

SWECCO

An aerial photograph of a city landscape featuring a winding river, a white arched bridge, and various urban buildings. In the foreground, there are lush green trees and a modern building with a white grid-like facade. In the background, there are tall apartment buildings and a distant city skyline under a hazy sky. The text "Transforming society together" is overlaid in the center of the image.

Our

International

Services

# Five decades of international experience

We deliver global consultancy services to international financing institutions, local governments and private clients by drawing on our extensive experience from Denmark and abroad

## We work across sectors

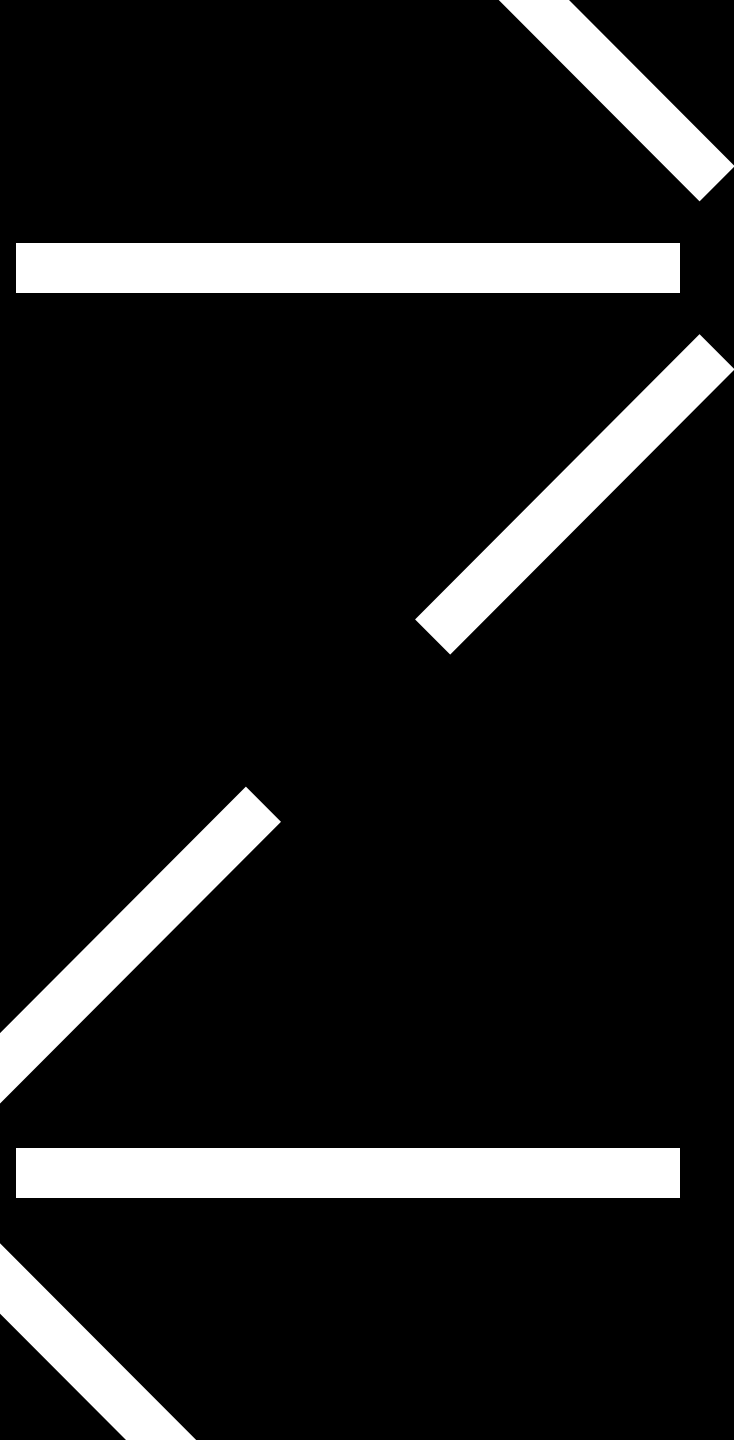

- Clean energy (renewable energy, energy efficiency, district heating and energy planning)
- Water supply and wastewater treatment
- Transport and road infrastructure
- Environment, social development and climate

## We provide service value at all phases of the project cycle

- Due diligence and appraisal services
- Preparation and review of feasibility studies
- Preparation and review of designs
- Tender preparation and tender assistance
- Construction supervision and commissioning
- Monitoring and evaluation
- Project and program management
- Environmental and social assessments
- Technical assistance, capacity building and training

Sweco in Ukraine

# Sweco's footprint in Ukraine

1992

Sweco has maintained an active presence in Ukraine since 1992, demonstrating a longstanding commitment to the country.

10 sectors

Our work covers a wide array of services within energy, water and sanitation, transport, waste, climate, environment, social development, buildings, architecture and food safety.

+70 projects

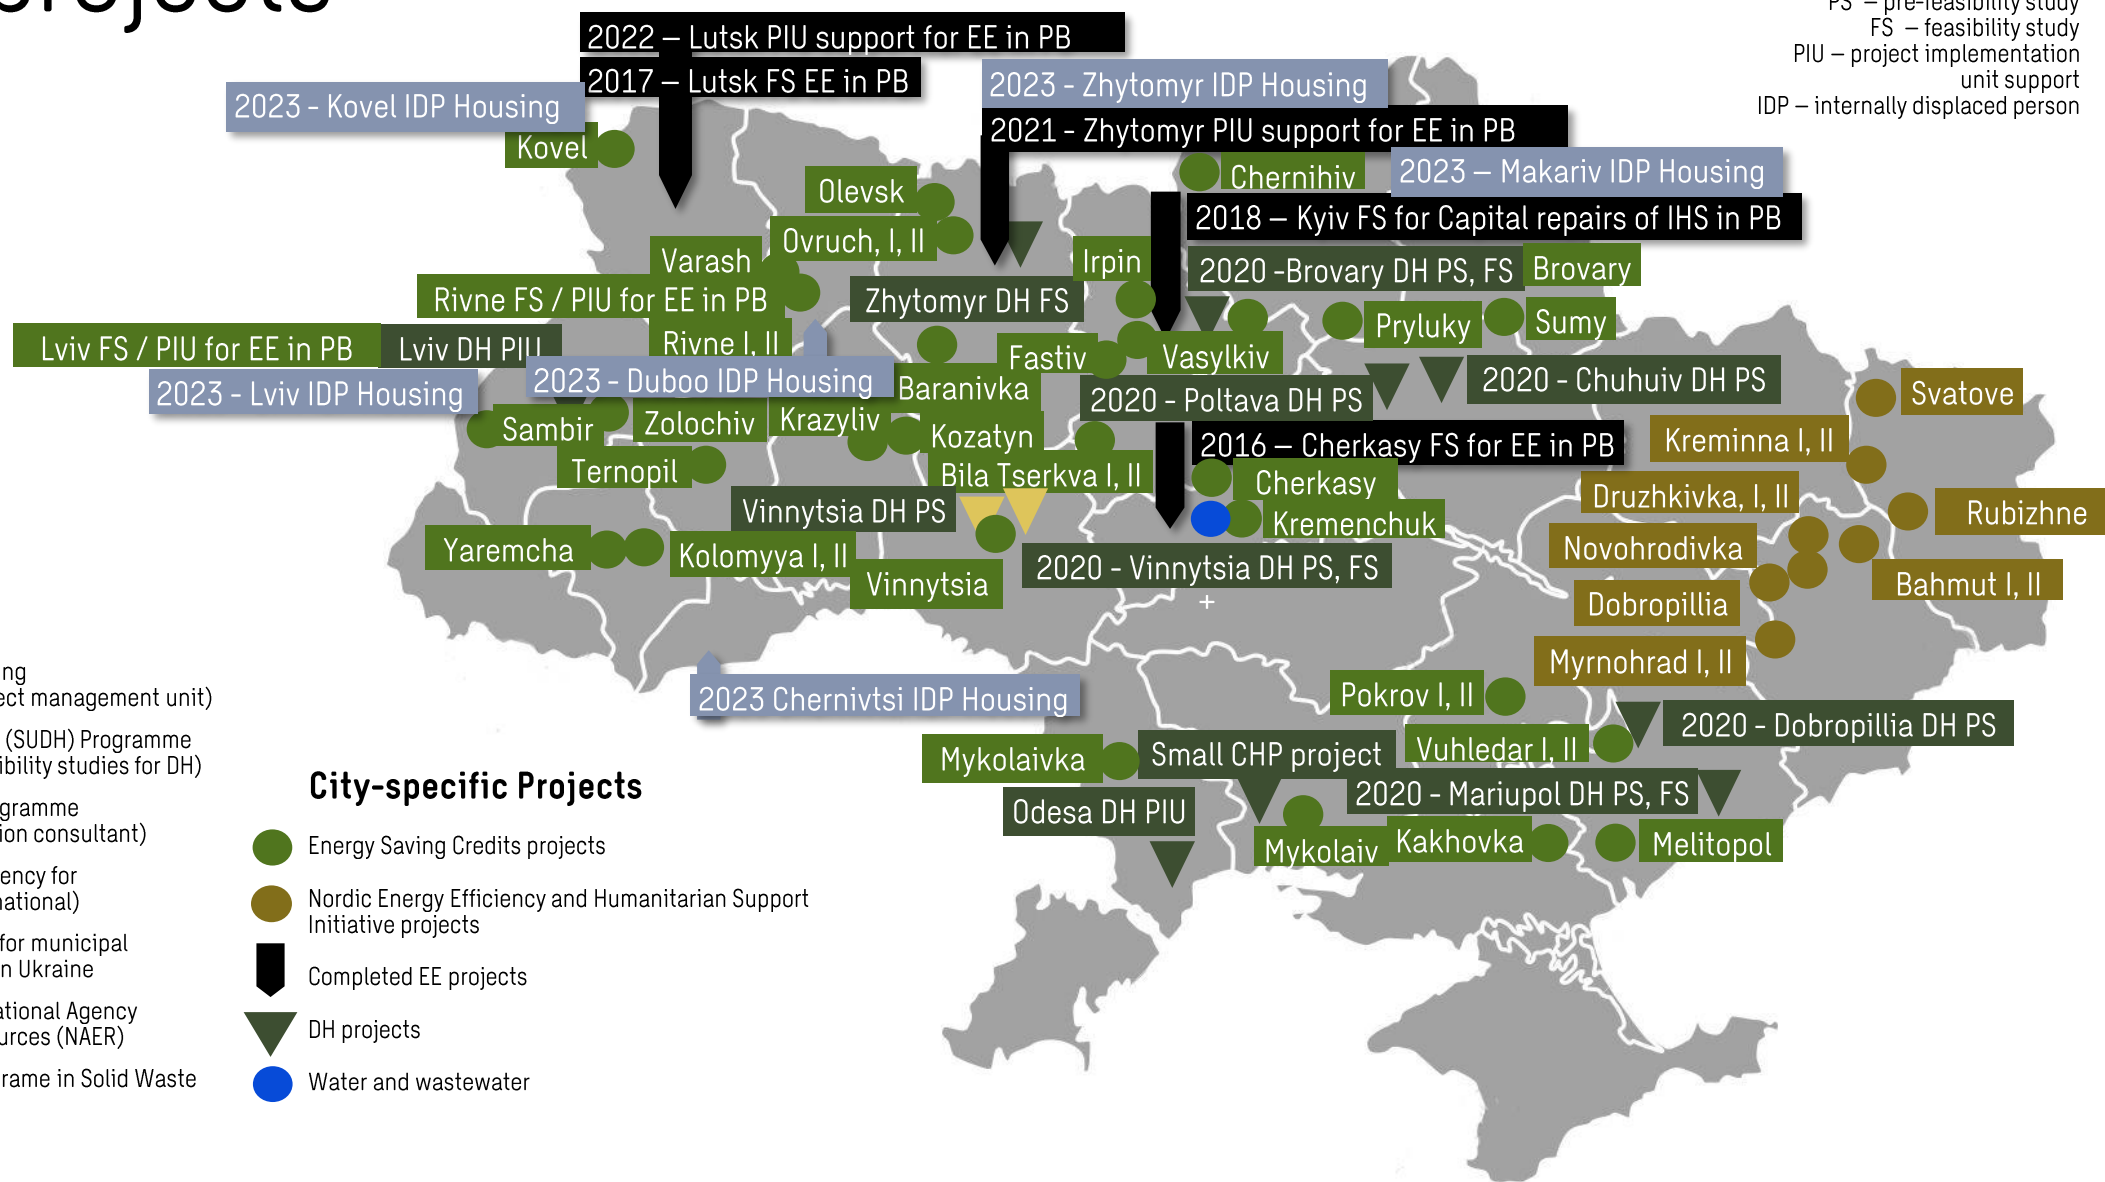

Our portfolio encompasses over 70 projects in Ukraine, showcasing our extensive experience and capability to meet the nation's reconstruction aspirations.

# Recent projects

## Abbreviations

EE – energy efficiency  
 DH – district heating  
 PB – public buildings  
 BP – business plan  
 PS – pre-feasibility study  
 FS – feasibility study  
 PIU – project implementation unit support  
 IDP – internally displaced person

## National Projects

■ Ongoing – Nefco / EU IDP Housing  
 (programme coordination, project management unit)

▼ 2019-23 – Sweden Ukraine DH (SUDH) Programme  
 (programme coordination, feasibility studies for DH)

2012-23 – DemoUkraineDH Programme  
 (coordination and communication consultant)

2019 – Manual for energy efficiency for  
 small municipalities (SKL International)

2018 – Financial market study for municipal  
 energy efficiency investments in Ukraine

2011 – Capacity Building for National Agency  
 on Efficient use of Energy Resources (NAER)

2008 – Advanced Training Programme in Solid Waste  
 Management

## City-specific Projects

- Energy Saving Credits projects
- Nordic Energy Efficiency and Humanitarian Support Initiative projects
- ➡ Completed EE projects
- ▼ DH projects
- Water and wastewater

# Project – Housing for Internally Displaced Persons

Funded by the European Commission, Nefco established a Project Management Unit focused on reconstruction of social infrastructure for housing of internally displaced persons (IDPs) in municipalities in the Western and Central parts of Ukraine covering the cities of Chernivtsi, Dubno, Kovel, Lviv and Zhytomyr. The investment is also focused on necessary repairs of municipal infrastructure ensuring restoration and sustainability of municipal services in the liberated cities and includes restoration of two kindergartens, two hospital buildings and a school, destroyed and damaged due temporary occupation, in the city of Makariv.

## Services included:

- Management and capacity building support to local communities
- Project preparation, incl. design and preparation of technical specifications
- Procurement support
- Support in the administration of contracts and works supervision
- Awareness raising and dissemination

Donor: European Commission  
Implementing Agency: NEFCO  
Total Project Cost: 64 Mil. EUR  
Total Contract Value: 2.25 Mil. EUR  
Period: 2023 - ongoing

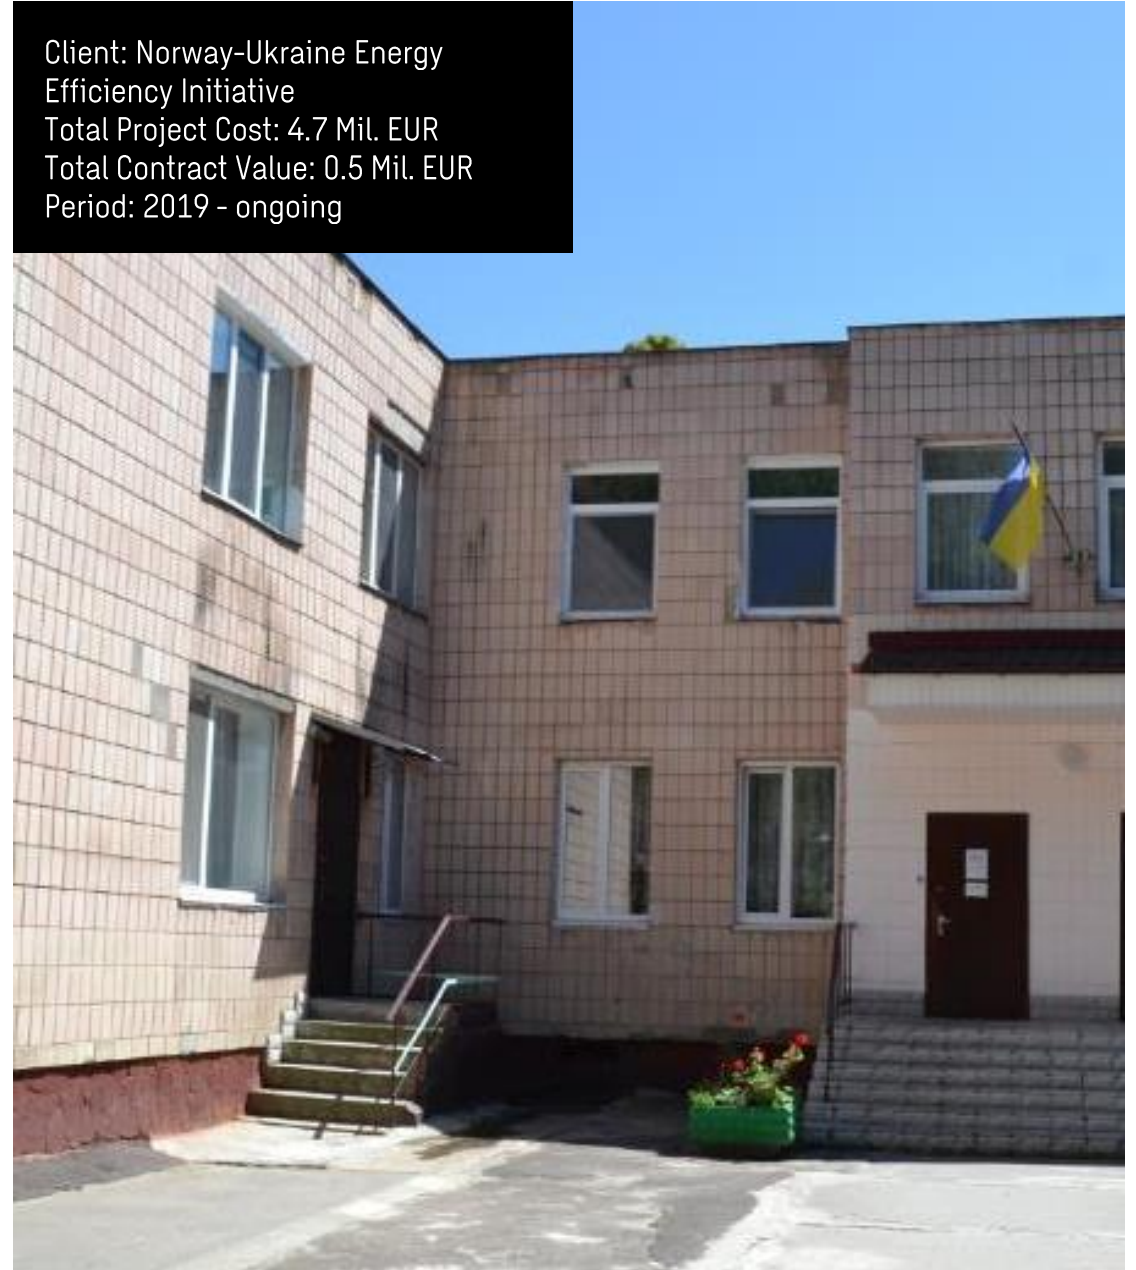

# Project – Energy Efficiency in Municipal Buildings and Street Lighting in Rivne

The project focus on strategic enhancement of energy efficiency across 35 public buildings and a comprehensive upgrade of street lighting systems. The project has been extended to incorporate solar PV installations for healthcare buildings. The objective is to reduce energy costs, improve indoor environments, cut natural gas use, and decrease CO2 emissions.

## Services included:

- Project Implementation Unit (PIU) support
- Design review
- Procurement support
- Contract management
- Engineering oversight

Client: Norway-Ukraine Energy  
Efficiency Initiative  
Total Project Cost: 4.7 Mil. EUR  
Total Contract Value: 0.5 Mil. EUR  
Period: 2019 - ongoing

# Project – DemoUkrainaDH

Client: Nefco  
Total Contract Value: 1.15 Mil EUR  
Period: 2012 - ongoing

Sweco provided coordination and communication support services to Nefco in connection with the facility for funding demonstration projects in the Ukrainian district heating sector, DemoUkrainaDH. The objective of DemoUkrainaDH is to support the development and funding of environmentally sustainable and energy-efficient demo-system solutions in combination with the introduction of international practices. In total 12 demonstration projects in different Ukrainian cities were successfully implemented.

---

#### Services included:

- Project preparation
  - Design
  - Procurement
  - Implementation support
  - Assessment of efficient district heating technologies
- 

# Project – Kremenchuk Water Supply and Distribution Project

Client: Kremenchuk City Council / Swedfund  
Total Contract Value: 0.4 Mil EUR  
Period: 2023 - ongoing

Through a thorough feasibility study and assistance to the City Council, Sweco is supporting the water company in Kremenchuk in developing necessary analyses and preparatory work required to improve and secure water quality and distribution system as well as its capacity.

---

#### Services included:

- Review of proposed project components
  - Demand and forecast study
  - Financial and affordability analysis
  - Environmental and social screening and gap assessment
  - Roadmap for detailed environmental and social impact assessments
  - Resettlement policy framework and action plan
  - Review of designs
  - Project management support
  - Procurement advice

A vibrant, futuristic cityscape illustration. On the left, a large steel truss bridge spans the frame. Below it, a geodesic dome with a blue and white triangular pattern sits on a green lawn. To the right, a modern building with a curved glass facade and a dark roof stands prominently. In the background, a tall wind turbine is visible against a sky with soft, colorful clouds. A high-speed train with a white and red front is in motion in the lower right corner. In the bottom left, two people are walking a dog on a path. The text "Transforming society together" is centered in a white, sans-serif font.
