

INTRODUCTION OF THE SYRUPS OF THE YUVA LTD – HUNGARY

Our Company had been established in 2004, it's located on the South of Hungary. Our main activity is the production of high-quality fruit syrups. Our factory fulfils all the related rules of the EU, having HACCP system.

Due to the continuous technology development our assortment became much wider during the last some years.

Our main target is to develop quality and unique products considering the markets' demands. Our FruttaMax branded premium quality product range is really unique as in the domestic as in the foreign syrup market from the packaging and characteristics' point of view.

ABOUT THE PRODUCTS

They're made with high fruit content (50-60%) and a favourable dilution ratio (1:23).

Environmentally conscious thinking has been given a prominent role in our product development.

Buying only one 500 ml bottle of Bubble12 the consumers can prepare 12 litres of fruit juice at home.

The syrups can be consumed as still or fizzy soft drink. Our syrups are suitable for use in HoReCa or with domestic soda machines. Ideal ingredients for cocktails, but more of our customers add them as topping on ice creams or prepare different sweets as well.

We're ready to offer a part of our syrups in light version (means not containing any added sugar, only sweeteners), which ones are very popular among the dieters.

FRUTTAMAX BUBBLE 12
MADE WITH HIGH FRUIT CONTENT
INCLUDING SUGAR
