

Life-saving diagnostics

A world where thrombosis is predictable and preventable

Not final design, for illustration only

Thrombosis: 1 in 4 death
the major cause of death+debilitation
more lethal than cancer

80% of all thrombosis are preventable

Competitor analysis

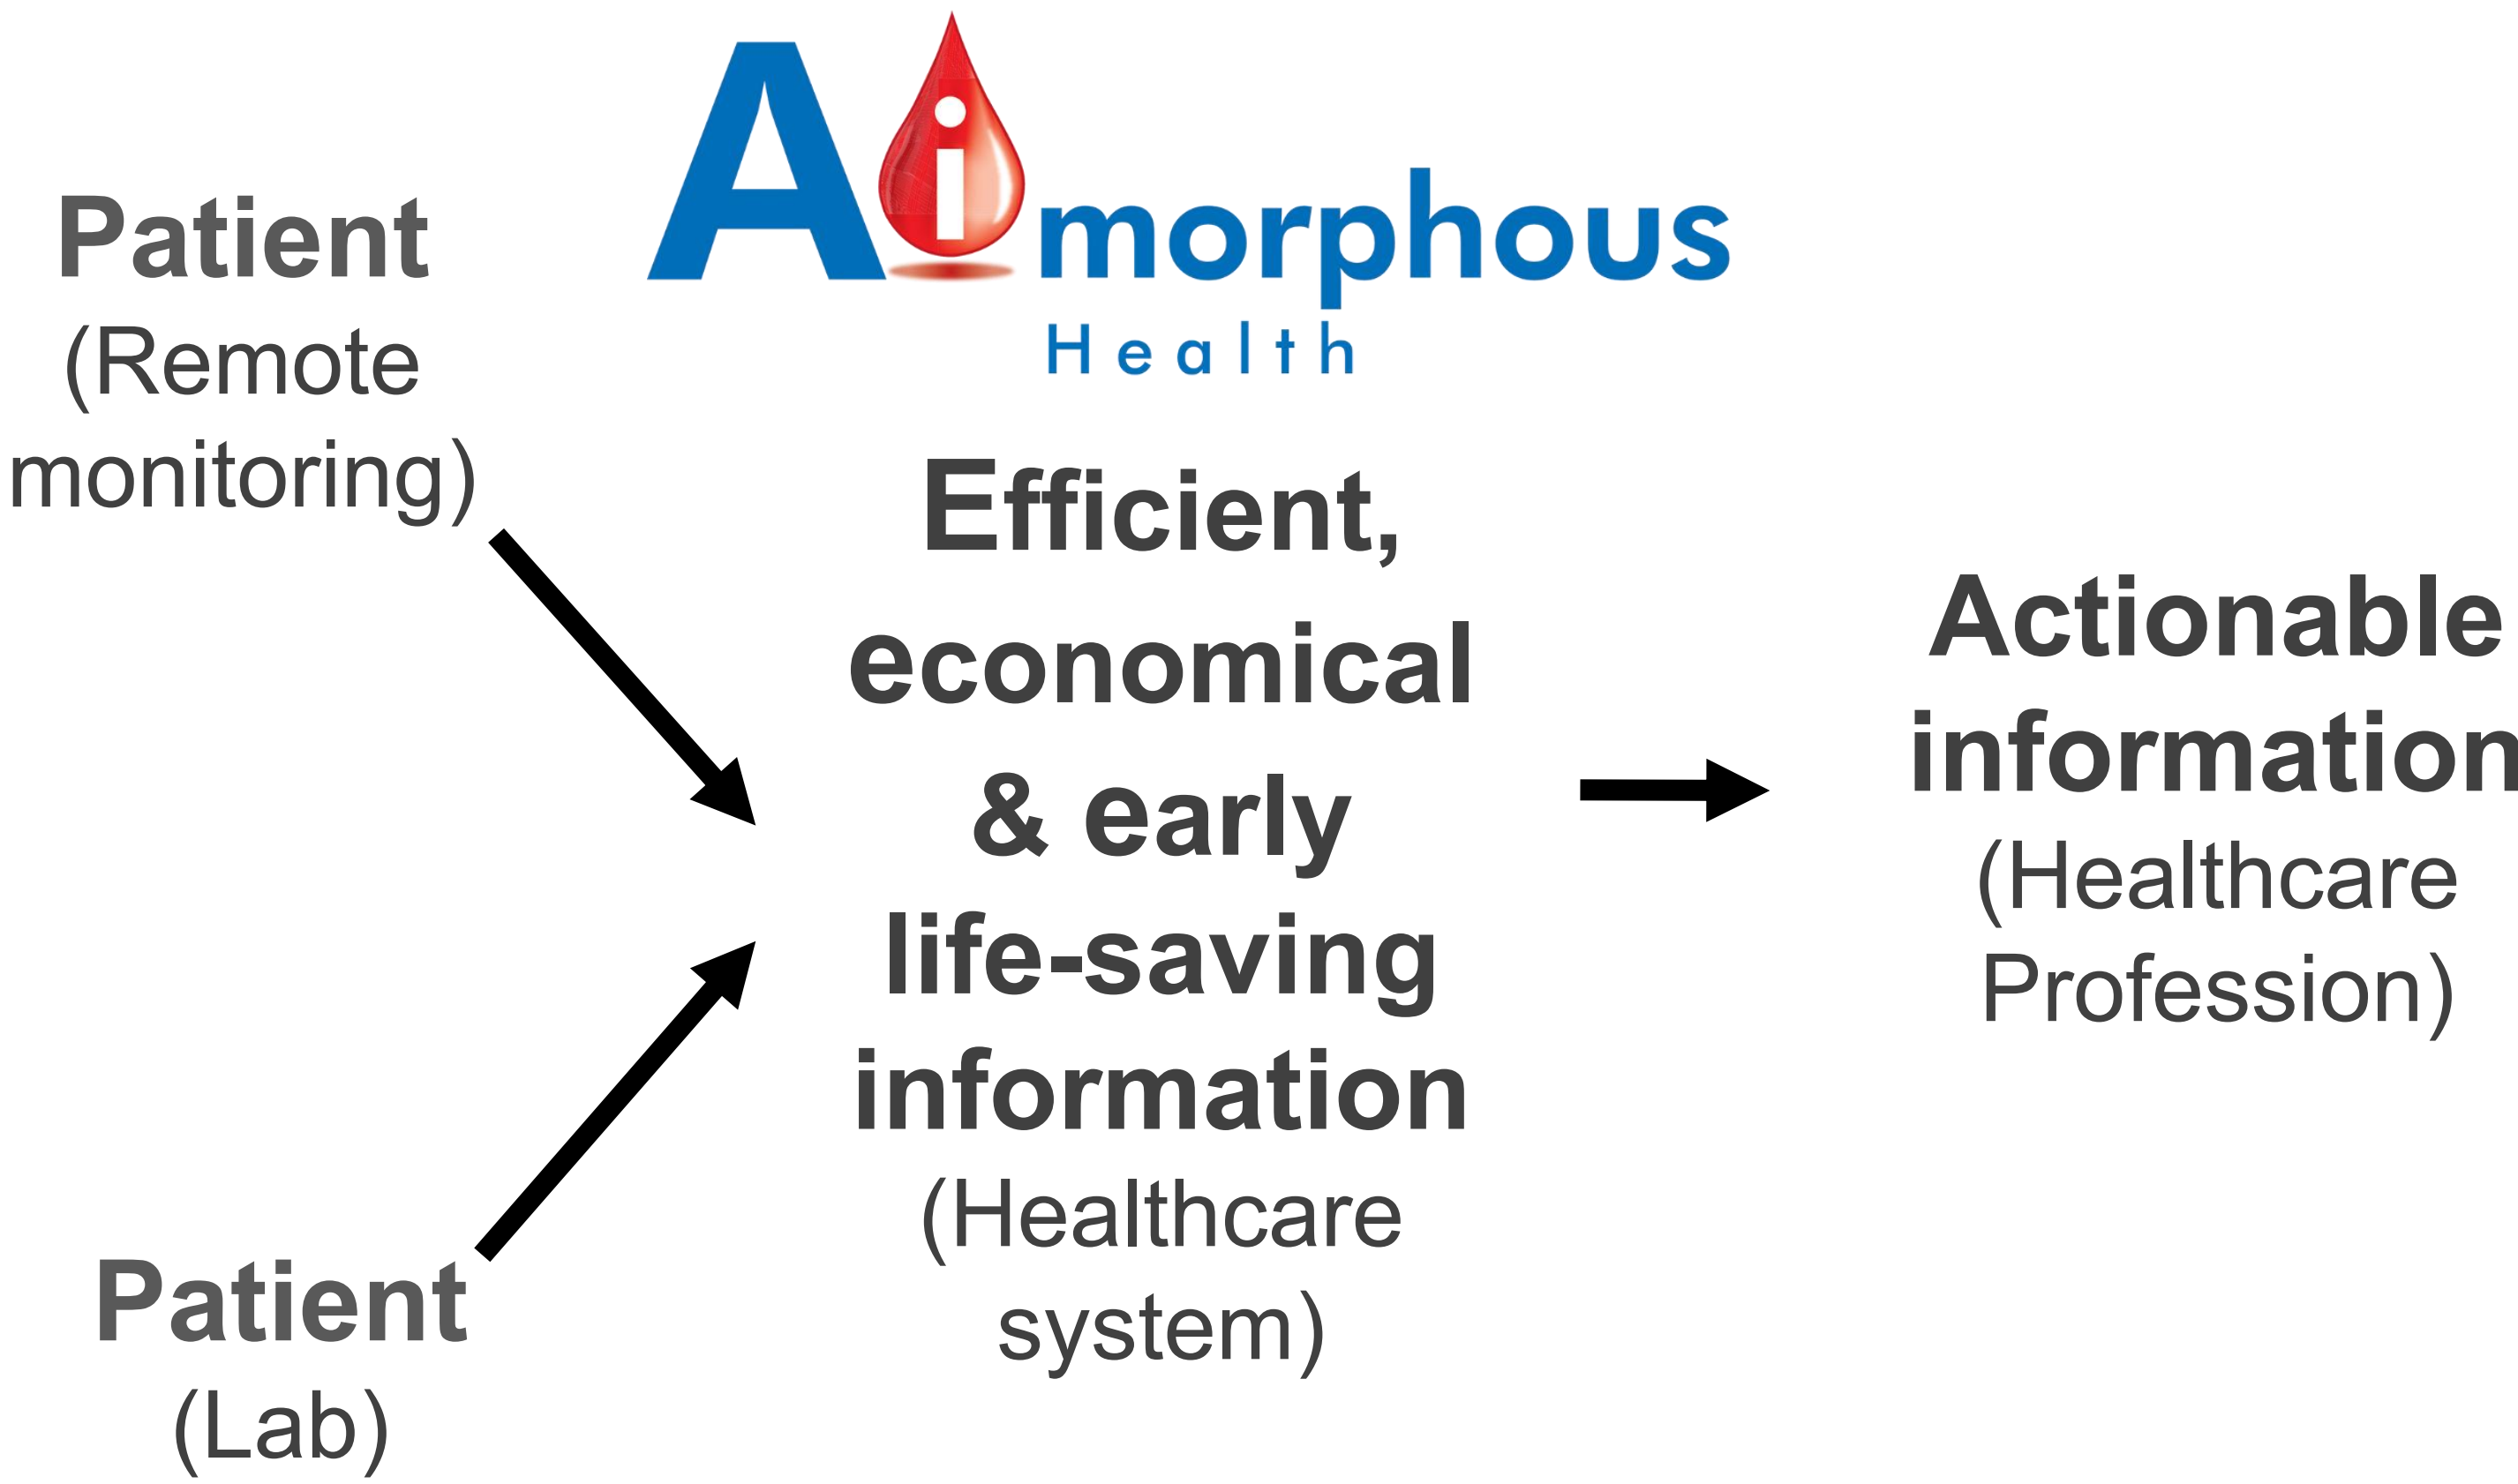

Value Proposition	Blood Test	Blood Tests PT, aPTT, fib, FDPs, TG, TEM/TEG, D-dimer	Imaging techniques	Hemodynamics
to prevent thrombosis & bleeding			Ultra-sound + MRI / CT + Venography	e.g. Sramek BioDynamics, TEB, etc
Fast test with blood, results in 5-10 minutes				
Location of the clot				
Life saving early biomarker + Powerful & automated predictive model	IP			
Personalized risk management for precision treatment	IP			
Lower costs/expenditure reduce hospitalization				
Portable device and App for home use & remote monitoring				

= no = mix = yes

Current standard of care
