

BoxPot®

www.spawnfoam.pt

Together for a greener planet

BoxPot is a creation of the companies Spawnfoam (biotechnology) and Sementes Vivas (biological and biodynamic seeds), which share the ambition to contribute to a greener planet, free from pollutants, without plastics and zero waste.

The combination of their knowledge and technology gave rise to a 100% organic and biodegradable product, which is as useful for its users as it is valuable for the transition to a Circular Economy.

Instructions:

- 1) Insert the substrate into the pot and press lightly.
- 2) Place approx. 1/4 of the amount of seeds indicated on the sachet.
- 3) Cover with a thin layer of substrate and water (moisten).
- 4) Place the pot in a place with natural light with a few hours of direct sunlight.
- 5) Wait with affection and love for the germination of your seeds.
- 6) At the end of the production, do not throw the pot away. Bury it in the soil with the plant.

How to care:

- 1) Check regularly that the substrate has moisture for the seed to germinate.
- 2) Keep in sunlight whenever possible.
- 3) Be careful with the temperature.
