

Who we are

IMPACT-AML unites clinicians, researchers, patient organisations and industry to improve real-world care for patients with relapsed or refractory AML.

What we are working on

We connect registries, clinical data, biobanking and MRD analysis with a pragmatic trial comparing rescue therapies through the STREAM platform a master framework for patient data collection, developed within the project.

What's the one thing we need next

We need more centres, patients and wider STREAM adoption to generate robust evidence and improve equitable treatment strategies for relapsed or refractory AML.
