

INSPECTA OPS OPS™

AI-Ready Digital Inspection & Operational Compliance Platform

Transforming field inspections into trusted operational data

Product Overview

INSPECTA OPS™ is a digital platform for managing inspections, compliance procedures and operational audits using structured checklists with photo and video verification.

The solution replaces fragmented reporting through messaging apps, spreadsheets and manual documentation with a centralized workflow connected to an **enterprise accounting system** and corporate data platforms.

Field employees perform inspections directly from smartphones or tablets while the platform automatically captures visual evidence, timestamps and geolocation data — creating a reliable digital audit trail.

INSPECTA OPS converts routine operational checks into structured data that can be analyzed to improve operational performance, compliance and decision-making.

Key Platform Capabilities

Digital Inspection Workflows

Create structured checklists and inspection templates for operational procedures, safety audits and quality control.

Multimedia Verification

Attach **photos, videos and audio evidence** to each checklist step to ensure transparency and eliminate false reporting.

Mobile Workforce Application

Field employees perform inspections from smartphones or tablets with **offline capability and automatic synchronization**.

Time & Location Verification

Automatic **timestamps and geolocation tracking** confirm when and where inspections were performed.

Task Scheduling & Process Control

Schedule recurring inspections, assign tasks to teams and track completion in real time.

Incident & Deviation Management

Capture operational issues, safety incidents or compliance deviations with full media documentation.

Operational Analytics

Dashboards and reports provide insights into inspection performance, compliance levels and operational risks.

Typical Business Applications

Retail & FMCG store audits
Warehouse inspections and goods acceptance
Logistics and supply chain monitoring
Field service operations
Infrastructure and facility inspections
Industrial safety and compliance audits

Business Value

Organizations using INSPECTA OPS achieve:

- Increased transparency of field operations
- Reduced operational and compliance risks
- Improved employee accountability
- Faster incident detection and response
- Reliable operational data for decision-making

The platform helps companies transition from **manual control procedures to data-driven operational management.**

Enterprise Integration

INSPECTA OPS integrates with:

- Enterprise Accounting Systems
- ERP platforms
- Inventory and warehouse management systems
- Corporate analytics platforms
- Industrial and operational data environments

This ensures that inspection data becomes part of the organization's broader digital ecosystem.

Target Industries

Retail & FMCG
Logistics & Supply Chain
Manufacturing
Utilities & Infrastructure
Facility Management
Industrial Operations

Partnership Opportunities

We are seeking collaboration with:

- System integrators
 - Digital transformation partners
 - Retail and logistics operators
 - Industrial enterprises implementing digital inspections
 - Regional partners across BRICS markets
