

MAGN'UP

MAGNET FOR THE PLANET

Industrial needs

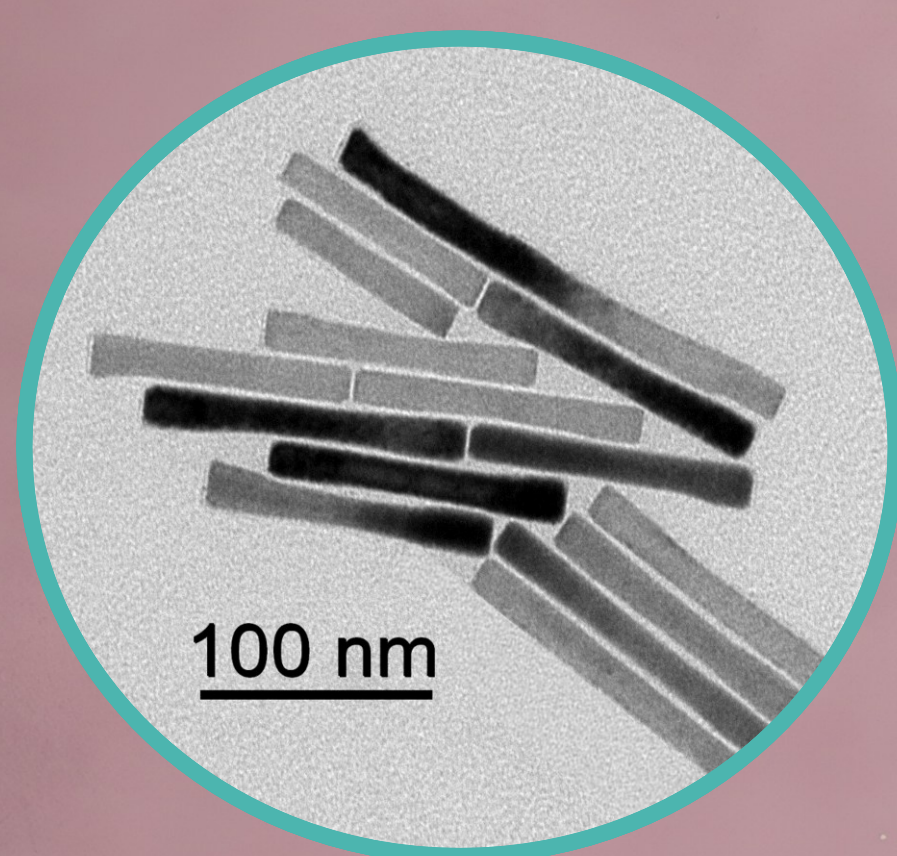

- miniaturization, *in situ* integration
- soft and permanent magnets

Sovereignty

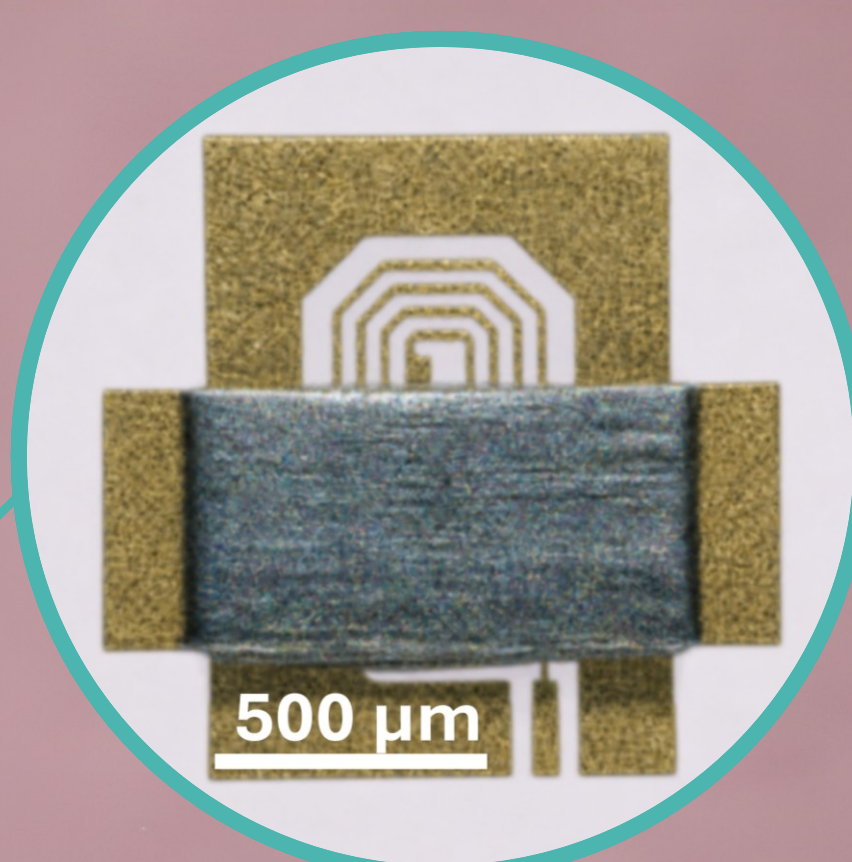

- rare-earth-free magnets
- produced in France/EU

Environemental concerns

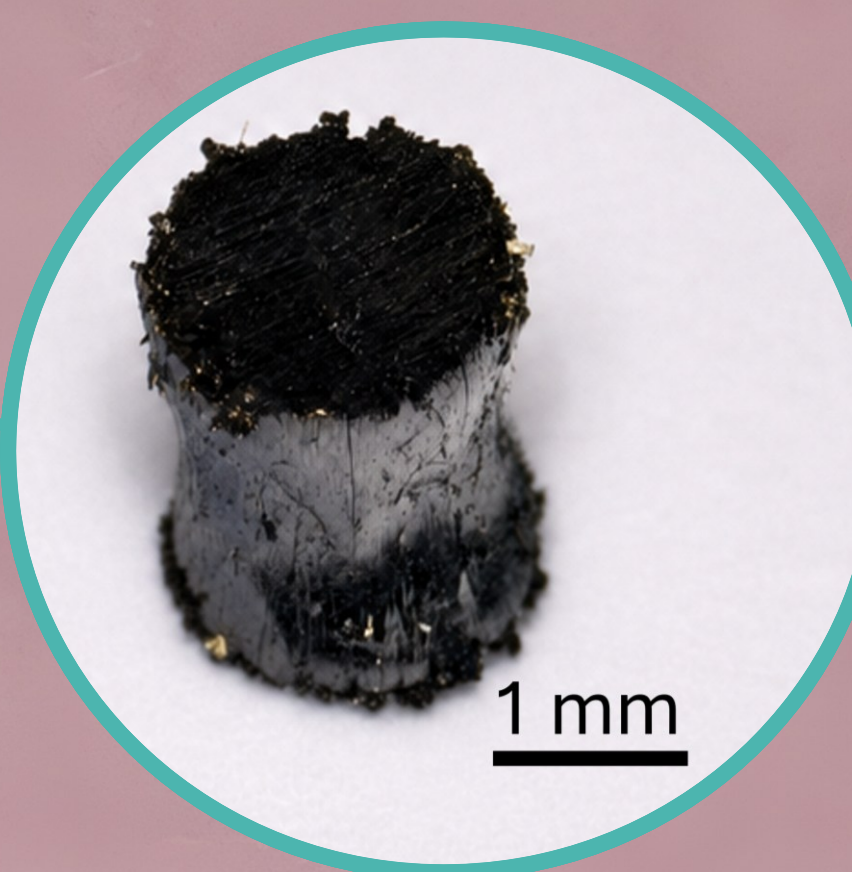

- rare-earth-free and recyclable magnets
- more ecological process

Cobalt-based nanoparticles

Micro-magnet on an RF planar inductor

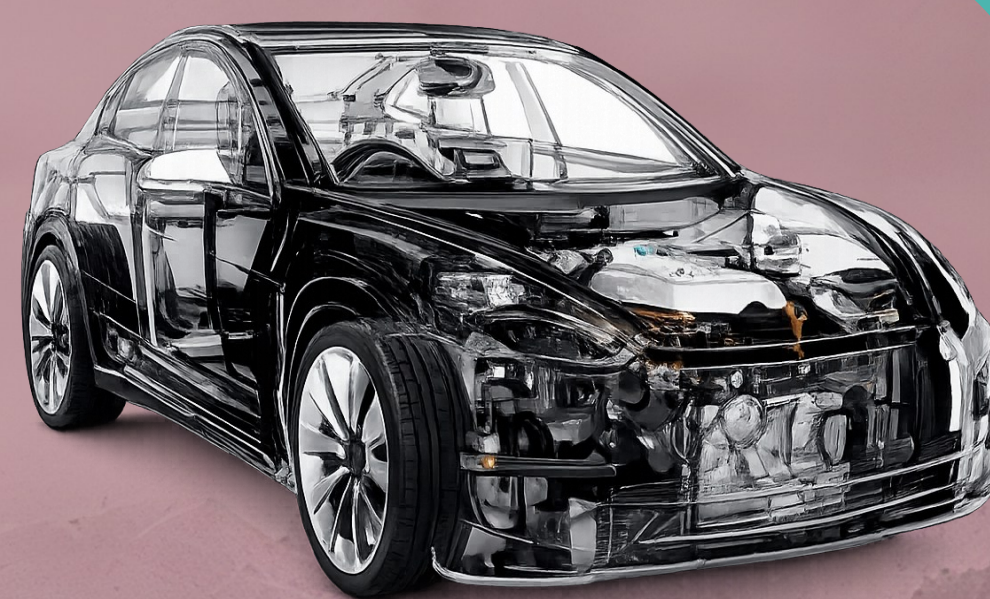

Milli-magnet with cylindrical shape

in smartphones :
camera autofocus
speakers & haptics
RF & power inductors

in drones :
propulsion motors
camera gimbals
LIDAR scanner

in cars :
auxiliary motors
sensors & encoders
pumps & valves
