About Us

Founded in 2012, ESYEN is an engineering company offering services to the **space ecosystem**, with a major focus on **system integration** and **deployment, testing, maintenance** and **security**

ESYEN is actively involved in the **GALILEO** GNSS program, with a presence in the **Galileo Control Centres** in Italy and Germany and in the **Galileo Security Facilities** in France and Spain, playing a key role in the **operations** of the **ground segment chain**.

ESYEN Staff is made by **50 Employees**, spread across 4 operational sites in Europe

Our Services

Integration, Testing,
Verification and Validation

Ground Segment
Operations

Security Monitoring and
cyber security

Maintenance across
all platforms

Thanks to the skills of our Engineers, we are able to perform a wide range of tasks, such as:

- Project Planning and Management
- Configuration Management
- Quality Assurance
- ICT System Administration
- System Analysis and Improvement
- Software Development
- Infrastructure Logistic Deployment
- Communication and Networking

Our People, Our Value

We strongly believe in the **value** of **People**, who are the key to our success

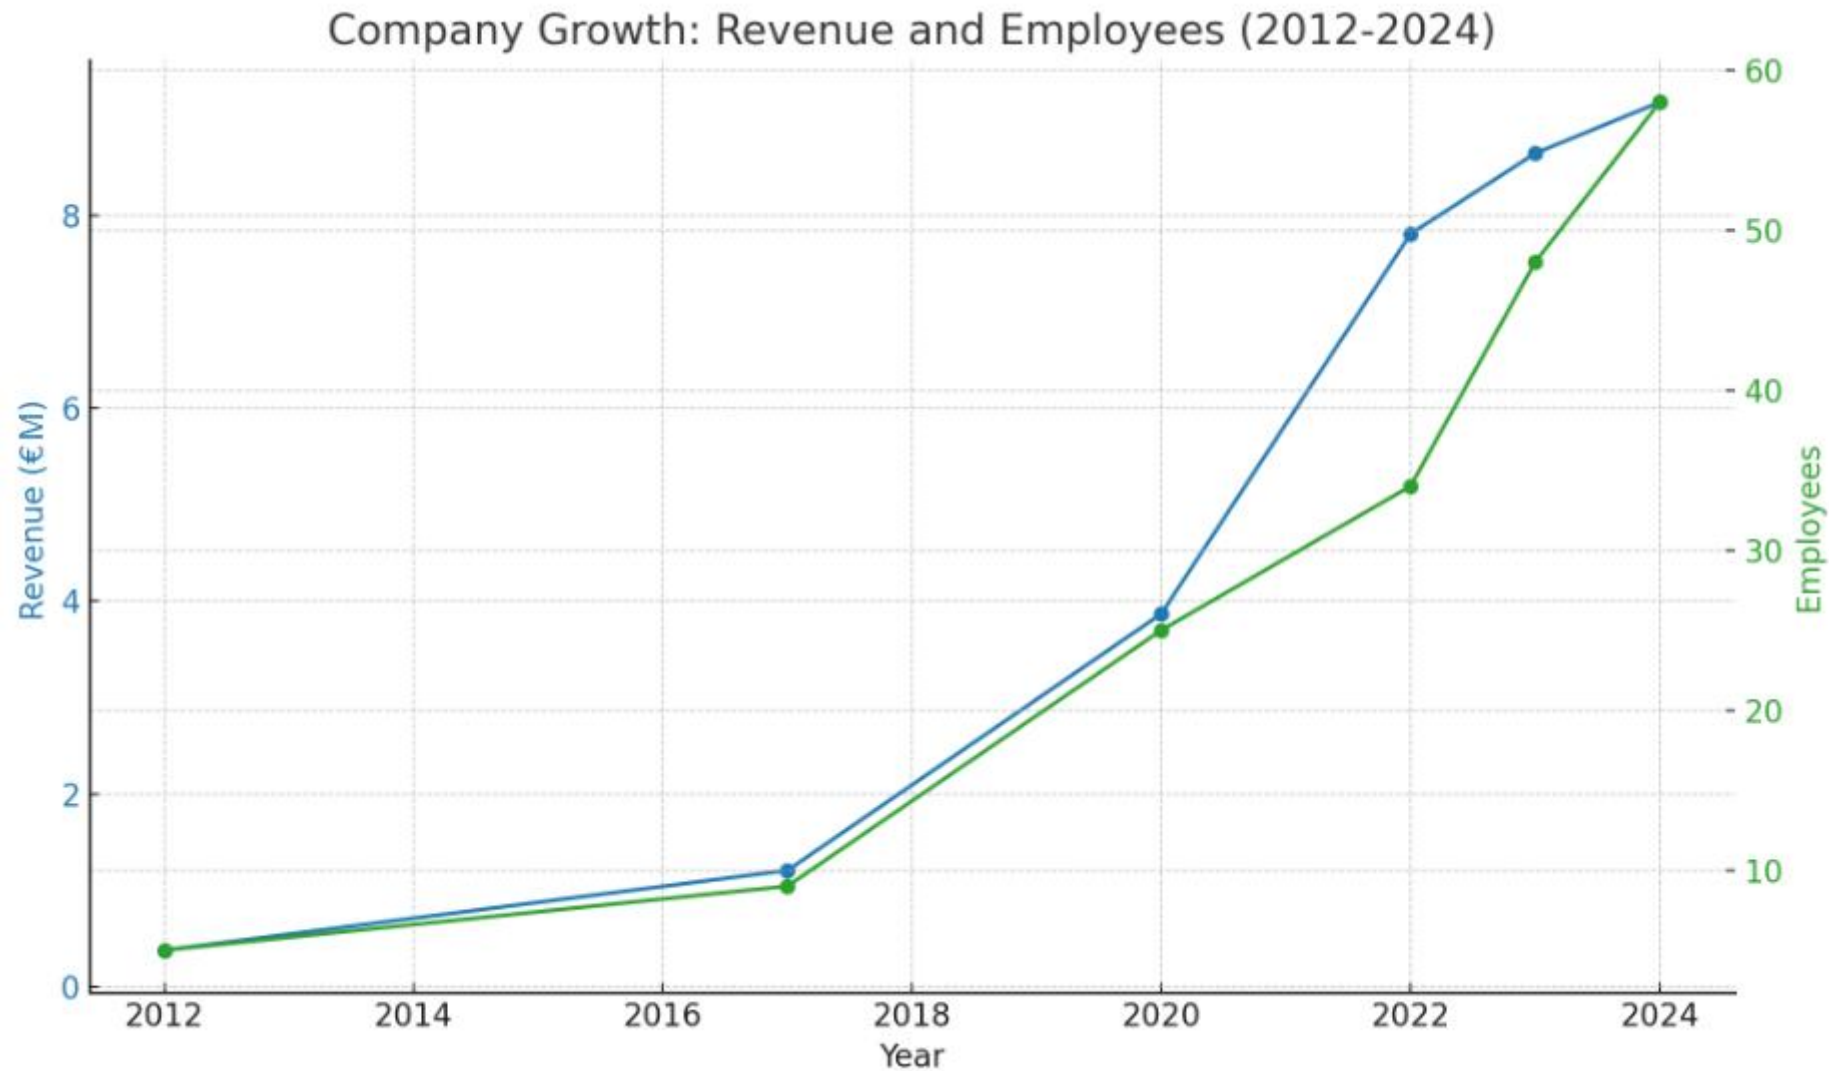

We employ qualified people, with university degrees in **space engineering**, **computer science** and other technical disciplines

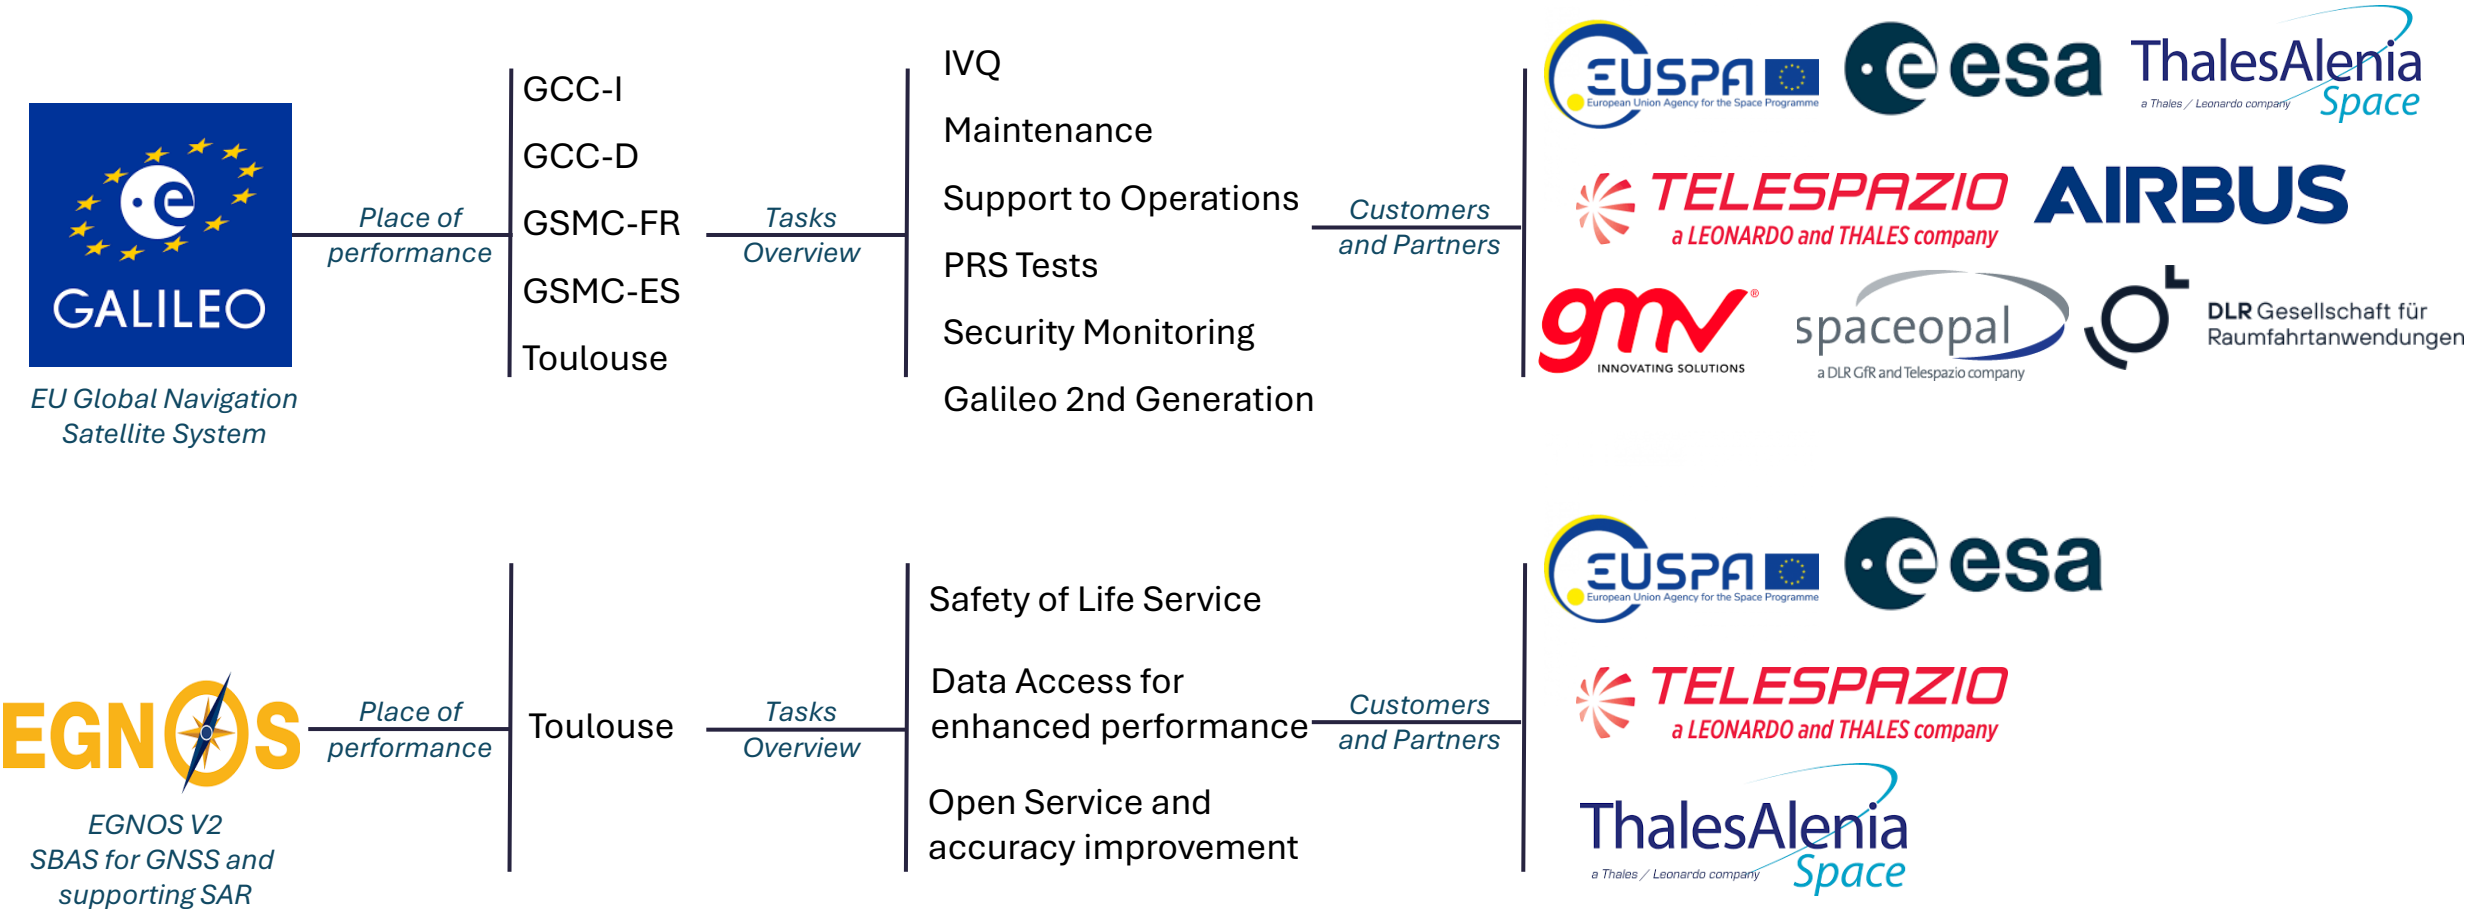

ESYEN invests in continuous **training** and **regular update courses** for our staff to ensure they are equipped with the latest skills and knowledge.
(**Agile** methodologies, **Language** Courses, Corporate **Management**, ...)

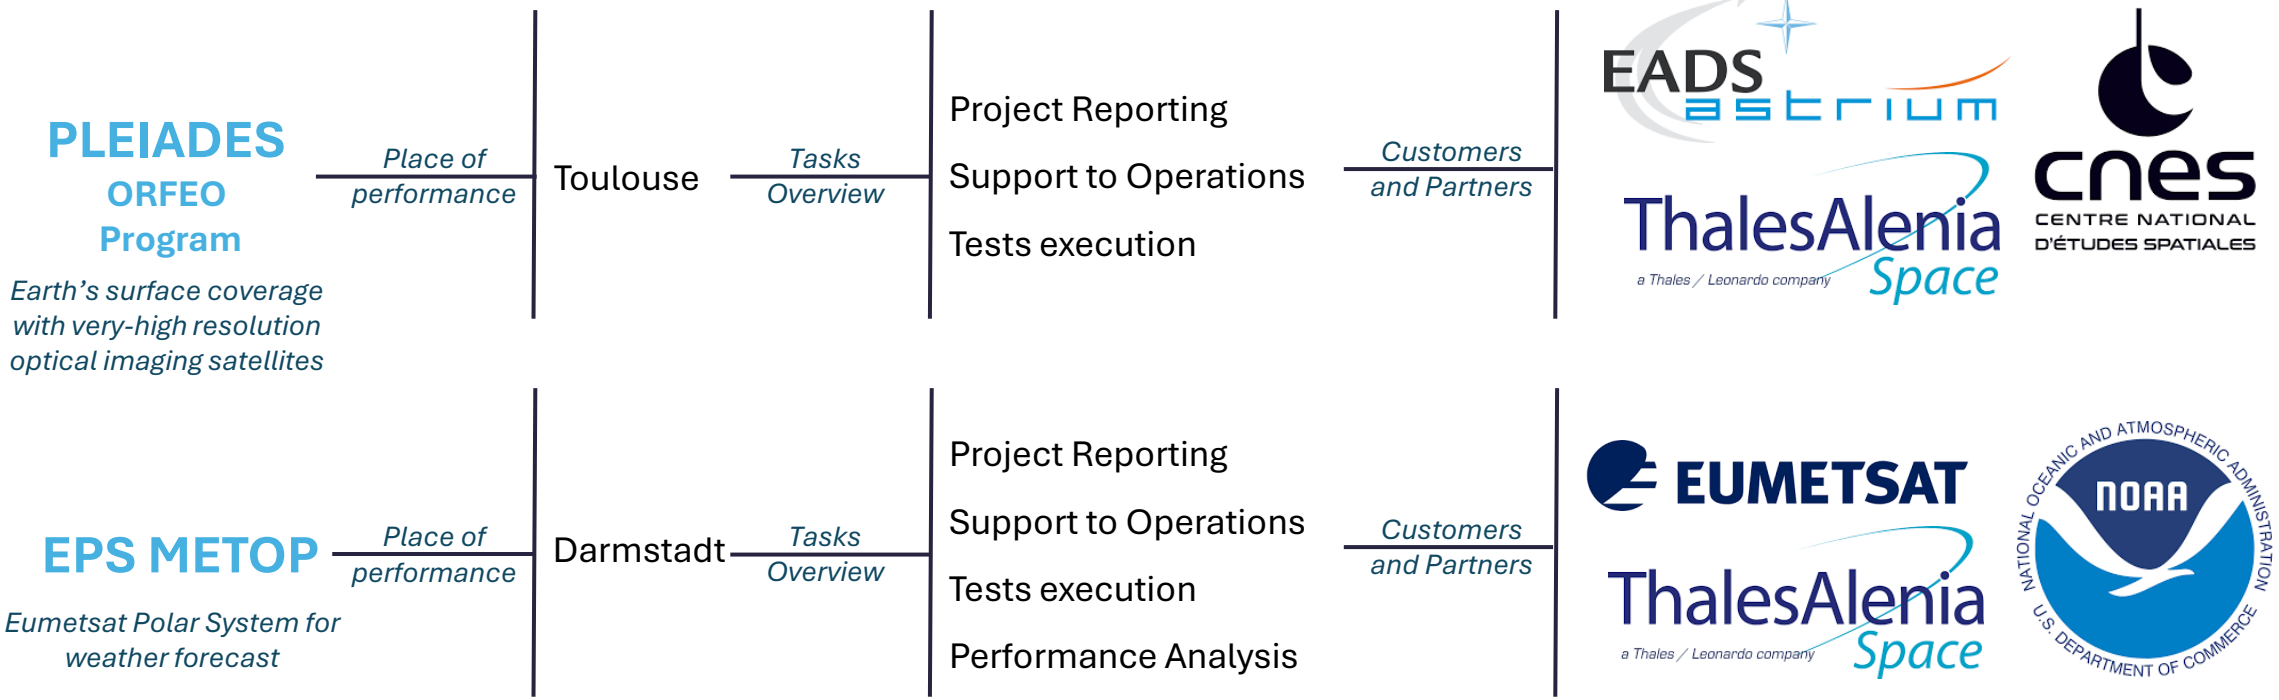

Throughout the years

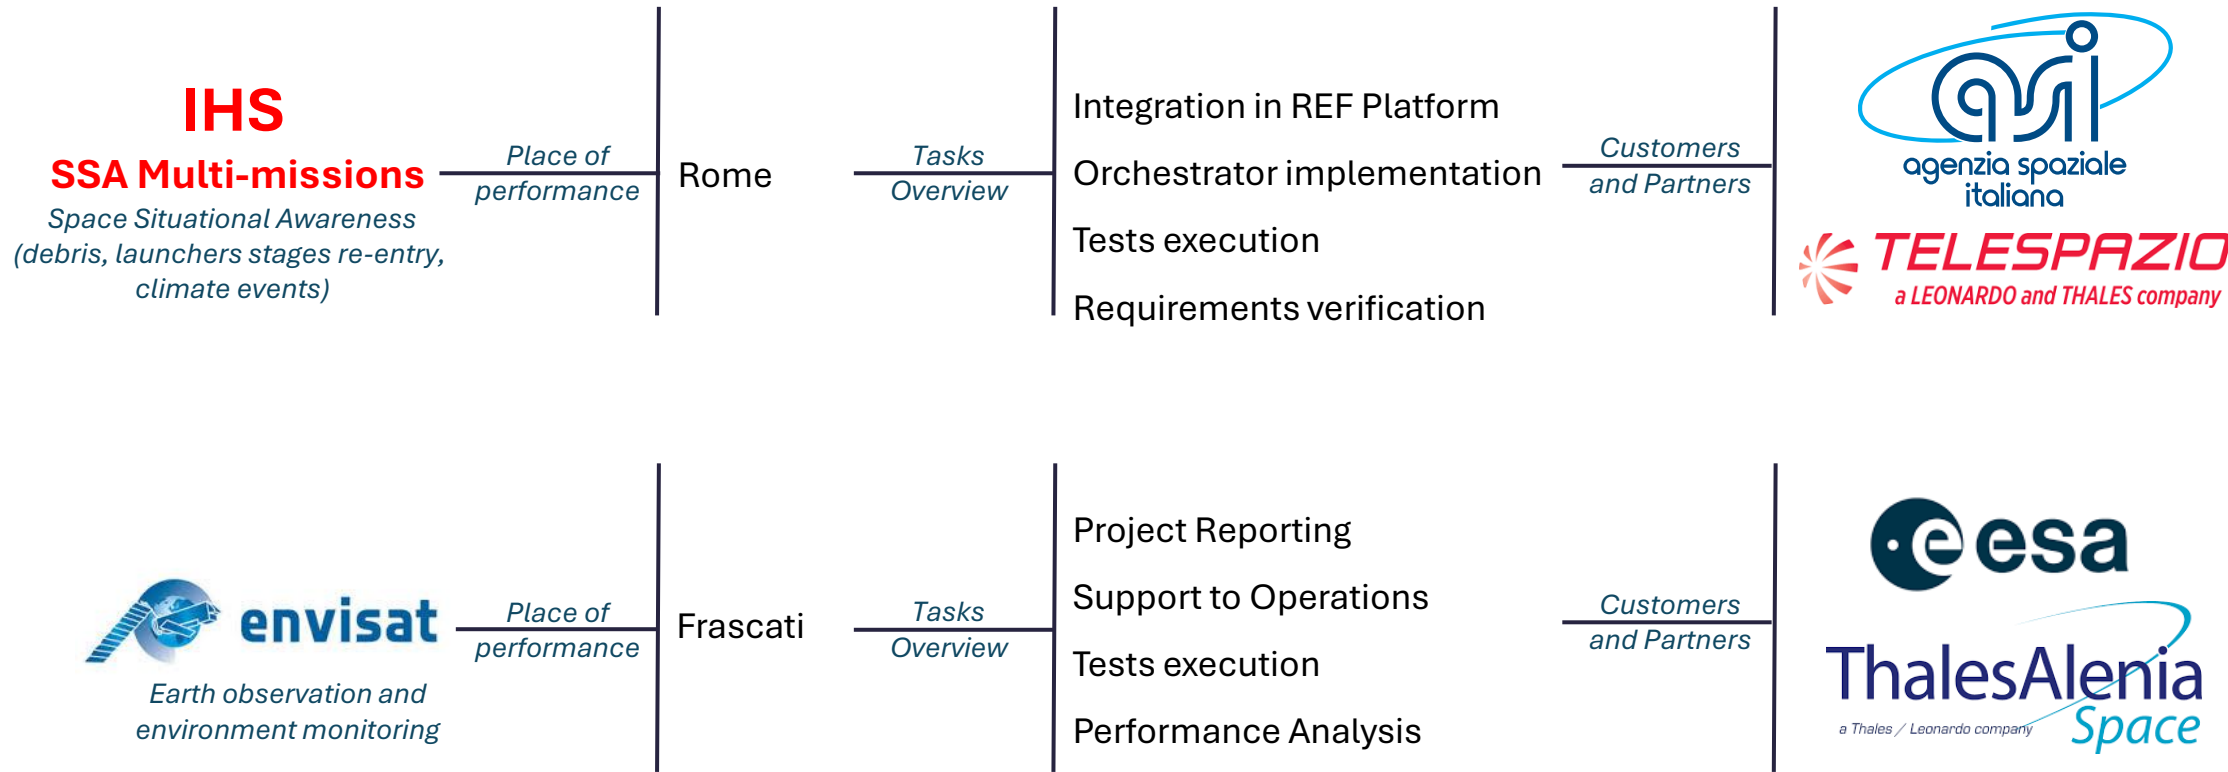

Main Projects

Main Projects

Main Projects

Assets and Skills

- **Proven Excellence in Space Projects:** Positive feedback from a wide range of customers. Any service includes the Management to follow the critical milestones and support Customer's requests.
- **Autonomous Teams:** Scalable, self-sufficient teams for efficient execution.
- **Integration & Validation** Expertise over many years.
- Support to **operations** and capacity of **maintaining** any complex infrastructure at each level (L1, L2, L3).
- **Multidisciplinary Team:** Aerospace and Computer Science specialists for holistic solutions.

Quality and Security

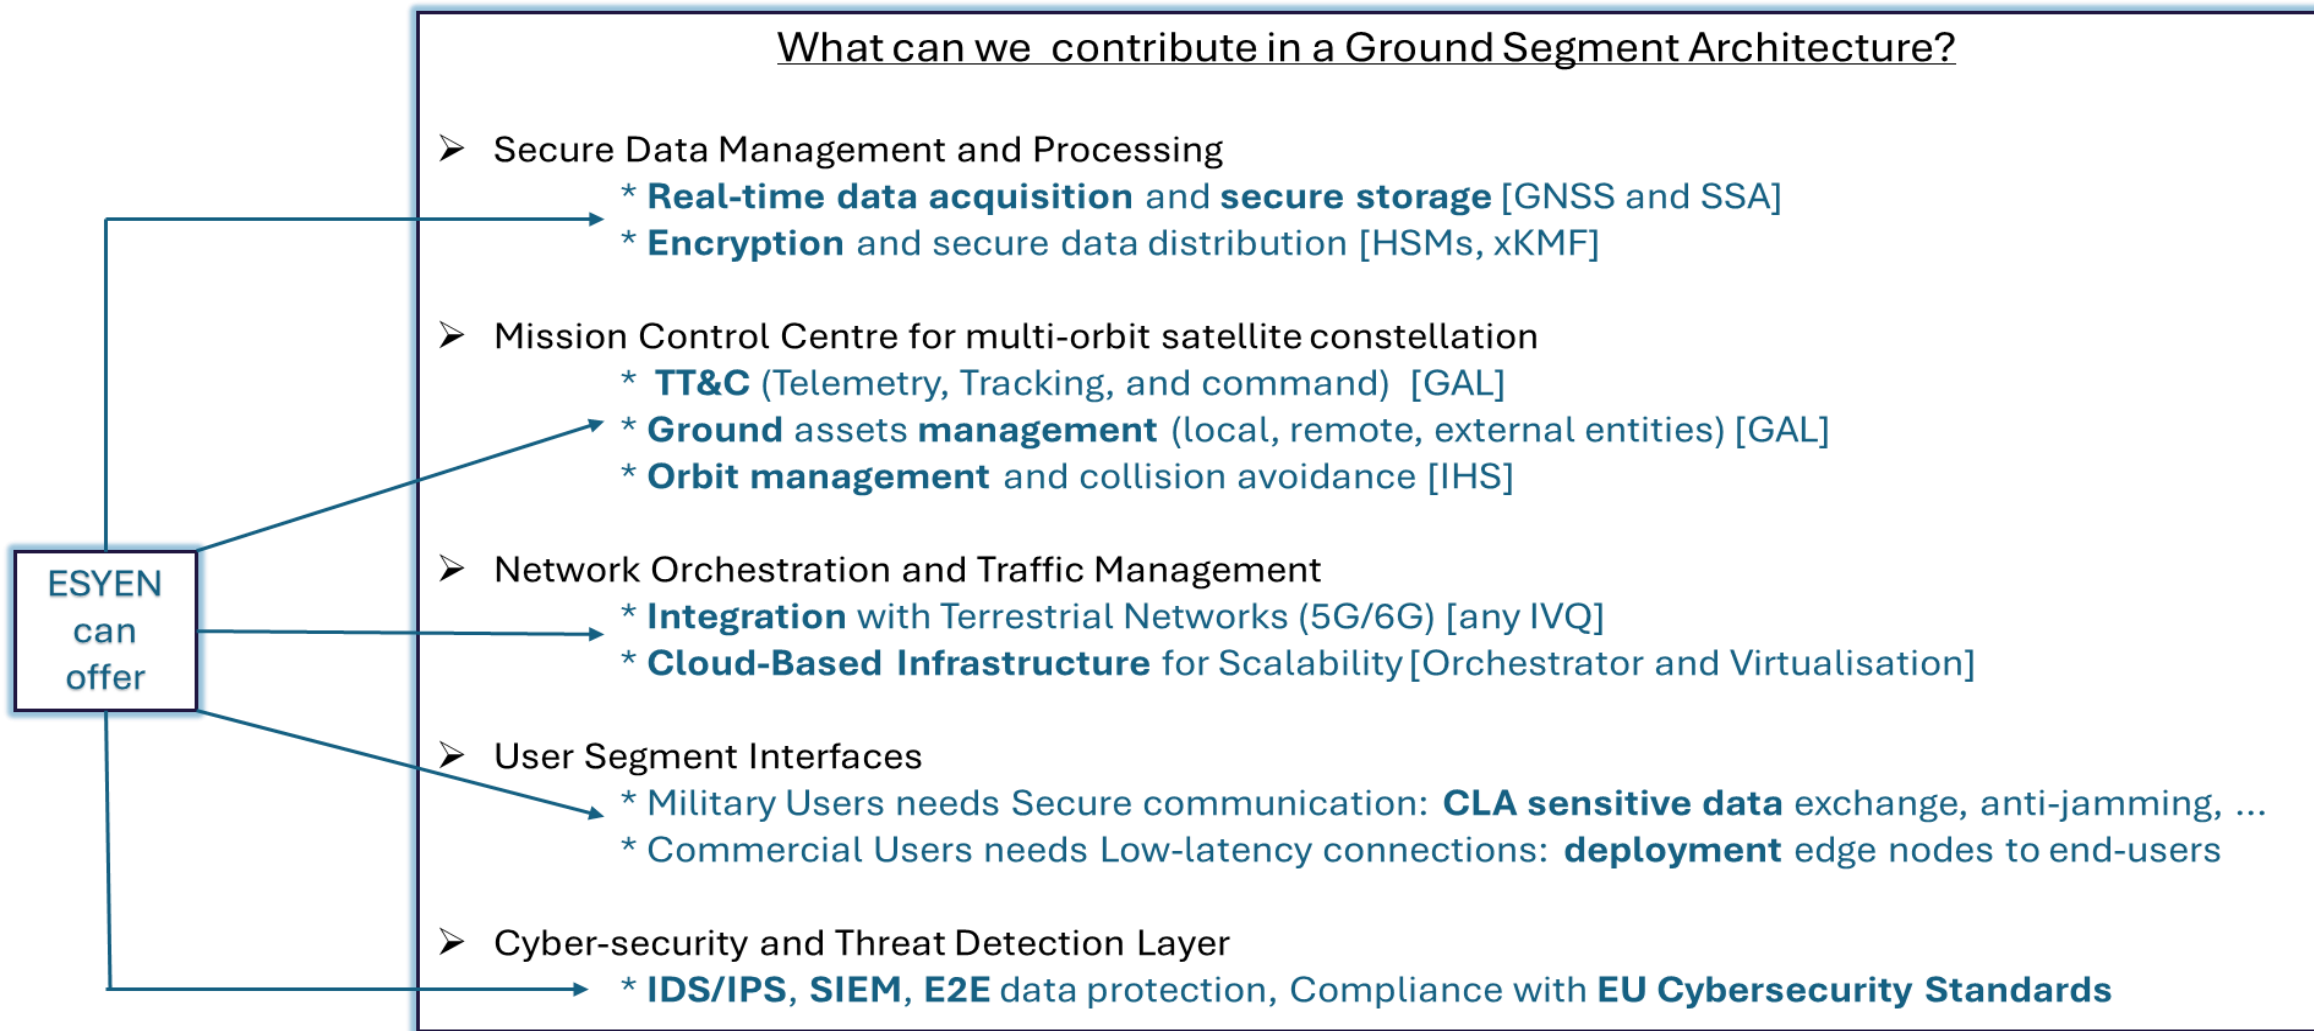

ESYEN is **ISO 9001:2015** accredited by Bureau Veritas Italy, ensuring that our **quality management** system meets international standards.

ESYEN ensures the highest level of protection and confidentiality to **handle classified data**.

Our Solution portfolio for Ground Segment Services

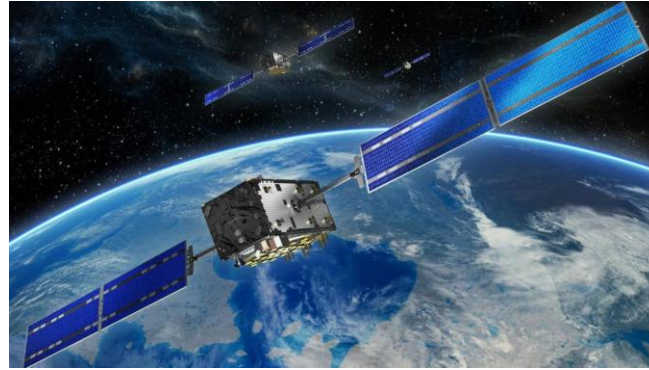

Growth and Partnerships

Research & Innovation

Partner with leading industrial partners and institutions to foster innovation and advance technological capabilities

Space Programs

Engage in projects for satellite navigation, Earth observation and Defence.

Strong Partnerships

Form strategic alliances to grow stronger together and achieve mutual success.

Key collaboration areas

Cyber-security on IT infrastructure

- Vulnerability Analysis & Risk Assessment
- Penetration Testing
- Network Security Architecture
- Security Operations & Monitoring
- SW/HW Hardening
- Support to crypto HW for cyphering

Integration & Operations

- Modules and Components Integration
- Functionalities Testing and Reporting (V&V)
- Secure Deployment of HW/SW Systems
- Maintenance & Operations of the System
- Fields: Sys Admin, Networking, Classified Env., Virtualisation & Orchestrators

R&D

Target: collaboration in innovative projects

ESYEN is consolidating a network of partnerships with the academic world. Our personnel are becoming actively involved in research projects funded by the European Space Agency (ESA).

Looking beyond

Thanks to our skills and experience, we can

- Operate throughout the **value chain** of the **Space Economy**
- Handle **large** and **complex data volumes**
- Act as **qualified player** across all **Space Programs** constellations (NAV, EO, Sec. Comm., SSA)
- Offer **Cybersecurity competencies** to space and ground operations
