

Who we are

IDERHA unites 33 public-private partners across Europe to improve access, integration and analysis of health data for patient care and medical research.

What we are working on

We build a federated health data space using AI/ML, initially for lung cancer, while developing real-world evidence recommendations for regulatory and HTA decisions.

What's the one thing we need next

We need regulators, HTA bodies, policymakers and new platform partners to turn recommendations into practice and expand IDERHA beyond current participants.

**5 years Mission Cancer:
Stronger Through Connection**
