

FLEXIBLE AUTOMATION WITH ROBOTEND

BENEFITS

Robotend is easy for integration and can be quickly deployed

It ensures optimal positioning for efficient and accurate processing

RoboTend is maximizing machine output ensuring rapid ROI

Optimize your production processes, and enhance overall efficiency

Count on RoboTend for consistent and reliable material handling

RoboTend is adaptable to various industries

OVERVIEW

RoboTend is a specialized robot feeder, developed by Automatix as a response to the market needs and demand for automation, efficiency and reliability. We are led by our experience in industrial and collaborative robots integration and constant willingness and to improve.

FEATURES & SPECIFICATIONS

- Dimensions – 1000/1420/830 (H/W/L) mm
- Integrated compartment for controller box and external PLC
- The tray is 600mm wide. 2 to 10 trays are available. Handles workpieces up to 160 mm in height and load up to 100 kg
- Quick change over time makes RoboTend suitable for small and medium production series
- RoboTend is universal for all types of robots
