TABLE OF CONTENTS

We challenge IT

BreakPoint is a dynamic IT company specializing in comprehensive ICT services. Dedicated experts on our team have acquired extensive knowledge and expertise through years of education and skill development in the IT industry.

Our productivity is evident in track record of successfully completed projects and a growing client base that recognizes the quality of our services. We firmly believe that knowledge, time, and opportunities we create can contribute to a broader purpose, making businesses more efficient, optimized, integrated, and profitable, of course!

In the world of technology, a break point is a strategic moment where code execution can be paused, inspected, and analyzed. It is a crucial stage that allows developers to identify and address issues, leading to improved performance and stability.

Just as a break point in code signifies progress and improvement, BreakPoint aims to be the catalyst for transformative change in the IT industry.

"BreakPoint's purpose is to confidently revolutionize IT!"

We empower businesses to reach their own **breaking points**, where they can break free from constraints and unlock their full potential.

VISION

Increasing awareness about the use and adequate implementation of Information Technologies in solving today's business challenges.

Mission and goals

- Contributing to our client's success through quality ideas that our expert team brings to life using the newest technologies and frameworks!

- Increasing the company's efficiency by constantly raising the quality and competitiveness of our products and services to the highest attainable standard.

- Ensuring progress and prosperity for all stakeholders through transparent relations, concrete solutions, and active communication.

- Keeping employees happy and motivated in evolving and productive environment where great ideas are born and implemented.

2023
5 anniversary milestone and entering banking sector

2016
Developing the first solution

2018
Expanding to HoReCa sector and entering strategic partnerships

2020
Implementing a new software for education during COVID

2022
Prioritizing investments in employees and professional training

Join our journey!

EXPLAINING OUR SERVICES

IT Consulting

We will help you make the most of ICT to achieve your business goals. We understand the dynamic landscape of technologies and continuously advise our clients on how to align with the latest trends and market requirements.

Software Development

We provide development and maintenance services for various types of software solutions in all major platforms. Services can include detailed instructions, documentation, users training, and continuous support if necessary.

IT Systems and Networks
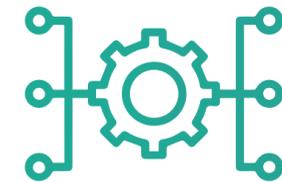

Our team of professionals offers complete process of design, construction, and maintenance of IT systems, as well as security and storage solutions. This includes engineering, integration, VPN solutions and network monitoring.

ACKNOWLEDGING THE TEAM

Our precious team currently consists of 35 developers, eager to express ideas and apply knowledge acquired through their long–term **professional specialization** in the field of ICT.

At BreakPoint, investment in employees is a top priority. The company provides a nourishing environment that fosters professional growth.

Talent Pool

We invest in building a specific and superior talent pool, consisting mostly of the successful students and alumni from software sciences and similar universities. This **exceptional** talent pool enables the company to keep up with the everchanging world of tech trends.

The BreakPoint team is a refreshing and enthusiastic group of young individuals enriching the company's fields of activity.

A word about the team

"Our dedicated and dynamic team embodies qualities such as persistence, honesty, experience, ambition, and commitment to conquering the impossible. They have been carefully chosen through their professional specialization in IT. BreakPoint takes a unique approach to problem-solving, all with the goal of making our product the market's precious pearl."
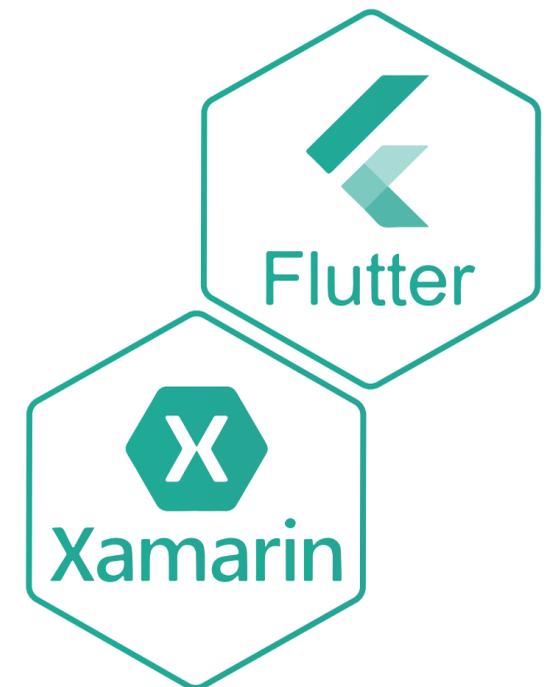

Admir Šehidić

Chief Executive Officer

... you name IT!

IMPORTANT STAKEHOLDERS

Of course, very little of this would be manageable and possible without our core partners and closest contacts. We build our relationships with associates and key stakeholders on **trust**, dynamic collaboration, and integrity.

BreakPoint is determined to seize opportunities on the global IT scene by forging alliances with like-minded companies who share its values and vision.

Through **long-term partnerships**, BP aims to simplify IT, accelerate processes, foster innovation, and drive growth.

If you want to partner up, we're always down!

NOTES AND RECOMMENDATIONS

Of course, very little of this would be manageable and possible without our core partners and closest contacts. We build our relationships with associates and key stakeholders on trust, dynamic collaboration, and integrity.

SYSTEM Logistics

"I had the privilege of collaborating with BreakPoint on the project involving warehouse and material handling systems. Their team demonstrated an exceptional commitment to organization and planning, swiftly delivering outstanding results well ahead of the deadline. BreakPoint's dedication to excellence and efficiency makes them a trusted partner for any logistics endeavor. Highly recommend their expertise! "

Samir Kapetanović   Operations Manager

mono

"It's a pleasure to recommend BreakPoint based on our dynamic collaboration. Their developers seamlessly integrated into our dedicated teams, contributing significantly to numerous projects for clients all around the world. Their commitment, communication skills and expertise has made them a reliable and valued partner. We appreciate their wholeheartedness and look forward to future collaborations."

Deniz Sujac - Chief Executive Officer

CONFIG

"Cooperation with Breakpoint was a turning point in Config's business. In a real sense, the Breakpoint team turned all our ideas into extremely high-quality solutions. With such solutions, we have strengthened the trust of our clients, expanded the base of new clients, entered new markets, launched new projects and strengthened existing ones."

Ivan Dragoje   Chief Executive Officer

Raiffeisen BANK

"I strongly endorse BreakPoint for their valuable contributions to our ongoing project, which involves the translation of legacy banking systems into modern instances and redesigning some of our bank applications. The team is very detailed, dilligent and frequently visits our headquarters to ensure they acquire the latest information which makes this difficult process easier and even enjoyable."

Feda Koluder   Director of IT

"Having BreakPoint as an associate has been truly remarkable. Their education solution has revolutionized our approach to teaching and learning, offering innovative tools and resources that enhance the educational experience for both students and educators. We are grateful for their dedication and unwavering support in the transition and learning process. Thank you, BreakPoint, for being a valued partner in our journey towards academic excellence."

Amira Kasumovic   Head of Education Department
