IT OUTSOURCING FROM
INTEGRITY VISION

WHAT IS IT OUTSOURCING AND ITS TYPES?

IT outsourcing is a strategic approach that allows companies to transfer certain IT functions to external suppliers, thereby increasing efficiency and reducing costs. The following are the main types of outsourcing:

- Staff outsourcing
- IT consulting
- DevOps outsourcing
- IT infrastructure support
- Remote IT Services
- Cybersecurity outsourcing
- Managed IT Services

THE MAIN ADVANTAGES OF IT OUTSOURCING FOR BUSINESS:

- Reducing costs
- Scalability
- Access to innovations
- Flexibility in project implementation

As a result, IT outsourcing is an important tool for businesses to reduce costs, optimise workflows, gain access to advanced technologies and ensure flexibility in project delivery

Integrity Vision offers IT outsourcing services that take into account the diverse needs of the business. Our experts work in the following areas:

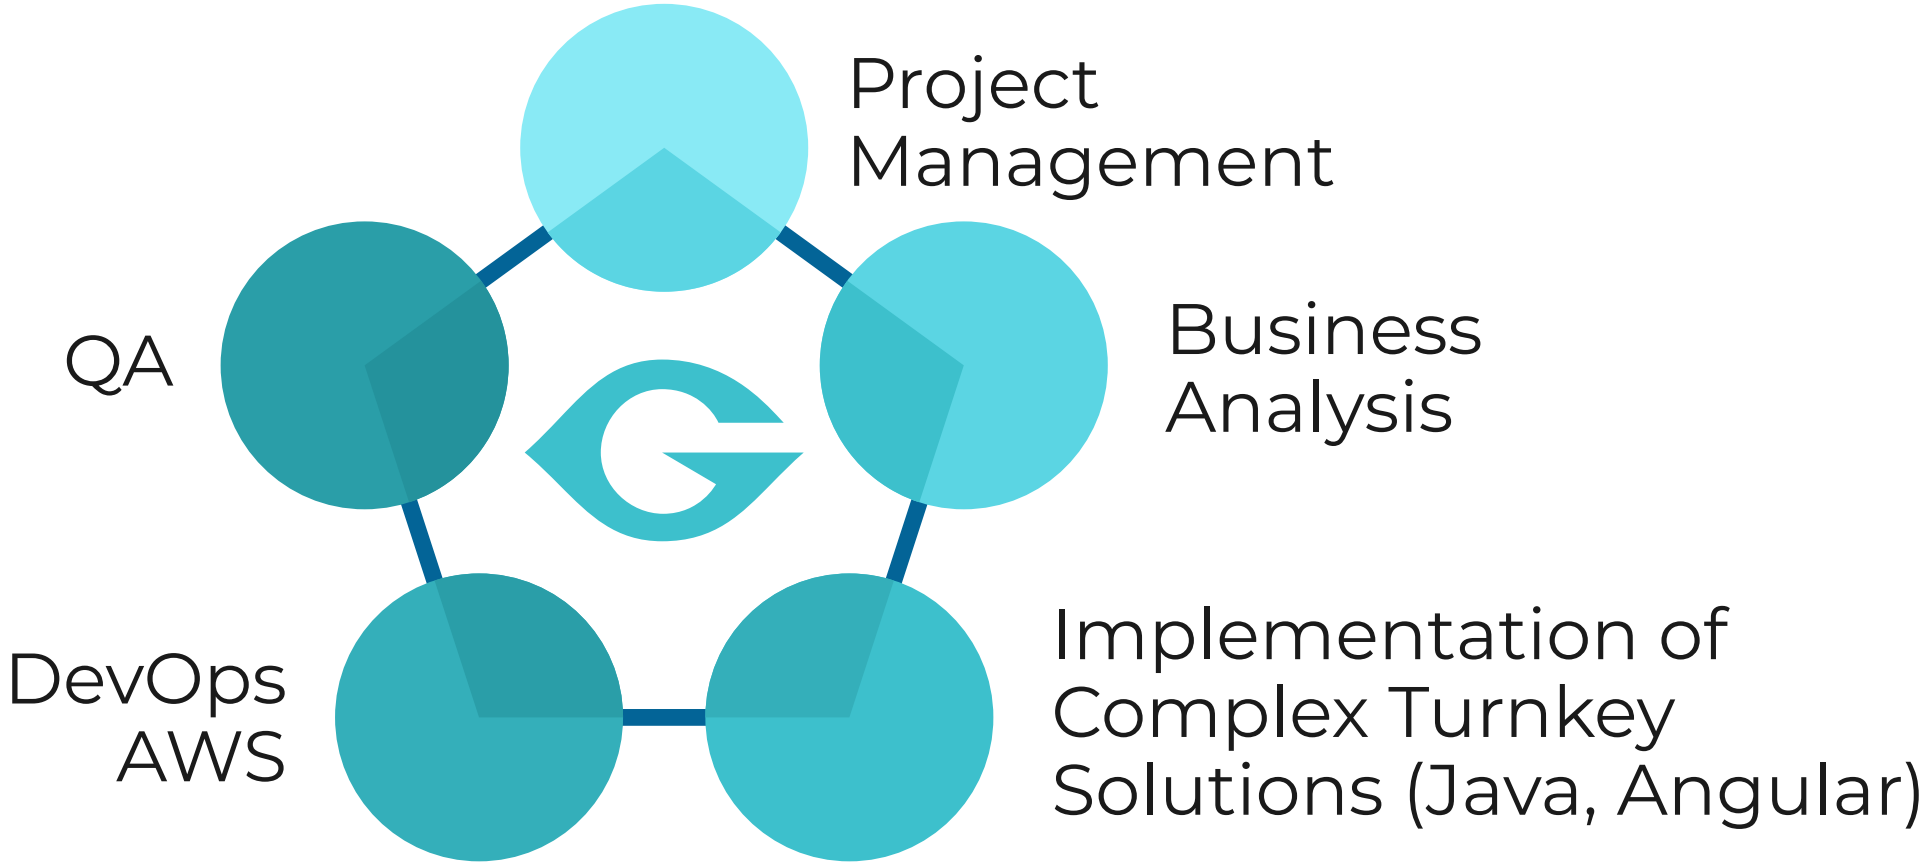
BUSINESS ANALYSIS

We conduct in-depth analysis of existing business processes to identify opportunities for improvement. Our team develops new efficient processes and produces detailed documentation, including technical designs and functional requirements.

ARCHITECTURE DESIGN

Our team analyses and optimises IT architecture to improve business performance and scalability. We develop a strategic roadmap for the transition to the target architecture, taking into account business objectives.

OUR EXPERTISE:



PROGRAMMING LANGUAGES/TECHNOLOGIES:

- Java Core, Java SE, Java EE, Spring technology stack, Angular
- Oracle, MySQL, DB2, PostgreSQL, MongoDB
- Docker, Kubernetes, AWS
- Camunda, IBM Integration Bus
