SECURITY & DATA OWNERSHIP

PRIVATE INSTALLATION (ON-PREMISES/CLOUD)
The chats are self-hosted, on-prem or on private cloud, for full and exclusive ownership of internal comms.

CUSTOMISABLE ENCRYPTION
The encryption is set and accessible by the client only, with possibility of two-man rule and split key.

ADVANCED AUTHENTICATION
Certified and trusted identity of the users; immutable and truthful content of the communications.

PROTECTED MESSAGES
Special messages requiring actions (captcha, fingerprint) to be unlocked and read.

BLACK BOX: INDELIBLE MESSAGES
Indelible and time-stamped messages, always inspectionable on the database.

PRODUCTIVITY

More than instant messaging: internal communications, workflows and reports, 3-in-1.

TAILOR-MADE WORKFLOWS
Script-based interaction modules that follow the companies manuals of operations, including interdependencies and users' permissions.

CALL-TO-ACTION BUTTONS
Call-to-actions and take-in-charge buttons, to issue and take up tasks while notifying colleagues.

PROCESS MANAGEMENT MECHANICS
Acks (acknowledgment), reinforced authentication for critical steps (captcha, fingerprint, etc.), wait notifications, etc.

CUSTOMISABLE CONTACT LISTS
From databases in use (Active Directory, etc.) with configurable filters (role, department, specialty, location, etc.).

AUTOMATIC REAL-TIME REPORTS
Reports created automatically and in real-time on the templates in use.
