

Who we are

CANDLE unites 40 partners in 20 countries to help Member States establish National Cancer Data Nodes that support cancer researchers and data holders by facilitating cancer data (re)use. Together these national nodes will form the UNCAN.eu network.

What we are working on

We define National Cancer Data Nodes, address implementation barriers, develop national roadmaps and provide tools to align them with Europe's cancer data ecosystem.

What's the one thing we need next

We need cancer data actors and policymakers to establish connected and sustainable user-driven National Cancer Data Nodes across Europe.

**5 years Mission Cancer:
Stronger Through Connection**
