

About the GBA Group

The GBA Group is one of the leading laboratory and consulting service providers in Europe. Our core competencies: environmental, food and pharmaceutical services.

The GBA Group is growing continuously. Currently we are represented at 40 locations. Chemists, food chemists and chemical engineers, biologists and bioengineers as well as pharmaceutical scientists and other fields deliver excellent quality for our customers.

Our Services in Pharma Analysis

The members of GBA Group Pharma are located in the European Union, have an excellent track record in serving client needs and long lasting experience in handling small molecules, therapeutic peptides, biologics and ATMPs. From early lead optimization and early preclinical stage to global clinical studies, we support you throughout the entire product lifecycle with our central laboratory, GMP depots, EU GMP manufacturing site for labeling and packaging and QP services, as well as late drug development and analytical services including import testing and QP batch release.

Our Services in Food Analysis

Our technical equipment and staff expertise enable comprehensive, high-quality processing of your samples and on-time delivery.

In the field of food analysis the GBA Group guarantees fast and reliable transportation and analysis of your samples. Before your samples arrive, questions and uncertainties will be clarified, so the process can be carried out smoothly from the very beginning. Our long-term experience in analyzing samples from almost all kinds of matrices ensures that the results will be calculated and analyzed competently, and that solution-oriented support will be provided.

Our Services in Environmental Analysis

Environmental analysis at the highest level. Our laboratories for environmental analysis combine swift and competent consulting with the complete range of modern environmental analysis. Our technical equipment and staff expertise enables comprehensive, high-quality processing of your samples as well as on-time delivery. Our competent evaluation of the results and the solution-oriented support that we provide are based on our employees' long-term experience dealing with almost all kinds of matrices.

ABF - Clinical Trial Supply

Clinical Trial Supply Services

- Import/Export and Customs Clearance
- GMP Storage of IMP, GMO and API at a Variety of Temperature Ranges 15-25 °C, 2-8 °C, -20°C, -80 °C, -150°C, LN2
- Controlled Drug Substances Handling
- Qualified GDP Transport (all Temperature Ranges)
- Project & Quality Management
- GMP certified service provider
- Comparator Sourcing
- Return Supplies, Reconciliation, Storage and Destruction
- Distribution & Depot Services

Labeling and Packaging

- Label Text Translation and Verification
- Label Design and In-House Printing
- Labeling and Cold Chain Labeling
- Lab/Patient Kit Labeling and Assembly
- Customized Primary and Secondary Packaging

QP Release

- QP Release and Regulatory Consultancy Services
- GMP & GDP Audit Services

PBMC

- PBMC Isolation Lab Network

Support of International Clinical Studies

ABF is a GMP-certified company with a wide range of pharmaceutical services for investigational medicinal products and approved drugs: Our services range from primary and secondary packaging including kit production and labeling, to storage and distribution at a wide range of temperatures. We take care of your product all the way through certification and release by our Qualified Persons (QPs). In addition, ABF has also established a qualified laboratory network to ensure high quality isolations of Peripheral Blood Mononuclear Cells (PBMCs).

An Experienced Team

Our dedicated team has extensive expertise in managing complex clinical trials. The ABF logistics team uses qualified couriers with full tracking systems to transport temperature sensitive investigational clinical products correctly and on time.

Logistics Experts at the Heart of Europe

With our headquarters at the heart of Europe - Vienna, Austria - we can offer fast, and efficient service solutions for all pharmaceutical products. ABF is a reliable partner for leading pharmaceutical and biotechnology companies worldwide. We operate internationally - mainly in Europe, the USA and Asia - and are continuously expanding our distribution network.

Our quality standards meet the highest pharmaceutical demands.
