

Transforming all wastes into circular products

Double challenge

Wastes management

2,3 billion tons / year in Europe

Around 48 % still incinerated (25.2%) or landfilled (22.5%)

Raw material

6,9 billion tons / year in Europe

Huge impact on climate change & biodiversity loss

Transforming your waste into circular products

Reduce environmental impact

High-value-added circular value chains

Foster territorial development

All types of wastes : from labs tests to large scale implementation

Minerals

BioAsh +

RecyCalc

Composite wastes

EcoCullets

Effluents & reagents

CarbActive

HydroFer Active

To be continued
with you ...

Notre activité : Gestion complète de filières circulaires

Turnkey circular economy waste management service

- Design, implementation & management of high value-added recycling chains
- Supported by our digital solution

Recycled and sustainable materials supply

What we are looking for !

Raise funds in S2 2025

Growing the team to :

- widely deploy our existing products
- develop new products
- improve our digital tools

Deployment in France &
internationalisation in Europe

Increase business

Key decision-making contacts in the industry
to expand business and materials portfolio

Targeted sectors

Energy, glass, chemicals, minerals, water, waste management,
metals, manufacturing, construction material, etc.

Join us to accelerate circular economy !

Seitiss : 2 Route de la Noue, 91190 Gif-sur-Yvette
