

PicoBot: Pocket-sized AI that runs without the cloud

A sovereign chatbot without IT constraints, mobile, that assists you on the line, in a submarine as well as at the top of Everest.

Installation ready in 5 minutes

- 220V
- 5 min
- air-gap
- zero network

A simple, autonomous, and secure start

1 Plug in

A 220V outlet is sufficient.
No IT infrastructure required.

2 Import

Upload your technical documents (PDF, Docx, pptx, photos, videos, plans). Agents are created locally in minutes.

3 Interact

Your technicians query the agents using natural language. Everything remains on the machine.

100% AIR-GAP

No network connection. No outgoing data.
Ideal for testing your AI use cases without IT department constraints

PicoBot is the only turnkey AI chatbot hardware software that your sales representatives can install at the customer's location in less than an hour – without cloud - without GPU costs, without IT department, without dependency.

Easy

Immediate deployment

A simple mains power supply.
No dependence on the local IT system

Data

Data sovereignty

Local treatment on the machine.
no outgoing data.

Terrain

POC frictionless

Perfect for workshops, sensitive sites, white zones or constrained environments.

Use case: field questions by profession

Concrete examples of issues addressed locally, without cloud, without network and without IT department dependence.

Maintenance

Production

Career questions
