEMEN

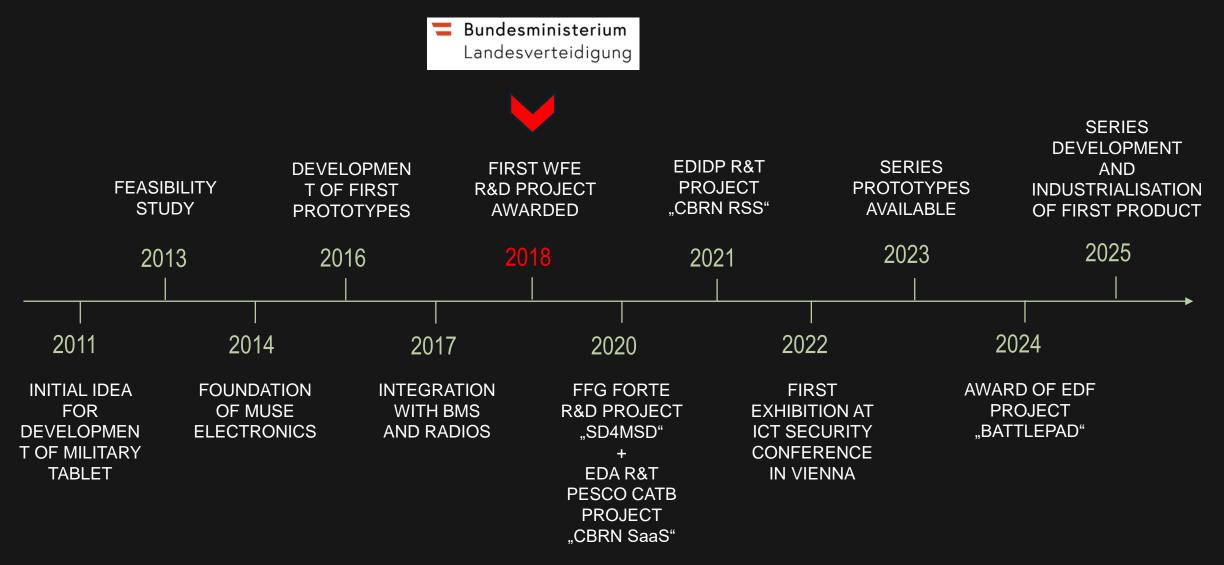

In order to achieve *true system security*, computer hardware must be cyber-secure, software will not do the job.

Europe will need to re-establish an innovative and competitive *computer hardware industry*, in order to become independent of competing powers

BACKBONE stands for a paradigm shift, offering true cyber-security, at the hardware layer.

BACKBONE COMPANY MILESTONES

BACKBONER&D MILESTONES

"SD4MSD – Single Device for Multiple Security Domains" overall concept at physical, hardware and software level for highly robust EUDs with individual configurability for specific (military) purposes and security domains

= basis for development actions within BATTLEPAD
