

Renamie

AI-Powered Document Processing

Automating PDF organization for document-heavy businesses

The screenshot shows the Renamie website homepage. At the top left is the Renamie logo with the tagline "Bulk rename smarter, not harder". The navigation menu includes "How it works", "Pricing", "FAQ's", "Testimonials", and "Contact". On the right, there are "Sign In" and "Signup" buttons. A blue banner reads "BULK RENAMING PDF FILES IS NOW EASY". The main headline says "Say Goodbye to Manual Sorting Let ai Rename Your Invoices Instantly". Below this, a sub-headline states "Upload Hundreds of PDFs. We extract invoice numbers, names, dates or whatever you need and rename each file instantly using AI." A primary call-to-action button says "Rename your pdf's" and a secondary button says "Buy Now". A section titled "No more opening files one by one" explains that Renamie uses AI to scan PDF contents and rename them based on user-defined criteria like invoice numbers, client names, PO references, or delivery dates. At the bottom, a blue box contains the text "Built for teams buried in PDF's. Rename PDFs. Automatically. Organize Instantly" next to a preview of an invoice document with the number "234-1245124-2".

The Problem

Document management challenges

Time-Consuming

Hours spent manually renaming documents

Inconsistent Naming

Lack of standardization creates chaos

Poor Scalability

Manual processes can't keep up

80% of time

wasted on manual tasks

The Solution

Full-stack SaaS automation platform

AI-Powered

OpenAI extracts content automatically

Lightning Fast

Process hundreds in minutes

Secure

Encrypted with auto-cleanup

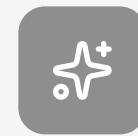

From hours to minutes
with intelligent automation

Key Features

Everything you need

Bulk Upload

AI Extraction

Preview System

Easy Download

Save Templates

Secure Auth

Built for maximum efficiency

How It Works

Simple 4-step process

01

Upload PDFs

Drag & drop files

02

AI Processing

Extract content

03

Smart Rename

Intelligent naming

04

Download

Get organized files

5 minutes

for 100 documents

Tech Stack

Modern enterprise technologies

Frontend

React, Next.js

Backend

Node.js, Express

Database

Supabase

AI

OpenAI GPT-4

Hosting

Vercel, AWS

Security

SSL, Encryption

Scalable • Secure • Fast
