

C Y B E R O O

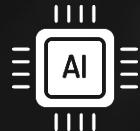

THE FREEDOM TO FOCUS ON YOUR BUSINESS.

WE CARE ABOUT YOUR DATA SECURITY 24/7

I-SOC

A team of cybersecurity specialists is ready to respond to any security-related problem in near real time.

MONITORING

Advanced detection tools provided with Artificial Intelligence and automated processes.

WE PROTECT YOU FROM EXTERNAL & INTERNAL THREATS.

WE DON'T LEAVE ROOM TO SHADOWS

INSIDE

We integrate and monitor
every system and service
that composes your IT
ecosystem.

OUTSIDE

Our Ethical Hackers oversee
deep and dark web to
protect your company from
cybercrime threats.

WE SUPPORT YOU ALONG THE PATH.

CYBERSECURITY IS NOT A PRODUCT BUT A PROCESS

PATH

Our service is studied and modified based on your specific needs to increase your security posture.

INTEGRATION

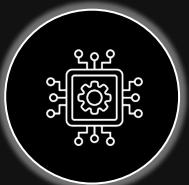

We integrate with your systems in a totally agnostic way. You don't have to re-think your structure.

ACCORDING TO GARTNER, THERE IS A NEED FOR AN ADVANCED SERVICE THAT MERGES THESE THREE PILLARS TOGETHER

to download Gartner report

ADVANCED TECH

Agnostic Technology

Only a system based on a completely agnostic technology, allows the correlation of countless sources of information, and thus a holistic view.

PEOPLE

Cyber Security Specialist

Cybersecurity is no longer just about IT. Specific competences are needed to identify and mitigate all threats within a given business environment.

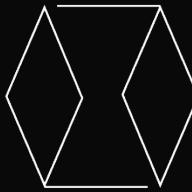

ALWAYS ON

24/7/365 Process

The 76% of ransomware attacks, happened between 2017 and 2019, took place at night or over the weekend.

CYBER
SECURITY
SUITE

OUR MDR PROTECTS YOU FROM INTERNAL AND EXTERNAL THREATS.
WE DON'T LEAVE ROOM FOR SHADOW AREAS.

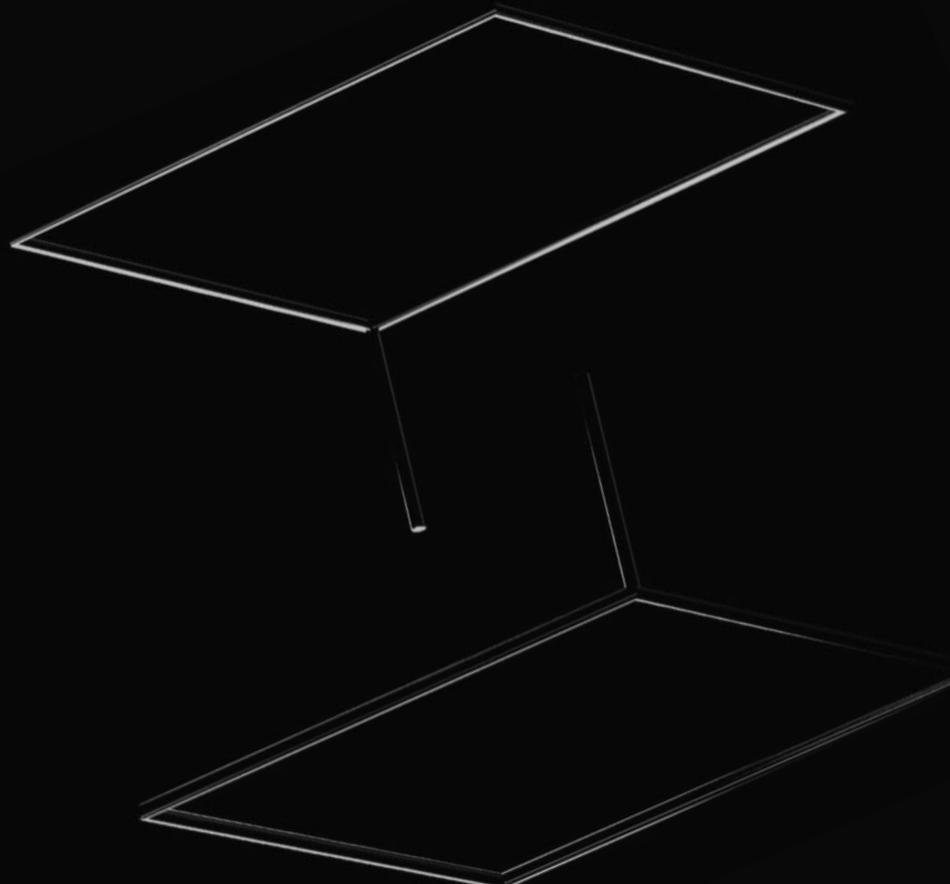

CY

Next Gen Intelligent Detection Platform

Manages your internal security

Cypeer integrates and monitors critical IT systems and services within your corporate ecosystem to protect you on all fronts.

CSI

Cyber Threat Intelligence Solution

Protects from external threats

Our ethical hackers scan the world of the Deep and Dark web undercover to identify possible threats and defend your borders.

WHAT ARE THE FEATURES?

CY

- Intelligent and agnostic Detection platform that integrates and monitors any IT, IoT and Cloud component of the customer logical infrastructure
- Thanks to the correlation of data, it allows to detect any threats in the early stage, that otherwise would be invisible, to protect the customer's security
- Three tiers of I-SOC that can quickly respond to mitigate threats 24/7
- Remediation capabilities according to customer needs for effective mitigation at all times
- A team of Security Advisor Managers who lead the customer in a data-driven process of improving the security posture
- An Incident Response team always ready to intervene

and many more...

CSI

- Intelligence activities to protect companies from any attempted fraud or malicious behavior caused by public information made available on the Clear, Deep and Dark Web
- Data Breach identification to verify the leakage of credentials or corporate files
- Full visibility on Data Breaches or Data Leakage to secure client's private or sensitive data
- Continuous Scanning of the Client domain to identify potential duplicates and protect their brand and reputation
- Tailored online protection service for Client's VIP Users to protect their day-to-day operations
- 24/7 response capability thanks to CYBEROO I-SOC team

and many more...
