Headquartered in Munich, supervised
by BaFin and Deutsche Bundesbank.

Receivables Suite

CRX Select

Sell selected receivables to financing partners at attractive rates. You choose which debtors to include and which receivables to sell. Banks assess risk at individual debtor level, so pricing reflects actual credit quality rather than a blended portfolio rate.

Payables Suite

CRX Extend Supply Chain Finance

Extend payment terms while giving suppliers access to early payment at competitive rates through banks on the marketplace. A collaborative approach that strengthens your cash position and your supply chain at the same time.

CRX Pay

Keep your cash for up to 60 additional days while invoices are settled on time. With no supplier involvement needed, this flexible, multi-bank solution allows you to improve your operational cash flow from day one.

CRX Discount Dynamic Discounting

Fund the early payment of your suppliers from your own excess liquidity in exchange for a discount, earning an attractive and risk-free return. Every discount reduces your effective cost of goods sold and improves your profit margin.

Our Principles

► One Infrastructure

Working capital finance should not be fragmented. You should be able to finance every invoice across payables and receivables on one integrated infrastructure.

► Flexible Financing Structures

No two treasury teams are alike, so every financing program is tailored to your requirements. You choose partners, define program parameters, and stay in control.

► Global Connectivity

Broad market access is where the best opportunities come from. A global network of 50+ banks and investors creates liquidity, competitive pricing, and efficient execution across markets.
