Lubo's innovative solution

PFAS-free assembly for water & infrastructure

Assembly has never been this easy. Lubo's fastening materials are ready to use and pre-lubricated with a dry, environmentally friendly lubricant. Prevent cold welding, save time, and cut costs. A smart choice for your projects and our environment.

About our innovation

Lubo supplies (stainless steel) fastening materials such as bolts, nuts, washers, and threaded rods directly from stock. What sets our products apart is the application of a dry, environmentally friendly lubricant that complies with the EU ban on PFAS. Companies in the drinking water sector that opt for Lubo are thus well-prepared for future laws and regulations as well as sustainability goals.

- ✓ Prevents cold welding
- ✓ Time and cost-saving
- ✓ PFAS-free
- ✓ Clean to use
- ✓ Available from stock

Water & infrastructure

Especially in wet and sandy environments, where construction and maintenance work on pipelines, pumps, and valves take place, Lubo offers extra benefits. Thanks to our dry lubrication, no dirt adheres to the screw thread.

You can start assembling immediately without the risk of a seized connection. When combined with the appropriate flange connection and gasket, Lubo guarantees a 100% leak-proof connection.

- ✓ FDA + EC1935 / 2004 approved
- ✓ Suitable for drinking water
- ✓ Machine-processable with an impact wrench
- ✓ Dismantlable after 1500 hours of salt spray test
- ✓ Low and consistent friction coefficient
