

Who we are

myLIFEPATH unites 31 organisations across 11 countries to connect active mobility, healthier lifestyles, cancer prevention and people-centred urban planning.

What we are working on

We develop and test digital mobility tools in ten cities, linking walking, cycling and micromobility with cancer risk reduction and quality of life.

What's the one thing we need next

We need strong diagnostics, ten Living Labs and citizen co-creation to design scalable, user-centred mobility and health interventions across diverse European cities.

**5 years Mission Cancer:
Stronger Through Connection**
