

CITIZEN DIALOG KIT

Developing a mobility plan: Evaluating temporary test setups on-site

Two proposed mobility changes were evaluated on-site using CDK survey devices. We collected the opinions of the actual passers-by, including cyclists, pedestrians and neighbours.

A collaboration with Mobiel21.

406 participants in **23** days

2x the concurrent online survey

20% younger than 25 years old

Compared to only 1% in the online survey

62% agree the change improves safety

Pedestrians and cyclists in particular

Tourism profiles and visiting patterns: Revealing insights into cycling tourism

For **three months** we collected information about recreational cyclists across **six locations**. We enable data collection independent of surveyor availability, weather or time of day, and over an extended geographical and time scale.

A collaboration with Tourism Flemish Brabant.

1800 participants in **98** days

800 complete surveys of >17 questions.

70% are cycling in groups

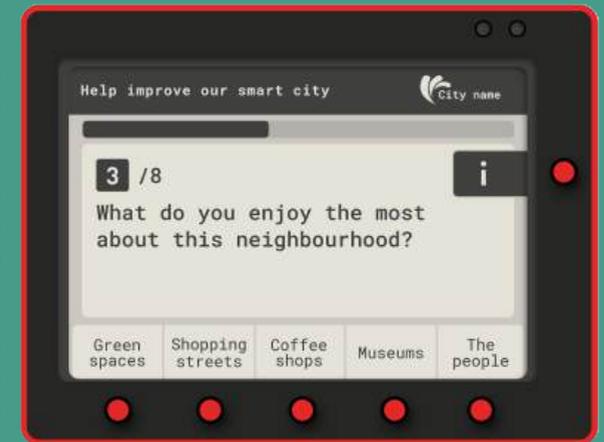

Suggesting an even higher participant count

80% will spend money during their trip

Of whom 24% will spend more than 25 euro

**Starting conversations
at places that matter.**

How we make the difference every single time.

With insights directly from the relevant physical location.

By engaging a much wider audience: from young to old, locals and visitors. Go beyond the usual communication channels. No QR-codes to scan. No registration.

With flexibility in the installation: indoors and outside, in sun or rain, without any other infrastructure. No installation cost.

By gathering input and feedback for extended time periods, totally independent of surveyors or volunteers, leading to more diverse and higher volume responses.

With support from A to Z based on 10 years of academic research and real-world expertise.

Now with a results API. Open the survey results to your citizens, integrated with your digital twin.

The CDK Devices

CDK survey devices are entirely wireless. This makes it easy to install them anywhere. Target a particular space, or a specific community.

The CDK Platform

Make your own surveys, monitor engagement in real-time, and even analyse the responses. All on the same user friendly platform.

The CDK Methodology

The CDK methodology and services are based on a decade of academic research and real-world experience. Get our support or go DIY.

Citizen Dialog Kit is an innovative **citizen participation platform** build to engage more and different people in decision-making through **interactive wireless displays**.

Successfully used in more than **30 citizen engagement projects** in over **5 countries**.
