**CYBERSECURITY**

# Global cyber risks management

We cover the entire cyber security lifecycle, analysing specific environments from a compliance or risk management point of view, devising plans that comply with standards, incorporating specific technological solutions, managing the operation of technological security infrastructure, and providing the visibility needed for decision-making and optimal management.

INNOVATING SOLUTIONS

## OUR CHALLENGE

We are increasingly aware of the risks we are exposed to. We ought to assume that sooner or later we'll be attacked. Therefore, we should increase our efforts to minimize the impact of these attacks in our business.

In GMV we focus in a proactive and reactive approach by tackling cibercrime in all its forms; identifying measures and controls, protecting assets, anticipating and detecting attacks, reponding to cyberincidents and back to normal.

RECOVER

## AT GMV, WE WORK WITH OUR CLIENTS TO MEET THESE CHALLENGES

- Critical Infrastructures Protection
- Information and Communication Technologies cybersecurity solutions and services
- Industrial Cybersecurity
- Security audits
- Compliance with applicable legislation, regulation or framework standards
- Implementation of security management systems
- CERT/CSIRT managed services (Computer Security Incident Response Team)

**Corporate ICT environments**

**Industrial environments**

**Critical infrastructures protection**

**Cyberdefense and intelligence**

**e-Health**

## OUR ANSWER
## SERVICES...

- Vulnerability management
- Information risk management
- Cybersecurity consulting
- ATM cybersecurity
- Pentesting & security assessments
- Privacy Enhancing Technologies
- Threat Intelligene
- Cloud Security
- Big Data antifraud
- Data protection
- Incident Response & Forensic Analysis
- Security achitecture & design

## ...AND SOLUTIONS

**Checker ATM Security**
is the market's leading security solution for financial self-service systems which for more than ten years has been protecting over 300,000 ATMs in more than 40 countries all over the world.

**Gestvul**
VULNERABILITY MANAGEMENT
For over 20 years, this management solution has supported the entire vulnerability lifecycle — from identification to remediation — across systems deployed in 21 countries throughout Europe and the Americas.

**uTile PET**
PRIVACY ENHANCING TECHNOLOGIES
A solution that enables the use of confidential and private data to improve machine learning algorithms and analytical models, while complying with organizational requirements, ensuring data privacy, and adhering to applicable regulations.

## GMV CERT [cert.gmv.com]

Since **2008**

**Over 6,000** service requests handled annually

Managed Services **35 countries**

**+15.000** investigations managed month

**+100** forensic investigations/year

**More than 150** active projects CERT/SOC

Service centers:
**Madrid
Valladolid
Bogotá**

CSIRT.es · FiRST · Red Nacional de SOC · CCN-CERT · CMMIDEV/3
