

***Manufacturers and Exporters of Garments  
Since 2003***

## **VISION**

To lead the sustainable textile manufacturing industry by fostering commitment, ensuring quality, driving innovation, and cultivating relationships based on trust.

## **MISSION**

- Provide unmatched garment manufacturing services.
- Surpass customer requirements and expectations.
- Prioritize customer care and support.
- Cultivate excellent communication for clear customer understanding.
- Invest in employee development.
- Embrace technological advancements.
- Commit to sustainable and ethical manufacturing.

# About Us

- Garment Resources was established as a buying agency in 2003.
- In 2008, the company expanded by setting up its own manufacturing facility with only two stitching machines.
- Now, Garment Resources has the capacity to manufacture over 50000 pieces of garments a month.
- We manufacture all kinds of woven garments in-house and have partnered with a factory to offer knitwear to our clients as well.
- The exports are to various fashion, workwear, and promotional companies worldwide.
- Our commitment to manufacturing quality garments is ensured through employing skilled workforce, partnering with certified suppliers and using technologically advanced machinery to give us maximum output and precision in our production processes.

# WHY US

- In-depth understanding of the evolving clothing and textile market.
- Personalized customer service that sets the standard.
- High-quality garments tailored to customer size requirements.
- Competitive manufacturing costs.
- Low minimum order quantities (MOQs) to accommodate diverse clients.
- Responsiveness to customer demands.
- Compliance with international manufacturing standards.
- Strict zero tolerance policy towards child labor.

■ Fashion ■ Workwear

An aerial photograph of a large solar farm. The rows of solar panels stretch across the landscape towards a horizon where the sun is setting, creating a warm, orange and yellow glow in the sky. The panels are arranged in a grid pattern, and the perspective is from a high angle, looking down on the rows.

**70% of our energy requirements are met through  
renewable energy sources, with plans to take this up to  
95% by the middle of 2025**
